Old Age In European Society:

Old Age in European Society Peter N. Stearns, 2024-05-10 Originally published in 1977 *Old Age in European Society* provides an historical perspective on aging a process which had received little attention from any group in the social sciences and virtually none from historians at the time Starting from the premise that the elderly can and should be active participant members of their society the book examines the ways in which old people were and are viewed by certain key groups This is done in a series of thematic essays linked by the main theme of a dominant culture in which the elderly and the groups who deal with them were and still are ensnared This dominant culture is one of denigration of the elderly the traditional idea of veneration of the elderly is found to be largely mythical Variations on this theme are dealt with in individual chapters concerned with the elderly in French working class culture and geriatric medicine Key groups are studied with an eye to distinct patterns of modernization which involves particular attention to the working class and middle class as those exposed to the leading edge of change Women are treated separately as their aging process involves distinctive elements which exacerbate the problems of old age France with its exceptional percentage of elderly and its low retirement ages provides much of the material for these essays the main purpose of which is to indicate those topics for which an historical treatment is vital to our understanding of the elderly and to the formulation of a more positive approach to old age *Aging in European Societies* Constantinos Phellas, 2012-09-28 Between longer life expectancies and declining birth rates Europe's elder population is growing into a sizable minority with considerable impact on nations health systems and economies in other words global implications as well as local and regional ones Those investing in the health of older adults need a double perspective the social and clinical complexity of aging and the larger forces shaping these experiences *Aging in European Societies* examines aging trends across the continent analyzing individual and collective variables that affect the lives of older adults and drawing salient comparisons with other parts of the world An interdisciplinary panel of experts provides theory research and empirical findings with examples from the UK Cyprus Sweden and others in key areas such as family and social supports physical and cognitive changes dependence and autonomy issues and living arrangements The book's wide net approach offers insights into not only aging but aging well And of particular importance it details approaches to defining and measuring the elusive but crucial concept quality of life Included in the coverage The potential for technology to improve elders quality of life Dementia and quality of life issues Changes in functional ability with aging and over time Family networks and supports in older age Factors influencing inequalities in quality of life Late life learning in the E U Gerontologists sociologists health and cross cultural psychologists and public health policymakers will welcome *Aging in European Societies* as a springboard toward continued discussion new directions for research and improvements in policy and practice *Ageing and the Care of Older People in Europe* Richard Hugman, 1994-08-23 As the population of all European countries ages rapidly understanding the phenomenon of ageing and social responses to old age has become a vital

contemporary issue The diverse ways in which old age is seen across Europe are compared and different forms of care for the needs of older people are examined With the demise of large institutions and increasing demands on families and on domiciliary care the question of inter generational relations is seen as a key element in the future of old age It is argued that much is to be learned from cross national comparisons in developing social responses to old age **European Societies** Mau, Steffen, Verwiebe, Roland, 2010-10-08 This title looks at the European model in historical perspective commonalities and intra European exchange and characteristics of the European social structure **Handbook of European History**

Victor, 2013-11-11 Old age is a part of the lifecycle about which

there are numerous myths and stereotypes To present an overstatement of commonly held beliefs the old are portrayed as dependent individuals characterized by a lack of social autonomy unloved and neglected by both their immediate family and friends and posing a threat to the living standards of younger age groups by being a burden that consumes without producing Older people are perceived as a single homogeneous group and the experiment of ageing characterized as being the same for all individuals irrespective of the diversity of their circumstances before the onset of old age In this book detailed statistical material is used to portray the circumstances of older people in modern society in an attempt to evaluate the appropriateness or otherwise of the major stereotypes of later life This volume does not address ageing from a psychological or micro social perspective In particular we do not explore major issues relating to old age Rather we feel that from the extensive collection of surveys concerned with the elderly we can provide a context within which individual elderly people can be studied from more anthropological or biographical perspectives

Global Ageing in the Twenty-First Century Zachary Zimmer, 2016-04-22 Population ageing a growth in the proportion of a population that is in older age is now occurring in every region and nearly every country of the world Indeed the growth of older populations is among the important global phenomena of the twenty first century It poses both opportunities and challenges for societies and policy makers but these are far from uniform worldwide Dynamic factors are at work impacting on how ageing will influence people places and policies and there are large variations in the rate and timing of population ageing across countries owing to differing social health and economic circumstances and a variety of policy options from which to choose Given this variation in the context of global ageing as a backdrop this edited book focuses on three overarching themes that are among the most critical to understand if societies are to age successfully in the twenty first century and beyond Healthy ageing and health care the ageing workforce retirement and the provision of pensions shifting intergenerational relations These three themes are cross cut by other dimensions that are intertwined with the dynamic processes of ageing such as immigration emigration contrasting policy regimes and global and national economic forces This ground breaking book will be of interest to all scholars students and policy makers working within this area of study
