Negative Contexts Collocation Polarity And Multiple Negation:

Negative Contexts Ton van der Wouden,2002-11 Ton van der Wouden s account of negative contexts emphasizes pragmatic considerations as well as semantic and syntactic ones *Clitic and Affix Combinations* Lorie Heggie,Fernando Ordóñez,2005-01-01 In this volume the relationship between clitics and affixes and their combinatorial properties has led to a serious discussion of the interface between syntax morphology semantics and phonology that draws on a variety of theoretical perspectives e g HPSG Optimality Theory Minimalism Clitic affix phenomena provide a rich range of data not only for the identification of an affix vs clitic but also for the best way to explain ordering constraints some of which are contradictory A range of languages are considered including Romance and Slavic languages as well as Turkish Greek Icelandic Korean and Passamaquoddy Moreover several articles consider dialectal microparameterization notably in Spanish French and Occitan This volume thus reflects current debate on issues such as clitic ordering constraints the relationship of clitics to inalienable possession and the left periphery and templatic approaches to affixes vs clitics while examining a broad range of languages *Pronouns □ Grammar and Representation* Horst J. Simon,Heike Wiese,2002-09-27 The contributions of this thematic collection center around the typology of pronominal paradigms the generation of syntactic and semantic representations for constructions containing pronouns and the neurological underpinnings for linguistic distinctions that are relevant for the production and interpretation of these constructions They come from different theoretical approaches and methodological backgrounds and take into account data from a wide range of Indoeuropean and non Indoeuropean languages Bringing together a cross section of recent research on the grammar and representation of pronouns the volume offers a kaleidoscope of studies united by the common topic of pronouns as a domain of language that exemplarily shows the interaction of different components responsible for computational syntactic and semantic lexical and discourse pragmatic processes

Collocations in a Learner Corpus Nadja Nesselhauf,2005-01-27 Collocations are both pervasive in language and difficult for language learners even at an advanced level In this book these difficulties are for the first time comprehensively investigated On the basis of a learner corpus idiosyncratic collocation use by learners is uncovered the building material of learner collocations examined and the factors that contribute to the difficulty of certain groups of collocations identified An extensive discussion of the implications of the results for the foreign language classroom is also presented and the contentious issue of the relation of corpus linguistic research and language teaching is thus extended to learner corpus analysis *Negation in Gapping* Sophie Repp,2009-01-22 The first in depth investigation of gapping and negation shows accepted accounts do not explain differences across languages and available readings of the negation The author questions basic assumptions in the analysis of gapping and presents a new syntactic analysis with implications for the interpretation of scope and the theory of ellipsis *The History of Negation in the Languages of Europe and the Mediterranean* Anne Breitbarth,Christopher Lucas,David Willis,2020-03-13 This is the second book in a two volume

comparative history of negation in the languages of Europe and the Mediterranean The work integrates typological general and theoretical research documents patterns and directions of change in negation across languages and examines the linguistic and social factors that lie behind such changes The aim of both volumes is to set out an integrated framework for understanding the syntax of negation and how it changes While the first volume OUP 2013 presented linked case studies of particular languages and language groups this second volume constructs a holistic approach to explaining the patterns of historical change found in the languages of Europe and the Mediterranean over the last millennium It identifies typical developments found repeatedly in the histories of different languages and explores their origins as well as investigating the factors that determine whether change proceeds rapidly slowly or not at all Language internal factors such as the interaction of syntax semantics and pragmatics and the biases inherent in child language acquisition are investigated alongside language external factors such as imposition convergence and borrowing The book proposes an explicit formal account of language internal and contact induced change for both the expression of sentential negation not and negative indefinites anyone nothing It sheds light on the major ways in which negative systems develop on the nature of syntactic change and indeed on linguistic change more generally demonstrating the insights that large scale comparison of linguistic histories can offer

Collocations in Science Writing Christopher J. Gledhill,2000 **Expression and Interpretation of Negation**

Henriëtte de Swart,2010-05-03 This study in cross linguistic semantics deploys the framework of bi directional Optimality Theory to develop a typology of the relationship between syntax and semantics in negation markers and negation indefinites

Collocations and other lexical combinations in Spanish Sergi Torner Castells,Elisenda Bernal Gallen,2016-12-08

This edited collection presents the state of the art in research related to lexical combinations and their restrictions in Spanish from a variety of theoretical approaches ranging from Explanatory Combinatorial Lexicology to Distributed Morphology and Generative Lexicon Theory Section 1 offers a presentation of the main theoretical and descriptive approaches to collocation Section 2 explores collocation from the point of view of its lexicographical representation while Section 3 offers a pedagogical perspective Section 4 surveys current research on collocation in Catalan Galician and Basque Collocations and other lexical combinations in Spanish will be of interest to students of Hispanic linguistics The Fruits of Empirical

