Islam and the Trajectory of Globalization Louay M. Safi, 2021-10-18 The book examines the growing tension between social movements that embrace egalitarian and inclusivist views of national and global politics most notably classical liberalism and those that advance social hierarchy and national exclusivism such as neoliberalism neoconservatism and national populism In exploring issues relating to tensions and conflicts around globalization the book identifies historical patterns of convergence and divergence rooted in the monotheistic traditions beginning with the ancient Israelites that dominated the Near East during the Axial age through Islamic civilization and finally by considering the idealism realism tensions in modern times One thing remained constant throughout the various historical stages that preceded our current moment of global convergence a recurring tension between transcendental idealism and various forms of realism Transcendental idealism which prioritize egalitarian and universal values pushed periodically against the forces of realism that privilege established law and power structure Equipped with the idealism realism framework the book examines the consequences of European realism that justified the imperialistic venture into Africa the Middle East and Latin America in the name of liberation and liberalization The ill conceived strategy has ironically engendered the very dysfunctional societies that produce the waves of immigrants in constant motion from the South to the North simultaneously as it fostered the social hierarchy that transfer external tensions into identity politics within the countries of the North The book focuses particularly on the role played historically by Islamic rationalism in translating the monotheistic egalitarian outlook into the institutions of religious pluralism legislative and legal autonomy and scientific enterprise at the foundation of modern society It concludes by shedding light on the significance of the Muslim presence in Western cultures as humanity draws slowly but consistently towards what we may come to recognize as the Global Age The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781003203360> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

THE SIXTH SEAL II Cliff Kelly, 2024-01-30 Today we are witnessing the historically powerful American Order experiencing perhaps its greatest peril as it struggles against the tidal wave of new challenges from Covid 19 the rapid rise of Christian Nationalism

large scale Apostasy and an increasingly divided nation streaming toward increased violence and possibly even Civil War Dr Kelly takes on these growing trends by examining Scripture by Scripture the Sixth Chapter of the Book of Revelation as a Template to help explain the reasons for the current Crisis and where America is likely headed if we do not effectively and biblically confront it He argues that these events constitute the many Birth Pangs leading up to the stunning Return of Jesus Christ to rescue His true Church and judge the nations But before that Day Christians in America and around the world must prepare to move through those first tumultuous Seals as God sifts and separates the true follower of Christ from the impostors This is a riveting ride and the reader is urged to have a Bible and a notepad close by as we explore what Dr Kelly termed in the first edition of this book *The End of History as We Know It 2* **The Resistance** David S. Meyer, Sidney Tarrow, 2018-07-30 Even before the 2016 presidential election took place groups and individuals angry at Donald Trump and frightened about what a Trump presidency could mean were taking to the streets After the election and particularly after he inaugurated the protests continued Over time the Resistance was joined by a broad variety of groups and embraced an increasing diversity of tactics In *The Resistance* David S Meyer and Sidney Tarrow have gathered together a cast of eminent scholars to tackle the emergence of a volatile and diverse movement directed against the Trump presidency Collectively the contributors examine the origins and concerns of different factions of this movement and evaluate their prospects for surviving and exercising political influence Through a range of analytical and methodological approaches *The Resistance* offers both an overview of the broad scope of the emerging movement and sharp analyses of the campaign as it works through the numerous crises that the Trump era has introduced *Navigating the Landscape of Higher Engineering Education* Aldert Kamp, 2023-06-21 Some times call for a change some require consolidation The question is in which time do you live Staring into the future doesn't help focusing too much on the past neither It requires reading the past to predict the future For that an open mind is needed a critical assessing of the current and the past For more than a decade Ir Aldert Kamp has done so While in charge of the educational programmes of TU Delft's Aerospace Engineers he constantly scanned the world for clues on how to educate young engineers Aldert consistently made a plea for outward looking open the windows and look around in the world let the world flow in And so he did travelling around visiting the leading conferences and being a well respected key note speaker recognized by the great institutions like MIT Aldert Kamp organised think tanks free spirits to discuss the future of engineering education He talked to the major industries trying to understand in what direction they were moving and what that meant for the education of the next generation aeronautical engineers His ideas took shape more and more into the direction of real change The current times are times of fast change of greater uncertainty Consolidation is no longer an option Sure engineers need engineering skills But that will not suffice Additional skills are needed and they cannot all be put in the heads and minds of each individual student That made Aldert Kamp come up with various roles for different engineers Roles that have one thing in common they are connected to other roles and areas

