Eastern Rome and the Rise of Islam Olof Heilo,2015-11-19 The emergence of Islam in the seventh century AD still

polarises scholars who seek to separate religious truth from the historical reality with which it is associated. However, history and prophecy are not solely defined by positive evidence or apocalyptic truth but by human subjects who consider them to convey distinct messages and in turn make these messages meaningful to others. These messages are mutually interdependent and analysed together provide new insights into history. It is by way of this concept that Olof Heilo presents the decline of the Eastern Roman Empire as a key to understanding the rise of Islam: two historical processes often perceived as distinct from one another. Eastern Rome and the Rise of Islam highlights significant convergences between Early Islam and the Late Ancient world. It suggests that Islam's rise is a feature of a common process during which tensions between imperial ambitions and apocalyptic beliefs in Europe and the Middle East cut straight across today's theological and political definitions. The conquests of Islam, the emergence of the caliphate and the transformation of the Roman and Christian world are approached from both prophetic anticipations in the Ancient and Late Ancient world and from the Medieval and Modern receptions of history. In the shadow of their narratives it becomes possible to trace the outline of a shared history of Christianity and Islam. The Dark Ages thus emerge not merely as a tale of sound and fury but as an era of openness, diversity and unexpected possibilities. Approaching the rise of Islam as a historical phenomenon, this book opens new perspectives in the study of early religion and philosophy as well as providing a valuable resource for students and scholars of Islamic Studies.

Fall of Capitalism and Rise of Islam Mohammad Malkawi, 2010-04-22. The Fall of Capitalism and the Rise of Islam provides a critical analysis of the current financial crisis in the US and the world at large. It concludes that the current crisis could very well be a sign of failure of the underlying system of capitalism. The book shows that the system of capitalism contains serious faults and defects at the core theory level. Economic and financial crisis periodically occur whenever these defects are triggered by various conditions and political decisions during the life of capitalism. The collapse of financial institutions, the crash of the housing market, the evaporation of trillions of dollars, the creation of virtual unreal wealth and the decline of productivity are symptoms of the potential failure of the ideology of capitalism. This failure has serious impact on the life quality of billions of people around the world who suffer from poverty, hunger, health insecurity, lack of education and serious inhuman conditions. The world order under capitalism witnessed multiple world wars, political and economic instability, colonialism, absence of peace, deprivation of justice and polarization of wealth and power. This book predicts a potential crash and collapse of the world order under the pressure of a failing capitalism. Concurrent to the decline and potential collapse of capitalism, the book makes an account of another global phenomenon, namely the second rise of Islam. The rise of Islam, similar to the first one that lasted for thirteen hundred years, is a comprehensive rise that brings up the economic system together with the political system and the moral system together with the legal system. It is much needed and sought to introduce to the world a system full of justice, fairness and geared toward productivity and human righteousness. The new rise of Islam is argued to be in the best interest of the human societies around the world and that the

propagated fear of this rise is unfounded The book provides a detailed description of the economic system and the political economy of Islam It provides compelling evidence that the Islamic political economy characterized by sustained productivity and wealth distribution guarantees the satisfaction of the basic needs of a human The Islamic political economy integrates several mechanisms for natural distribution of wealth while it maintains a high level of productivity through the inhibition of usury hoarding and exploitation The Fall of Capitalism and the Rise of Islam makes extensive references to a score of historians scholars and scientists who provide a fair testimony of the Islamic civilization and the ideology of Islam
