*The Rise of the Image* Thomas Frangenberg, 2017-07-05 The Rise of the Image reveals how illustrations have come to play a primary part in books on art and architecture Italian Renaissance art is the main focus for this anthology of essays which analyse key episodes in the history of illustration from the sixteenth to the twentieth century The authors raise new issues about the imagery in books on the visual arts by Leonardo da Vinci Giorgio Vasari Sebastiano Serlio Andrea Palladio Girolamo Teti and Andrea Pozzo The concluding essays evaluate the roles of reproductive media including photography in Victorian and twentieth century art books Throughout images in books are considered as vehicles for ideas rather than as transparent passive visual forms dependent on their accompanying texts Thus The Rise of the Image enriches our understanding of the role of prints in books on art

believe that there was a time when the jump shot didn't exist in basketball. When the sport was invented in 1891, players would take set shots with both feet firmly planted on the ground. Defenders controlled the sport; the pace was slower, and games would frequently end with scores fit for a football field. It took almost forty years before players began shooting jump shots of any kind, and sixty-five years before it became a common sight. When the first jump shooting pioneers left the ground, they rose not only above their defenders but also above the sport's conventions. The jump shot created a soaring offense, infectious excitement, loyal fans, and legends. Basketball would never be the same. *Rise and Fire* celebrates this crucial shot while tracing the history of how it revolutionized the game, shedding light on all corners of the basketball world from NBA arenas to the playgrounds of New York City and the barns of Indiana. Award-winning journalist Shawn Fury obsesses over the jump shot, explores its fundamentals, puzzles over its complexities, marvels at its simplicity, and honors those who created some of basketball's greatest moments. Part history, part travelogue, and part memoir, *Rise and Fire* bounces from the dirt courts of the 1930s to today's NBA courts and state-of-the-art shooting labs, examining everything from how nets and rims affect a shooter to rivalries between shooting coaches to how the three pointer came to rule the game. Impeccably researched and engaging, the book features interviews and profiles of legendary figures like Jerry West, Bob McAdoo, Ray Allen, and Denise Long, the first woman ever drafted by the NBA, plus dozens more, revealing the evolution of the shot over time. Analyzing the techniques and reliving some of the most unforgettable plays from the greats, Fury creates a technical, personal, historical, and even spiritual examination of the shot. This is not a dry, how-to textbook of basketball mechanics; it is a lively tour of basketball history and a love letter to the sport and the shot that changed it forever.

*Generation X and the Rise of the Entertainment Subject* Robert Samuels, 2021-04-20

*Generation X and the Rise of the Entertainment Subject* defines Gen X as the first generation to be dominated by entertainment subjectivity. A social and psychological feedback loop is created as entertainment caters to adolescent consumers while the consumer in turn is shaped by the entertainment they internalize. While the paradigmatic latchkey young adults are immersed in media consumption, they see the world through the lens of popular culture products that seek to capitalize on the free time and disposable income of the unoccupied viewer. This book argues that Gen X entertainment subjectivity lays the foundations for contemporary society where handheld devices and other technologies detach their users from the world around them.