Linguistics: Product Sam Featherston,Susanne Winkler,2009 The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century This branch of linguistics broadly known as Generative Grammar is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the language organ The series comprises high quality monographs and collected volumes that address such issues The topics in this series range from phonology to semantics from syntax to information structure from mathematical linguistics to studies of the lexicon **Foundational approaches to Celtic linguistics**

Andrew Carnie,Diane Ohala,Dee Hunter,Samantha Prins,Mike Hammond,Luis A. Irizarry,2025-06-20 This book showcases

the latest research from the world's leading experts on Celtic linguistics. The 15 chapters span a variety of linguistic subdisciplines as well as theoretical and methodological perspectives. Together these articles highlight critical aspects of contemporary inquiry into the linguistic systems of Breton, Cornish, Irish, Manx, Scottish Gaelic, Welsh, and their ancestor languages. The volume is organized around four key sub-areas: 1. Syntax and Semantics, 2. Phonology and Phonetics, 3. Language Change, Historical Linguistics, and Grammaticalization, and 4. Sociolinguistics and Language Documentation. The volume's papers offer detailed investigations of current theoretical issues in Celtic syntax, semantics, phonology, and phonetics, as well as of language policy and ideology, language weaponization, and diachronic and synchronic language change. These state-of-the-art contributions represent the impressive diversity of the field of Celtic linguistics and emphasize the wide body of work being conducted in the language communities of the six Celtic nations.

Negation and Speculation Detection

Noa P. Cruz Díaz, Manuel J. Maña López, 2019-02-15. Negation and speculation detection is an emerging topic that has attracted the attention of many researchers and there is clearly a lack of relevant textbooks and survey texts. This book aims to define negation and speculation from a natural language processing perspective to explain the need for processing these phenomena, to summarise existing research on processing negation and speculation, to provide a list of resources and tools, and to speculate about future developments in this research area. An advantage of this book is that it will not only provide an overview of the state of the art in negation and speculation detection but will also introduce newly developed data sets and scripts. It will be useful for students of natural language processing subjects who are interested in understanding this task in more depth and for researchers with an interest in these phenomena in order to improve performance in other natural language processing tasks.

Grammatical Approaches to Language Processing Katy Carlson, Charles Clifton, Jr., Janet Dean Fodor, 2019-01-28. This book contains papers that were written to honor Professor Lyn Frazier on the occasion of her retirement from the University of Massachusetts Amherst. Some were presented at the Lynschrift on May 19-20, 2018; others were written especially for this volume. The papers report original research on or research-based theoretical analyses of several of the domains that Professor Frazier contributed to during her career. The volume begins with a brief overview of Professor Frazier's research contributions and an appreciation of the contributions she has made to the field of psycholinguistics and to her students and colleagues. The next several chapters discuss the roles that prosody plays in language processing, and the volume continues with chapters on the topic that established Professor Frazier as a major psycholinguistic theorist: syntactic processing. The volume then explores the roles semantics and pragmatics play in language comprehension and concludes with reports of applications and extensions of research on language processing. All chapters were contributed by current and former students and colleagues of Professor Frazier in gratitude for the impact she has had on their lives and careers.

Drawing the Boundaries of Meaning Betty J. Birner, Gregory Ward, 2006-11-29. One of the most lively and contentious issues in contemporary linguistic theory concerns the elusive boundary between semantics and

pragmatics and Professor Laurence R Horn of Yale University has been at the center of that debate ever since his groundbreaking 1972 UCLA dissertation This volume in honor of Horn brings together the best of current work at the semantics pragmatics boundary from a neo Gricean perspective Featuring the contributions of 22 leading researchers it includes papers on implicature Kent Bach inference Betty Birner presupposition Barbara Abbott lexical semantics Georgia Green Sally McConnell Ginet Steve Kleinedler Randall Eggert negation Pauline Jacobson Frederick Newmeyer Scott Schwenter polarity Donka Farkas Anastasia Giannakidou Michael Israel implicit variables Greg Carlson Gianluca Storto definiteness Barbara Partee reference Ellen Prince Andrew Kehler Gregory Ward and logic Jerrold Sadock Francis Jeffrey Pelletier Andrew Hartline These original papers represent not only a fitting homage to Larry Horn but also an important contribution to semantic and pragmatic theory

