Pruritus In Advanced Disease:

Pruritus in Advanced Disease Zbigniew Zylicz, Robert G. Twycross, E. Anthony Jones, 2004 Pruritus is a prevalent symptom in many skin conditions. However, much less is known about pruritus unassociated with primary skin disease. This latter problem is of major relevance to most medical specialties notably palliative care, haematology, oncology, internal medicine, hepatology, nephrology, anaesthesiology, immunology, and psychiatry. Specialists in these non-dermatological disciplines each see a few patients with severe pruritus and therefore have only limited possibility to learn from their personal experience. In response to the need for information on pruritus in non-dermatological disciplines, this book aims to build a bridge of relevant knowledge and evidence between the various non-dermatological specialties. Pruritus can cause considerable discomfort in patients with cancer, patients receiving treatment for cancer, and patients with non-malignant terminal illnesses. Some knowledge about the pathophysiology of certain types of pruritus exists in different clinical specialties. This book brings this information together in a readily accessible compendium of knowledge which will be of value to physicians in all specialties. An international group of contributors cover the neurophysiology and clinical assessment of pruritus, the measurement of scratching activity, as well as opioid-induced pruritus, pruritus in haematological disorders, neuropathic pruritus, and psychogenic pruritus, and the treatment of pruritus in these different clinical settings. *Pruritus, An Issue of Dermatologic Clinics* Gil Yosipovitch, 2018-06-23 This issue of *Dermatologic Clinics*, guest edited by Dr Gil Yosipovitch, is devoted to pruritus. Articles in this issue include: Pathophysiology of Chronic Itch, Work up of Chronic Itchy Patient, Management of Prurigo Nodularis, Chronic Pruritus in the Geriatric Population, Diagnosis and Management of Neuropathic Itch, Female Genital Itch, End Stage Renal Disease, Chronic Itch and its Management, Management of Chronic Hepatic Itch, Pruritus in Scabies, Pruritus Associated with Targeted Cancer Therapies and Their Management, Pruritus in Lymphoma and its Management, Pruritus in Pregnancy and its Management, Pruritus in Connective Tissue Disorders, Immunomodulating Agents as Anti-Pruritics, Psychogenic Pruritus and its Management, and Drugs on the Horizon for Chronic Itch. **Treatise on Diseases of the Skin for the Use of Advanced Students and Practitioners** Henry Weightman Stelwagon, 1903 **Textbook of Palliative Medicine and Supportive Care** Eduardo Bruera, Irene J. Cholestatic Liver Diseases: Therapeutic Options and Perspectives U. Leuschner, U. Broomé, A. Stiehl, 2004-06-30

During the last decade knowledge about cholestatic liver disease and concomitant diseases such as ulcerative colitis, cholangio and hepatocellular carcinoma, pancreas and colon cancer has increased considerably. Studies on ursodeoxycholic acid treatment alone or in combination with immunosuppressive compounds and their positive effects on biliary liver disease as well as on so called overlap syndromes or intestinal tumors are published in increasing numbers and stimulate discussion on whether or not ursodeoxycholic acid is able to improve the general condition and or life expectancy of patients. On the other hand genetics, aetiological and pathogenetic aspects are still difficult to comprehend but are the absolute prerequisite for the development of better treatment options. This book is the proceedings of Falk Symposium No 136 Part I of the XII Falk Liver Week held in Freiburg Germany on October 15-16 2003 and contains stimulating, exciting and controversial papers on clinical and also basic research at the highest scientific level.
