Janhunen, 2012 Mongolian is the principal language spoken by some five million ethnic Mongols living in Outer and Inner Mongolia as well as in adjacent parts of Russia and China The spoken language is divided into a number of mutually intelligible dialects while for writing two separate written languages are used Cyrillic Khalkha in Outer Mongolia the Republic of Mongolia and Written Mongol in Inner Mongolia P R China In this grammatical description the focus is on the standard varieties of the spoken language as used in broadcasting education and everyday casual speech The dialectology of the language and its background as a member of the Mongolic language family are also discussed Mongolian is an agglutinating language with a well developed suffixal morphology In the areal framework the language is a typical member of the trans Eurasian Ural Altaic complex with features such as vowel harmony verb final sentence structure and complex chains of non finite verbal phrases *Bibliography of Semiotics, 1975-1985*, 1986-01-01 This bibliography of semiotic studies covering the years 1975 1985 impressively reveals the world wide intensification in the field During this decade national semiotic societies have been founded allover the world a great number of international national and local semiotic conferences have taken place the number of periodicals and book series devoted to semiotics has increased as has the number of books and dissertations in the field This bibliography is the result of a dedicated effort to approach complete coverage *The Mongolic Languages* Juha Janhunen, 2006-01-27 Once the rulers of the largest land empire that has ever existed on earth the historical Mongols of Chinggis Khan left a linguistic heritage which today survives in the form of more than a dozen different languages collectively termed Mongolic For general linguistic theory the Mongolic languages offer interesting insights to problems of areal typology and structural change An understanding of the Mongolic language family is also a prerequisite for the study of Mongolian and Central Eurasian history and culture This volume is the first comprehensive treatment of the Mongolic languages in English written by an international team of specialists Mongolian Studies, 1995 **Nominalizations** Maria Koptjevskaja-Tamm, 2002-09-11 Based on extensive and diverse material from 70

languages and covering a range of previously undiscussed problems this book provides a thorough analysis of how nominalization types interact with other structural features It focuses on action nominal constructions and in particular the comparison of their syntactic structure with that of finite clauses and of other noun phrases a problem which has claimed much attention in current syntactic theories Supported by rich empirical material and clearly illustrated with examples from all the sample languages the book provides a detailed and consistent basis for constructing a typology of derived constructions and for presenting cross linguistic comparisons

Polymorphous Linguistics Salikoko Mufwene, Elaine J. Francis, Rebecca S. Wheeler, 2005-05-13 James McCawley 1938 1999 was one of the most significant linguists of the latter half of the twentieth century His legacy to a generation of linguists encompasses not only his work in phonology syntax semantics pragmatics and the philosophy of language but also his emphasis on bridging research in linguistics with that in other disciplines from anthropology and psychology to physics and biology This book written by his former students all now scholars in their own right pays tribute to McCawley by pursuing questions about language that engaged him during his career The variety of perspectives in these essays reflects McCawley s eclecticism as well his belief that what is important in scholarly work is not the analytic framework used but the insights reached The book considers topics in phonology syntax with several essays on Indic languages in which McCawley had a special interest as well as one on African American English tense aspect and mood semantics and pragmatics with essays in these areas grouped together to

reflect the intertwining of McCawley's work on these subjects knowledge of language and the treatment of language with its implicit colonial biases in the 11th edition of Encyclopedia Britannica **Causatives and Causation** Jae Jung

Song, 2014-06-11 Causatives and Causation is the first comprehensive study of causative constructions found in the world's languages. This important new research based on a data base of more than 600 languages not only investigates fully the richness and variety of causative types but also presents an alternative perspective to the traditional typological approach. The new typology enables a better understanding of how the human mind cognizes causation and how this is reflected in language. Causatives and Causation is also an important attempt to integrate language typology with diachrony by constructing a diachronic model of causative affixes on the basis of this new typology. Drawing on the theoretical insight of Role and Reference Grammar, this book provides a case study of the causative constructions in Korean providing additional support for both the proposed new typology and the diachronic model. It also examines the pragmatic foundations of causatives, an important but previously unexplored area of study. The Languages of the Soviet Union Bernard

Comrie, 1981-06-04 A general account of the languages of the Soviet Union, one of the most diverse multinational and multilingual states in the world as well as one of the most important. There are some 130 languages spoken in the USSR belonging to five main families and ranging from Russian which is the first language of about 130 000 000 people to Alut spoken only by 96 in the 1970 census. Dr. Comrie has two general aims. First he presents the most important structural features of these languages: their genetic relationships and classification and their distinctive typological features. Secondly he examines the social and political background to the use of functioning of the various languages in a multilingual state. The volume will be of importance and interest to linguists and to those with a broader professional interest in the Soviet Union.

Syntax of Some Nominal Constructions in Korean Sun Woo Lee, 1983 **Typological Studies** Guglielmo

Cinque, 2014-02-04 In this book Cinque takes a generative perspective on typological questions relating to word order and to the syntax of relative clauses. In particular Cinque looks at the position of the Head vis-à-vis the relative clause in relation to the position of the verb vis-à-vis his object: a general cross-linguistic analysis of correlatives, the need to distinguish a sentence grammar from a discourse grammar, type of non-restrictives with languages differing as to whether they possess both one or the other or neither, a selective type of extraction from relative clauses and a tentative sketch of a more ample work in progress on a unified analysis of externally headed, internally headed and headless relative clauses. *Argument Structure and*

Case, Word Order and Prominence Monique Lamers, Peter de Swart, 2011-10-20 Language users have access to
several sources of information during the build up of a meaningful construction These include grammatical rules situational
knowledge and general world knowledge A central role in this process is played by the argument structure of verbs which
establishes the syntactic and semantic relationships between arguments This book provides an overview of recent
psycholinguistic and theoretical investigations on the interplay between structural syntactic relations and role semantics The
focus herein lies on the interaction of case marking and word order with semantic prominence features such as animacy and
definiteness The interaction of these different sorts of information is addressed from theoretical time insensitive and
incremental perspectives or a combination of these Taking a broad cross linguistic perspective this book bridges the gap
between theoretical and psycholinguistic approaches to argument structure **Living on the Edge** Stefan
Ploch, 2011-09-27 This collection of papers by an international group of authors honors Jonathan Kaye's contributions to
phonology by expanding some of Kaye's ideas to a variety of theoretical topics and languages The set of ideas discussed or
used in this collection includes empty categories licensing relationships and constraints a restrictive two levelled approach to
phonology without rule ordering or constraint ranking a restrictive theory of syllabic representation without the codas
constituent and with exclusively binary branching theories of the phonology phonetics interface in which phonology is
motivated independently of phonetics and the metatheoretical flaws in a number of widely accepted but rarely questioned
