*Weapons of the Lewis and Clark Expedition* James B. Garry,2012-09-28 When Meriwether Lewis began shopping for supplies and firearms to take on the Corps of Discovery's journey west his first stop was a federal arsenal For the following twenty nine months from the time the Lewis and Clark expedition left Camp Dubois with a cannon salute in 1804 until it announced its return from the West Coast to St Louis with a volley in 1806 weapons were a crucial component of the participants tool kit In *Weapons of the Lewis and Clark Expedition* historian Jim Garry describes the arms and ammunition the expedition carried and the use and care those weapons received The Corps of Discovery's purposes were to explore the Missouri and Columbia river basins to make scientific observations and to contact the tribes along the way for both science and diplomacy Throughout the trek the travelers used their guns to procure food they could consume around 350 pounds of meat a day and to protect themselves from dangerous animals Firearms were also invaluable in encounters with Indian groups as guns were one of the most sought after trade items in the West As Garry notes the explorers willingness to demonstrate their weapons firepower probably kept meetings with some tribes from becoming violent The mix of arms carried by the expedition extended beyond rifles and muskets to include pistols knives espontoons a cannon and blunderbusses Each chapter focuses on one of the major types of weapons and weaves accounts from the expedition journals with the author's knowledge gained from field testing the muskets and rifles he describes Appendices tally the weapons carried and explain how the expedition's flintlocks worked *Weapons of the Lewis and Clark Expedition* integrates original research with a lively narrative This encyclopedic reference will be invaluable to historians and weaponry aficionados

Biersteker,Peter J. Spiro,Chandra Lekha Sriram,Veronica I. Raffo,2006-10-19 This unique volume examines the opportunities for and initiates work in interdisciplinary research between the fields of international law and international relations disciplines that have engaged little with one another since the Second World War Written by leading experts in the fields of international law and international relations it argues that such interdisciplinary research is central to the creation of a knowledge base among IR scholars and lawyers for the effective analysis and governance of macro and micro phenomena International law is at the heart of international relations but due to challenges of codification and enforceability its apparent impact has been predominantly limited to commercial and civil arrangements International lawyers have been saying for years that law matters in international affairs and now current events are proving them right International Law and International Relations makes a powerful contribution to the theory and practice of global security by initiating a research agenda building an empirical base and offering a multidisciplinary approach that provides concrete answers to real world problems of governance This book will be of great interest to all students of international law international relations and governance      *American Rifleman* ,1929
