Human Rights as a panacea or desired urgent solution to racial justice abuse of human life and human rights Dissertation Series Philosophy Philosophie Vol 108 Subject African Studies Human Rights Studies Philosophy Christian Studies Thomas Aquinas *The Political Theory of Conservative Economists* Conrad P. Waligorski, 2021-10-08 It is difficult to overstate the impact of conservative economics on American life. The conservative thought of economists like Milton Friedman, James Buchanan, and Friedrich Hayek has provided the conceptual framework that undergirds nearly every aspect of current U.S. social economic policy. Although a great deal has been written about the economic theories of these Nobel Prize winning economists, this study is the first to examine the political theory that underlies conservative economics and its implications for public policy. Long associated with the Chicago and public choice schools of thought, Friedman, Buchanan, Hayek, and others have consistently repudiated Keynesian principles. They have steadfastly opposed social welfare policies and regulation of private enterprise, championing instead the free market as a mechanism for ordering society. In this book, Conrad Waligorski analyzes the political content of the conservative economists' arguments. In so doing, he illuminates the political, economic, and philosophical ideas behind and justification for the laissez faire policy, the reduced regulation, intervention, and welfare favored by conservative governments in the United States, Canada, and Britain. **Communication, Culture, and Human Rights in Africa** Bala A. Musa, Jerry Komia Domatob, 2012-07-10 Communication Culture and Human Rights in Africa provides a comprehensive and interdisciplinary analysis of the interface between human rights and civil society, the media, gender, education, religion, health, communication, and political processes in sub-Saharan Africa. It weaves theory, history, policy, and case analyses into a holistic intellectual and cultural critique while offering insightful practical solutions. *Ethics: Theory and Practice* Y. V. Satyanarayana, 2009 Ethics is a part of philosophy that is concerned with living well and choosing the right course of action. The choice of the course of action is based on moral reasoning, and there is no single moral theory on which we can base the choices that we make. The application of moral standards in life is also the concern of Ethics Theory and Practice, which deals with moral theories in Indian and Western philosophical traditions as well as the debates that centre around their application. The book has ten chapters: the first chapter presents what morality and moral reasoning is; the second chapter is a critical survey of some popular concepts of Indian ethics; the third chapter surveys Western moral theories; and the remaining seven chapters cover a variety of contemporary moral issues that are controversial as well as inescapable. They deal with issues like capital punishment, civil disobedience, euthanasia, and women's rights. American Law from a Catholic Perspective Ronald J. Rychlak, 2015-03-11 Edited by Ronald J. Reason, Religion, and Natural Law Jonathan A. Jacobs, 2012-11-08 This edited volume examines the ways in which theological considerations have figured in natural law theorizing from Plato to Spinoza Theological considerations have long had a pronounced role in Catholic natural law theories but have not been seriously examined from a wider perspective The contributors to this volume take a more inclusive view of the relation between conceptions of natural law and theistic claims and principles They do not jointly defend one particular thematic claim but articulate diverse ways in which natural law has both been understood and related to theistic claims In addition to exploring Plato and the Stoics the volume also looks at medieval Jewish thought the thought of Aquinas Scotus and Ockham and the ways in which Spinoza's thought includes resonances of earlier views and intimations of later developments Taken as a whole these essays enlarge the scope of the discussion of natural law through study of how the naturalness of natural law has often been related to theses about the divine The latter are often crucial elements of natural law theorizing having an integral role in accounting for the metaethical status and ethical bindingness of natural law At the same time the question of the relation between natural law and God and the relation between natural law and divine command has been addressed in a multiplicity of ways by key figures throughout the history of natural law theorizing and these essays accord them the explanatory significance they deserve
