Studies in Torah Judaism; Modern Medicine and Jewish Law Fred Rosner,1972 *Modern Medicine and Jewish Law* Fred Rosner,1972 Modern Medicine and Jewish Law Fred Rosner,1972 **The Jewish Law Annual** Bernard S. Jackson,1998-01-29 Most bioethicists concern themselves with common law when considering the mores that inform practitioners operating in the framework of medical institutions These questions are generally addressed from the perspective of secular ethics Many Jewish physicians however Contributors to this volume address medical issues such as organ transplantation physician s fees new reproductive technologies informed consent and medical confidentiality in the context of Jewish law Jewish thought is presented as of great relevance to both the history of medical ethics and contemporary medico legal issues The volume concludes with a chronicle of Jewish Law in the State of Israel and a survey of recent literature

Abortion in Judaism Daniel Schiff,2002-11-28 Publisher Description Organ Donation and the Divine Lien in Talmudic Law Madeline Kochen,2014-08-21 This book offers a new theory of property and distributive justice derived from Talmudic law illustrated by a case study involving the sale of organs for transplant Although organ donation did not exist in late antiquity this book posits a new way drawn from the Talmud to conceive of this modern means of giving to others Our common understanding of organ transfers as either a gift or sale is trapped in a dichotomy that is conceptually and philosophically limiting Drawing on Maussian gift theory this book suggests a different legal and cultural meaning for this property transfer It introduces the concept of the divine lien an obligation to others in need built into the definition of all property ownership Rather than a gift or sale organ transfer is shown to exemplify an owner s voluntary recognition and fulfillment of this latent property obligation

Smoking and Health Bulletin ,1974 *Hardness of Heart/hardness of Life* Larry Stephen Milner,2000 Infanticide is one of the most common yet least understood of all human crimes Although academic articles document isolated aspects of this problem a single unified analysis of infanticide has not been completed until now In *Hardness of Heart Hardness of Life* Larry Milner provides the first exhaustive survey of infanticide drawing on historical data from around the world He then uses this survey as a basis for investigating why infanticide has been present in every form of human society throughout history Both comprehensive and compelling this important study will intrigue students of human psychology social welfare and child abuse and will promote further research on this alarmingly overlooked atrocity

Theology and Bioethics E.E. Shelp,2013-04-17 We who live in this post modern late twentieth century culture are still children of dualism For a variety of rather complex reasons we continue to split apart and treat as radical opposites body and

spirit medicine and religion sacred and secular private and public love and justice men and women Though this is still our strong tendency we are beginning to discover both the futility and the harm of such dualistic splitting Peoples of many ancient cultures might smile at the belatedness of our discovery concerning the commonalities of medicine and religion A cursory glance back at ancient Egypt Samaria Babylonia Persia Greece and Rome would disclose a common thread the close union of religion and medicine Both were centrally concerned with healing health and wholeness The person was understood as a unity of body mind and spirit The priest and the physician frequently were combined in the same individual One of the important contributions of this significant volume of essays is the sustained attack upon dualism From a variety of vantage points virtually all of the authors unmask the varied manifestations of dualism in religion and medicine urging a more holistic approach Since the editor has provided an excellent summary of each article I shall not attempt to comment on specific contributions Rather I wish to highlight three 1 broad themes which I find notable for theological ethics *Bibliography on Smoking and Health* ,1972 **Smoking and Health** ,1976 *Medical and Health Care Books and Serials in Print* ,1986

Bibliography of the History of Medicine , **Reproduction by Design** Angus McLaren,2012-02-01 Modernity in interwar Europe frequently took the form of a preoccupation with mechanizing the natural fears and fantasies revolved around the notion that the boundaries between people and machines were collapsing Reproduction in particular became a battleground for those debating the merits of the modern world That debate continues today and to understand the history of our anxieties about modernity we can have no better guide than Angus McLaren In *Reproduction by Design* McLaren draws on novels plays science fiction and films of the 1920s and 30s as well as the work of biologists psychiatrists and sexologists to reveal surprisingly early debates on many of the same questions that shape the conversation today homosexuality recreational sex contraception abortion euthanasia sex change operations and in vitro fertilization Here McLaren brings together the experience and perception of modernity with sexuality technology and ecological concerns into a cogent discussion of science s place in reproduction in British and American cultural history **Jewish Guide to Practical Medical Decision-Making** Jason Weiner,2021-03-01 Due to the rapid advances in the medical field existing books on Jewish medical ethics are quickly becoming outdated and irrelevant Jewish Guide to Practical Medical Decision Making seeks to remedy that by presenting the most contemporary medical information and rabbinic rulings in an accessible user friendly manner Rabbi Weiner addresses a broad range of medical circumstances such as surrogacy and egg donation assisted suicide and end of life decision making Based on his extensive training and practical familiarity inside a major hospital Rabbi Weiner provides clear and concise guidance to facilitate complex decision making for the most common medical dilemmas that arise in contemporary society Smoking and Health: Health consequences, education, cessation activities, and governmental action, J.
