An Inside Out Revelation David R Cotterill, 2023-11-02 Humanity is in trouble and it s not looking good for our future The way we use our minds has caused untold damage through personal anxiety national disruption and the threat of global annihilation This book reveals how we innocently misuse our thinking to create emotional and behavioural instability and how to interrupt dysfunctional patterns and experience a higher quality of thought We explore how present day spiritually based psychology is re aligning with ancient biblical principles providing an opportunity for everyone to participate in change from the inside out Unboxing this ancient wisdom reveals that there has always been two conflicting routes to enlightenment operating in our world both promising a life beyond the material realm so discernment is required and this is where the renewed mind will be our guide To understand the source of these routes and the invisible forces behind them we journey back to the very dawn of the human era to the first moment humans were offered the choice between spiritual life or death Back then we made the wrong choice resulting in spiritual isolation and the need to develop a mind suited to self survival but the way is still open for redemption and the choice of life or death for all humanity is one for the ages We each have freedom to choose It s not too late for renewal of the mind and the heart and the soul of humanity

Inside-Out Smanu, 2014-08-21 This book is a speck of fire from mans inherent quest to be at a perfect self contented oneness with nature Todays rat race towards technological development might have thrusting man to lack awareness of that quest Infact the human journey and conditioning itself has an inherent character of making him lack awareness of his pristine aspects This book is a humble effort in reminding man of his own quest in facilitating him to get in touch with the truth long suppressed and forgotten The growing imbalance in the society is finding its expression not merely as the materialistic gap between haves and have nots but also in the form of Kundalini Consciousness Awakening in more and more people The spiritual deficit of the human collective is manifesting as spiritual burden on some We know the many scientific laws of

conservation don't we Among other things the book propounds a possibility that our incapacity to comprehend God might be the limitation of human evolution as of now As much as the book talks about God Spirituality and Mysticism the book is more an effort in questioning the sufficiency of science for current needs of human evolution Time has come for man to expand his horizons not through Technology but by regaining his roots of spiritual strength and in the process expand the horizons of science No development can be linear and no one instrument can prove self sufficient for human evolution In that sense Science has reached its threshold Yet Science with Heart is waiting to be discovered and explored through the reinstatement of Trinity and Balance in the world This book might not contain any new spiritual talk or wisdom for the spiritually inclined But it might make a very interesting read for those who are not spiritually inclined yet And when we realize that the term spiritually inclined is a misnomer for we are the spirit the purpose behind this book would have been fulfilled **Inside Out**

Dana Xavier Kerola, 2009-05-27 This work is a new look at the age old philosophical question of the mind body duality The author adeptly demonstrates that there is not really any conflict in the two seemingly opposing views When it is realized that the universe is governed purely by physical laws the supposed dichotomy dissolves Inspired by his long running exploration of the panorama of pop music the author blends in references to song lyrics as he explains the ways in which the lives of human beings are inextricably tied to the larger precedent world of planets stars and galaxies His personal reflections on reality include topics ranging from the epistemology of satellite remote sensing to fundamental discussions of anthropology astronomy and atmospheric science He also offers thoughtful commentary on our quest to continue present and future space exploration as he forecasts what will become of the universe and us in the very distant future **Looking for Ourselves in Time and Space** will appeal to both the general reader and research scientists alike **Comprehension**
