*Ethics and Human Genetics* Dorothy C. Wertz, John C. Fletcher, 2012-12-06 Based in part on a survey of ethical decision making among 682 medical geneticists worldwide this book includes a chapter authored by a geneticist and an ethicist in 19 nations describing genetic services counselling screening prenatal diagnosis and major ethical problems and social controversies faced by geneticists The concluding chapter describes ethical and policy issues that exist worldwide and offers some possible resolutions

**Pilgrims in Medicine: Conscience, Legalism and Human Rights** Thomas Alured Faunce, 2005-01-01 This arrestingly novel work develops a normative synthesis of medical humanities virtue ethics medical ethics health law and human rights It presents an ambitious complex and coherent argument for the reconceptualisation of the doctor patient relationship and its regulation utilising approaches often thought of as being separate if not opposed virtue based ethics and universal human rights The case is argued gracefully with moderation but also with respect for opposing positions The book's analysis of the foundational professional virtue of therapeutic loyalty is an original departure from the traditional discourse of patient autonomy and the ethical and legal duties of the medical practitioner The central argument is not merely presented as bookends in the introduction and conclusion It is cogently represented in each chapter and section and measured against the material considered A remarkable feature is the use of aptly selected canonical literature to inform the argument These references run from Hesse's *The Glass Bead Game* in the abstract to Joyce's *Ulysses* in the conclusion They include excerpts from and discussion about Bergman Borges Boswell Tolstoy de Beauvoir Chekhov Dostoevsky Samuel Johnson Aristotle Orwell Osler Chaucer Schweitzer Shakespeare Thorwalds Kafka and William Carlos Williams Such references are used not merely as an artistic and decorative leitmotif but become a critical narrative element and another complex and rich layer to this work The breadth and quality of the references are testimony to the author's clear understanding of the modern law and literature movement This work provides the basis of a medical school course As many medical educators as possible should also be encouraged to read this work for the insights it will give them into using their own personal life narratives and those of their patients to inform their decision making process This thesis will also be of value to the judiciary whose members are often called upon to make normatively difficult judgments about medical care and medical rules The human rights material leads to a hopeful view of an international movement toward a universal synthesis between medical ethics and human rights in all doctor patient relationships

**The Convergence of the Fundamental Rights Protection in Europe** Rainer Arnold, 2016-04-05 The book gives insight into the structures and developments of the fundamental rights protection in Europe which is effective at the levels of the national Constitutions the European Convention of Human Rights and for the EU member States of the EU Fundamental Rights Charter The contributions of renowned academics from various European countries demonstrate the functional interconnection of these protection systems which result in an increasing convergence Basic questions are reflected such as human dignity as foundation of

fundamental rights or positive action as a specific form of equality as well as the concept of rights convergence In this latter contribution the forms of direct reception of a different legal order and of the functional transfer of principles and concepts are analyzed Particular reference is made to the EU Charter the United Kingdom Human Rights Act as well as to France and Germany It becomes obvious how important interpretation is for the harmonization of national and conventional fundamental rights protection Traditional institutional approaches like the dualist transformation concept in Germany are functionally set aside in the harmonization process through constitutional interpretation Specific studies are dedicated to the field of the EU Fundamental Rights Charter and to the European impacts on the national fundamental rights protection in selected countries such as the new democracies Poland Romania and Kosovo as well as more traditional systems such as Spain Italy the Nordic countries or Turkey

*Today's Priorities in Mental Health* S.H. Fine, R. Knell, T.Y. Lin, 2012-12-06 Two themes seem to emerge repeatedly when reading through this volume One is consensus and the other is search There was a strong consensus during the Congress that children and families were the major and foremost concern of all present regardless of their geographic origin or professional background This concern was often expressed in terms of commitment to or as goal for the international mental health movement for the years to come The second theme search represents an effort to translate this concern into activities search for concrete immediate goals for ways and means of translating into actual programs and projects for interested people to carry on the work and better ways to train them to do the work well for ways to obtain support and lastly search for ways of coordinating efforts of people in different parts of the world All these and other matters are taken up in the discussions in this volume The complexity of problems encountered in a rapidly changing world and the diversity of resources available in different parts of the world make the task of searching difficult and sometimes confusing In spite of the earnest efforts made the results may be inconclusive and some of those proposed can be regarded only as hypotheses or ideas for experimentation