Adverbs of Degree in Dutch and Related Languages Henny Klein, 1998

Adverbs of degree form an intriguing part of the lexicon numerous multiform and everchanging They also show a great variety in distribution In this study the characteristics of adverbs of degree are investigated from a semantic point of view The main focus is on Dutch but previous studies about English and German adverbs of degree are used to compare with and to build on The book starts with an introduction on grading and gradability and a classification of the adverbs according to the degree they express Next the different lexical sources from which the adverbs emerge and the process of grammaticalization are discussed The main part of the book is devoted to semantic restrictions on the use of adverbs of degree on the one hand restrictions concerning the modified elements on the other hand those concerning the environment Topics include absoluteness versus gradability positive versus negative evaluation the strengthening of negation polarity sensitivity the logical properties of the adverbs themselves and restrictions to reduplication and stacking Besides the main text three case studies are presented in which the peculiarities of some of the adverbs are investigated in depth to show more in detail to complexities of their distribution The appendix gives an overview of Dutch adverbs of degree

Micro-Syntactic Variation in North American English Raffaella Zanuttini, Laurence Horn, 2014-06-11

By comparing linguistic varieties that are quite similar overall linguists can often determine where and how grammatical systems differ and how they change over time Micro Syntactic Variation in North American English provides a systematic look at minimal differences in the syntax of varieties of English spoken in North America The book makes available for the first time a range of data on unfamiliar constructions drawn from several regional and social dialects data whose distribution and grammatical properties shed light on the varieties under examination and on the properties of English syntax more generally The nine contributions collected in this volume fall under a number of overlapping topics variation in the expression of negation and modality the so don't I construction in eastern New England negative auxiliary inversion in declaratives in African American and southern white English multiple modals in southern speech the needs washed construction in the Pittsburgh area pronouns and reflexives transitive expletives in Appalachia personal dative constructions in the Southern Mountain states

long distance reflexives in the Minnesota Iron Range and the relation between linguistic variation and language change the rise of drama SO among younger speakers the difficulty in establishing which phenomena cluster together and should be explained by a single point of parametric variation These chapters delve into the syntactic analysis of individual phenomena and the editors introduction and afterword contextualize the issues and explore their semantic pragmatic and sociolinguistic implications

Multidimensional Semantics of Evaluative Adverbs Mingya Liu, 2012-11-20 Multidimensional Semantics of Evaluative Adverbs provides a multidimensional analysis for the lexical semantics of evaluative adverbs nonfactive evaluative adverbs trigger a conventional implicature whereas factive evaluative adverbs not only trigger a conventional implicature but also a conventional presupposition This analysis proves to be more advantageous than existing analysis in terms of empirical coverage and explanatory power With the case of evaluative adverbs the book demonstrates how secondary meanings e g conventional presuppositions conventional implicatures interact with primary meanings i e main assertion or at issue content For the first time a three dimensional formal language of conventional implicatures and conventional presuppositions is implemented and applied to derive the right truth conditions of sentences with evaluative adverbs and predict their projection behaviors With a cross linguistic perspective focusing on German English and Mandarin Chinese and using corpus and psycholinguistic methods the book also offers new perspectives on the syntax semantics pragmatics of adverbials

The Handbook of Pragmatics Laurence Horn, Gergory Ward, 2008-04-15 The Handbook of Pragmatics is a collection of newly commissioned articles that provide an authoritative and accessible introduction to the field including an overview of the foundations of pragmatic theory and a detailed examination of the rich and varied theoretical and empirical subdomains of pragmatics Contains 32 newly commissioned articles that outline the central themes and challenges for current research in the field of linguistic pragmatics Provides authoritative and accessible introduction to the field and a detailed examination of the varied theoretical and empirical subdomains of pragmatics Includes extensive bibliography that serves as a research tool for those working in pragmatics and allied fields in linguistics philosophy and cognitive science Valuable resource for both students and professional researchers investigating the properties of meaning reference and context in natural language

Theoretical and Crosslinguistic Approaches to the Semantics of Aspect Susan D. Rothstein, 2008-03-20 The papers in this volume investigate the semantics of aspect from both a theoretical and a crosslinguistic point of view in a wide range of languages from a number of different language families The papers are all informed by the belief that a thorough exposure to the expression of aspect crosslinguistically is crucial for progress in understanding how the semantics of aspect works and what the semantic basis of aspectual distinctions is The languages discussed include Russian English Dutch Hebrew Mandarin Japanese and Kalaallisut The issues discussed in this volume include the centrality of measuring and counting in an understanding of telicity the importance of the singular plural distinction in the study of aspect the importance of homogeneity as a property of event types the flexibility of lexical classes and the interaction between expressions of aspect

and the particular morphosyntactic structure of a language *The History of Low German Negation* Anne Breitbarth, 2014
This book examines the diachronic development of negation in Low German from Old Saxon to Middle Low German. It is the first substantial diachronic analysis of these changes and looks at both the development of standard negation and the changing interaction between the expression of negation and indefinites in its scope.
