**How to Read Chinese Prose in Chinese** Zong-qi Cai, Jie Cui, Liu Yucai, 2022-01-18 This book is at once a guided introduction to Chinese nonfictional prose and an innovative textbook for the study of classical Chinese. It is a companion volume to *How to Read Chinese Prose: A Guided Anthology* designed for Chinese language learners. *How to Read Chinese Prose in Chinese* presents more than forty prose works either excerpts or in full from antiquity through the Qing dynasty. While teaching readers how to appreciate the rich tradition of Chinese prose in its original form, the book uses these texts to introduce classical Chinese to advanced learners, helping them develop reading comprehension and vocabulary. It offers a systematic guide to classical Chinese grammar and abundant notes on vocabulary and features an extensive network of notes, exercises, and cross references. The book includes modern translations of the forty prose works in simplified Chinese presented alongside the original texts in traditional Chinese. It also includes expert commentaries on each text's distinctive aesthetic qualities as well as historical and cultural contexts. The book comprises thirty-eight lessons within eight units organized chronologically to reflect the emergence of major prose genres. It is a major contribution to the teaching and study of classical Chinese language and literature. Audio recordings of all forty texts are available online free of charge. *Glossary of Chinese Medical Terms and Acupuncture Points* Nigel Wiseman, Ken Boss, 1990

**Chinese Theories of Reading and Writing** Ming Dong Gu, 2012-02-01 This ambitious work provides a systematic study of Chinese theories of reading and writing in intellectual thought and critical practice. The author maintains that there are two major hermeneutic traditions in Chinese literature: the politico-moralistic mainstream and the metaphysico-aesthetical undercurrent. In exploring the interaction between the two, Ming Dong Gu finds a movement toward interpretive openness. In this, the Chinese practice anticipates modern and Western theories of interpretation, especially literary openness and open poetics. Classic Chinese works are examined, including the *Zhouyi* (the I Ching or Book of Changes), the *Shijing* (the Book of Songs or Book of Poetry), and selected poetry, along with the philosophical background of the hermeneutic theories. Ultimately, Gu relates the Chinese practices of reading to Western hermeneutics, offering a cross-cultural conceptual model for the comparative study of reading and writing in general.
