The Psychology of Prejudice Mark P. Zanna, James M. Olson, 2013-04-15. This volume consists of expanded and updated versions of papers presented at the Seventh Ontario Symposium on Personality and Social Psychology. The series is designed to bring together scholars from across North America who work in the same substantive area with the goals of identifying common concerns and integrating research findings. The topic of this symposium was the psychology of prejudice, and the presentations covered a wide variety of issues. The papers present state-of-the-art research programs addressing prejudice from the point of view of both the bigoted person as well as the victim of bigotry. The chapter authors confront this issue from two major and previously separate research traditions: the psychology of attitude and intergroup conflict. The chapters are organized in the following sequence of topics: the determinants and consequences of stereotypes, individual differences in prejudicial attitudes, intergroup relations, the responses of victims to prejudice and discrimination, and an integrative summary commentary. Illustrating both the diversity and vitality of research on the psychology of prejudice, the editors hope that this volume will stimulate further research and theorizing in this area.