Working in splendid isolation and then passing on the work to the next engineer is out Team work with multiple disciplines in each team socially responsible engineering entrepreneurial thinking innovator roles system thinkers and sustainability those are the new ways of the world In this book Aldert has put together all the ideas knowledge that he gained over the years Read it Even if you are not convinced that we are living in rapidly changing times The timing of the book now that the world is in turmoil due the corona virus couldn t be better Changing times that s what we are facing And we have to find answers to cope with this In this book you will find food for thought and inspiration from one of the current thought leaders in engineering education

Congregational Connections Carroll Anne Sheppard,Nancy Burton Dilliplane,2011-09-15 Congregational Connections challenges both clergy and lay leaders to become deeply sensitized to the

demographic reality of six separate generational cohorts being alive at once This is the first time in the worlds history that such a thing has happened to humans and none of us has the reality clear in our minds yet It takes work to analyze consciously what we are seeing when multiple generations are present We discover that we are quite happy when we see the expected three Elders Parents raising kids and the children themselves and we often fail to ask Who isnt here Demographers and marketers have created names for these six cohorts a cohort is a group of people born within a 20 or 25 year span who have some distinctive characteristics In America today we have Builders approximately ages 110 87 Silents 86 68 Boomers 67 51 48 GenXers 51 48 27 Millennials 27 11 and GenZ 10 and under The first three Builders Silents and Boomers are referred to in Congregational Connections as Olders and the second three GenX Millennials and GenZ are referred to as Youngers A great shift in worldview and preferred technologies separates Olders and Youngers Today five of these cohorts the youngest Builders Silents Boomers GenX and the oldest Millennials are playing adult roles in a world that recently seemed to be populated by Elders and Parents raising Children It is making everyone grumpy There does not seem to be psychological room for all these players The March 2011 cover of Philadelphia Magazine pictured a generic texting device with the following text Dear Baby Boomers Just die already Well take Philly from here Thanks XOXO Generation X In congregation after congregation Olders are wondering why the Youngers dont seem to be attending worship regularly Yet when they do come the Olders wish they would make their children stop texting and the parents would stop checking their cell phones Youngers are wondering why Olders want to have all these time wasting repetitive meetings and wont use e technologies to avoid them And why arent they being respected Congregational Connections offers a discussion of who these cohorts are and why they act the way they do Its nine chapters cover How We Got Here Six Different Cohort Experiences The Generational Divide Realities for Congregational Life Worship Christian Formation Programs and Space Community is Congregation and The Way Forward Hope The books aim is not only to have readers become aware of the six cohorts and their different attitudes and needs but also to offer insights through Congregational Moments case studies that let readers see how these realities play out in church life and suggest questions for discussion Why is it happening now In her book The Great Emergence Phyllis Tickle offers us a thesis that we are in the middle of the next Reformation These happen every five hundred years and take about 150 years to roll their paradigm shift of technology and worldview through society The last Reformation was fueled by printing technology that promoted widespread literacy and a worldview shift that supported increasing political democracy and social leveling The one that we are living through now is about electronic technology radio phone television computers internet and who knows and an even flatter social environment Those changes by themselves seem sufficient to make the Second Reformation happen Yet added to their pressures is the arrival of six generational cohorts on the worlds playing field Each cohort has its own identity but Olders and Youngers break into two different sides of the game Whats more by the time the Second Reformation finishes rolling through medical advances may

add several decades to the average lifespan Perhaps eight nine or even more generational cohorts will be alive together at its
end Right now congre *Worldview* ,1977
