Classen, 2016-04-11 Death is not only the final moment of life; it also casts a huge shadow on human society at large. People throughout time have had to cope with death as an existential experience, and this also of course in the premodern world. The contributors to the present volume examine the material and spiritual conditions of the culture of death, studying specific buildings and spaces, literary works and art objects, theatrical performances and medical tracts from the early Middle Ages to the late eighteenth century. Death has always evoked fear, terror and awe; it has puzzled and troubled people, forcing theologians and philosophers to respond and provide answers for questions that seem to evade real explanations. The more we learn about the culture of death, the more we can comprehend the culture of life. As this volume demonstrates, the approaches to death varied widely also in the Middle Ages and the early modern age. This volume hence adds a significant number of new facets to the critical examination of this ever-present phenomenon of death, exploring poetic responses to the Black Death, types of execution of a female murderess, death as the springboard for major political changes and death reflected in morality plays and art. The Handmaid's Tale Janis Goldie, Karen A. Ritzenhoff, 2019-06-06

The Handmaid's Tale: Teaching Dystopia, Feminism and Resistance across Disciplines and Borders offers an interdisciplinary analysis of how Margaret Atwood's *The Handmaid's Tale*, as well as its film and television adaptations, can be employed across different academic fields in high school, college and university classrooms. Scholars from a variety of disciplines and cultural contexts contribute to wide-ranging analytical strategies ranging from religion and science to the role of journalism in democracy, while still embracing gender studies in a broader methodological and theoretical framework. The volume examines both the formal and stylistic ways in which Atwood's classic work and its adaptations can be brought to life in the classroom through different lenses and pedagogies. Our Old Monsters Brenda S. Gardenour Walter, 2015-07-11 The witch the vampire and the werewolf endure in modern horror These old monsters have their origins in Aristotle as studied in the universities of medieval Europe where Christian scholars reconciled works of natural philosophy and medicine with theological precepts They codified divine perfection as warm light male and associated with the ethereal world beyond the moon while evil imperfection was cold dark female and bound to the corrupt world below the moon All who did not conform to divine goodness including un holy women and Jews were considered evil and ascribed a melancholic blood hungry and demonic physiology This construct was the basis for anti woman and anti Jewish discourse that has persisted through modern Western culture Nowhere is this more evident than in horror films where the witch the vampire and the werewolf represent our fear of the inverted other

Gentile Tales Miri Rubin, 2004-05-03 During the late medieval period accusations that Jews had abused Christ by desecrating the Eucharist created a powerful anti Jewish movement and violent clashes quickly spread throughout Europe

Fash, 2020-03-31

Accounts of the rise of American literature often start in the 1850s with a cluster of great American novels Hawthorne s *The Scarlet Letter* Melville s *Moby Dick* and Stowe s *Uncle Tom s Cabin* But these great works did not spring fully formed from the heads of their creators All three relied on conventions of short fiction built up during the culture of beginnings the three decades following the War of 1812 when public figures glorified the American past and called for a patriotic national literature Decentering the novel as the favored form of early nineteenth century national literature Lydia Fash repositions the sketch and the tale at the center of accounts of American literary history revealing how cultural forces shaped short fiction that was subsequently mined for these celebrated midcentury novels and for the first novel published by an African American In the shorter works of writers such as Washington Irving Catharine Sedgwick Edgar Allan Poe and Lydia Maria Child among others the aesthetic of brevity enabled the beginning idea of a story to take the outsized importance fitted to the culture of beginnings Fash argues that these short forms with their ethnic exclusions and narrative innovations coached readers on how to think about the United States past and the nature of narrative time itself Combining history print history and literary criticism this book treats short fiction as a vital site for debate over what it meant to be American thereby offering a new account of the birth of a self consciously national literary tradition
