MacDonald, 2013-12-01 This book is drawn from Haida Monumental Art the most important work yet published on Haida culture Chiefs of the Sea and Sky presents an overview of extensive research carried out by archeologist George MacDonald in the 1960s and 1970s to document the history of the Haida villages of the Queen Charlotte Islands In this abridgement MacDonald recounts the history of eighteen of the major villages telling the story of their people and describing the sites of their houses and other known structures In his introduction he explains how the Haida s immense cedar houses and totem poles are part of a fascinating spiritual and material culture which integrates family history ritual and mythology The historical photographs that accompany the text illustrate the richness and variety of Haida sculpture and they show the villages at the height of their glory in the 1880s and 1890s and in their subsequent and tragic decay MacDonald reports on the further deterioration of several of the sites since publication of Haida Monumental Art in 1983 but he also praises the successful efforts of the Haida and their supporters and the cooperation of the Government of Canada in establishing protection over important heritage sites in the Southern Queen Charlotte Islands He sees in this and in the accomplishments of contemporary Haida artists an indication that the future of Haida culture looks immensely brighter towards the close of the century than it did at the beginning Chiefs of the Sea and Sky will be welcomed by those interested in the history of Canada s Native people and by visitors to the heritage sites of the Queen Charlotte Islands *Indigenous Rights in Modern Landscapes* Lars Elenius, Christina Allard, Camilla Sandström, 2016-11-10 This book examines the diverse use of Indigenous customary rights in modern landscapes from a multidisciplinary perspective Divided into two parts the first deals explicitly with S mi customary rights in relation to nature conservation in the Nordic countries and Russia from a legal and historical perspective The authors investigate how longstanding S mi customary territorial rights have been reassessed in the context of new kinds of legislation regarding Indigenous people They also look at the ideas behind the historical models of nature conservation The second part deals with the ideas and implementation of new kinds of postcolonial models of nature conservation The case of the S mi is compared with other Indigenous people internationally with cases from Australia New Zealand Canada and India The work investigates how the governance of protected areas has been influenced by the principles of equality and positive discrimination and how it has affected the possibilities of establishing adaptive co management arrangements for specific areas How the legal situation of Indigenous peoples has been recognised in an international context is also investigated The volume provides a multidisciplinary analysis of how the customary livelihood of

A Complex Culture of the British Columbia Plateau Brian Hayden, 2007-11-01 Early hunter gatherer societies have traditionally been considered basically egalitarian in nature This assumption however has been challenged by contemporary archaeological and anthropological research which has demonstrated that many of these societies had complex social economic and political structures This volume considers two British Columbia Native communities the Lillooet and Shuswap communities of Fountain and Pavilion and traces their development into complex societies The authors explore the relation between resource characteristics and hunter gatherer adaptations and examine the use of fish animal and plant species documenting their availability and the techniques used in their gathering processing and storing The book also shows how cultural practices such as raiding potlatching and stewardship of resources can be explained from a cultural ecological point of view An important contribution to the study of hunting and gathering cultures in the Northwest this book is the most detailed examination of the subsistence base of a particular hunting and gathering group to date Its exploration of the reasons why complex hunting and gathering societies emerge as well as the ecological relationships between cultures and resources will make an important contribution to the study of cultural ecology and contemporary archaeology
