The Rise and Fall of Social Psychology

Augustine Brannigan, 2017-07-05 This unflinching effort critically traces the attempt of social psychology over the past half century to forge a scientific understanding of human behavior based on the systematic use of experiments Having examined the record from the inception of the field to the present Brannigan suggests that it has failed to live up to its promise that social psychologists have achieved little consensus about the central problems in the field that they have failed to amass a body of systematic non trivial theoretical insight and that recent concerns over the ethical treatment of human subjects could arguably bring the discipline to closure But that is not the disastrous outcome that Brannigan hopes for Rather going beyond an apparent iconoclasm the author explores prospects for a post experimental discipline It is a view that admits the role of ethical considerations as part of scientific judgment but not as a sacrifice of but an extension of empirical research that takes seriously how the brain represents information and how these mechanisms explain social behaviors and channel human choices and appetites What makes this work special is its function as a primary text in the history as well as the current status of social psychology as a field of behavioral science The keen insight touched by the gently critical styles of such major figures as Philip Zimbardo Morton Hunt Leon Festinger Stanley Milgram Alex Crey Samuel Wineburg Carol Gilligan David M Buss among others makes this a perfect volume for students entering the field and no less a reminder of the past as well as present of social psychology for its serious practitioners

sociology at the University of Calgary He is the author of *The Social Basis of Scientific Discoveries* and of various social science publications *The Journal of Abnormal Psychology and Social Psychology*, 1921 **Altruism in Humans** Charles Daniel Batson, 2011 We send money to help famine victims halfway around the world We campaign to save whales and oceans We stay up all night to comfort a friend with a broken relationship People will at times risk even lose their lives for others including strangers Why do we do these things What motivates such behavior *Altruism in Humans* takes a hard science look at the possibility that we humans have the capacity to care for others for their sakes rather than simply for our own Based on an extensive series of theory testing laboratory experiments conducted over the past 35 years this book details a theory of altruistic motivation offers a comprehensive summary of the research designed to test the empathy altruism hypothesis and considers the theoretical and practical implications of this conclusion Authored by the world's preeminent scholar on altruism this landmark work is an authoritative scholarly resource on the theory surrounding altruism and its potential contribution to better interpersonal relations and a better society *The Journal of Social Forces*, 1922 *Social Inequality & The Politics of Representation* Celine-Marie Pascale, 2013 This anthology critically analyzes how cultures around the world make social categories of race class gender and sexuality meaningful in particular ways The collection uses a wide range of readings to examine how contemporary issues of race class gender and sexuality are constructed mobilized and transformed Unlike many books in this area the U S is not analytical center **Public Affairs Information Service Bulletin**, 1921

Research Handbook on Social Influence Radmila Prislin, 2025-02-12 This timely Research Handbook provides an in depth exploration of the scholarly understanding of social influence Expanding on classic characterisations and themes such as conformity majority and minority persuasion compliance and authority this book examines how people exert and react to social influence in dynamic interpersonal and group settings The Use and Misuse of the Experimental Method in Social Psychology Augustine Brannigan, 2020-11-03 This book critically examines the work of a number of pioneers of social psychology including legendary figures such as Kurt Lewin Leon Festinger Muzafer Sherif Solomon Asch Stanley Milgram and Philip Zimbardo Augustine Brannigan argues that the reliance of these psychologists on experimentation has led to questions around validity and replication of their studies The author explores new research and archival work relating to these studies and outlines a new approach to experimentation that repudiates the use of deception in human experiments and provides clues to how social psychology can re-articulate its premises and future lines of research Based on the author's 2004 work *The Rise and Fall of Social Psychology* in which he critiques the experimental methods used the book advocates for a return to qualitative methods to redeem the essential social dimensions of social psychology Covering famous studies such as the Stanford Prison Experiment Milgram's studies of obedience Sherif's Robbers Cave and Rosenhan's exposé of psychiatric institutions this is essential and fascinating reading for students of social psychology and the social sciences It is also of interest to academics and researchers interested in engaging with a critical approach to classical social psychology

with a view to changing the future of this important discipline **The Oxford Handbook of Prosocial Behavior** David A. Schroeder, William G. Graziano, 2015 The Oxford Handbook of Prosocial Behavior provides a comprehensive review of the current literature on when and why people act to benefit others It provides a comprehensive overview of the field to give both the casual reader and the neophyte to the field some perspective about fundamental questions what why when and who relative to prosocial behavior Taking a multi level approach the chapters represent the broad spectrum of this multi faceted domain Topics range from micro level analyses involving evolutionary and comparative psychological factors to macro level applications such as reducing intergroup conflicts and ethnic genocide Between these extremes the contributors all internationally recognized in their field offer their perspectives on developmental processes that may predispose individuals to empathize with and respond to the needs of others individual differences that seem to interact with situational demands to promote helping and the underlying motivations of those helping others They explain volunteerism intragroup cooperation and intergroup cooperation to move the analysis from the individual to group level phenomena They extend the consideration of this topic to include support of pro environmental actions means to encourage participation in medical clinical trials and the promotion of world peace The ways that gender interpersonal relationships race and religion might affect decisions to give aid and support to others are also addressed The final chapter offers a unique view of prosocial behavior that encourages researchers and readers to take an even broader consideration of the field to search for a prosocial consilience

Coughlin, 2016-09-16 The papers in this collection were selected from nearly 200 that were presented at the 50 sessions of the second annual International Conference on Socio Economics held at The George Washington University in Washington D C March 1990 They reflect the great interest that socio economics has inspired in the few years since the Society for the Advancement of Socio Economics was founded in 1989 The papers represent the stimulating dialogue among psychologists sociologists political scientists philosophers economists and students of finance and business administration The authors are communicating across the frontiers of established disciplines to address enduring questions on economic theory and policy and they aim to liberate the study of economics from the straitjacket of the neoclassical approach

Psychoanalytic Perspectives on a Turbulent World Halina Brunning, Mario Perini, 2018-05-08 This article is intended to contribute to our understanding of the December 2001 collapse of Enron The existing literature on Enron s demise falls largely into two broad areas involving either micro psychological explanations or macro accounts that emphasize the workplace and its environment this paper is an exploratory study that focuses on a new interpretation which links the two areas more closely together It is proposed that Enron s culture was influenced by both micro and macro factors an experience of unsuccessful paternal authority figures within the family history of Enron s leaders coupled with an experience of problematic government and regulatory regimes associated with the gas industry Drawing on

concepts from psychoanalysis and its application to organizational dynamics it is argued that these micro and macro factors helped to generate an Oedipal mindset in Enron's leaders according to which external authority was seen to be weak and not worthy of respect and that this contributed to Enron's demise Implications for theory are examined **Social Forces** ,1928
