**War, Revenue, and State Building** Sheldon Pollack, 2011-03-15 In a relatively short time the American state developed from a weak highly decentralized confederation composed of thirteen former English colonies into the foremost global superpower This remarkable institutional transformation would not have been possible without the revenue raised by a particularly efficient system of public finance first crafted during the Civil War and then resurrected and perfected in the early twentieth century That revenue financed America's participation in two global wars as well as the building of a modern system of social welfare programs Sheldon D Pollack shows how war revenue and institutional development are inextricably linked no less in the United States than in Europe and in the developing states of the Third World He delineates the mechanisms of political development and reveals to us the ways in which the United States too once was and still may be a developing nation Without revenue states cannot maintain political institutions undergo development or exert sovereignty over their territory Rulers and their functionaries wield the coercive powers of the state to extract that revenue from the population under their control From this perspective the state is seen as a highly efficient machine for extracting societal revenue that is used by the state to sustain itself War Revenue and State Building traces the sources of public revenue available to the American state at specific junctures of its history in particular during times of war the revenue strategies pursued by its political leaders in response to these factors and the consequential impact of those strategies on the development of the American state
