Managing Indoor Climate Risks in Museums Bart Ankersmit, Marc H.L. Stappers, 2016-09-28 This book elaborates on different aspects of the decision making process concerning the management of climate risk in museums and historic houses The goal of this publication is to assist collection managers and caretakers by providing information that will allow responsible decisions about the museum indoor climate to be made The focus is not only on the outcome but also on the equally important process that leads to that outcome The different steps contribute significantly to the understanding of the needs of movable and immovable heritage The decision making process to determine the requirements for the museum indoor climate includes nine steps Step 1 The process to make a balanced decision starts by clarifying the decision context and evaluating what is important to the decision maker by developing clear objectives In Step 2 the value of all heritage assets that are affected by the decision are evaluated and the significance of the building and the movable collection is made explicit Step 3 The climate risks to the moveable collection are assessed Step 4 Those parts of the building that are considered valuable and susceptible to certain climate conditions are identified Step 5 The human comfort needs for visitors and staff are expressed Step 6 To understand the indoor climate the building physics are explored Step 7 The climate specifications derived from step 3 to 5 are weighed and for each climate zone the optimal climate conditions are specified Step 8 Within the value framework established in Step 1 the options to optimize the indoor climate are considered and selected Step 9 All options to reduce the climate collection risks are evaluated by the objectives established in Step 1 *Dictionary of Museology* François Mairesse, 2023-04-05 The internationally focused Dictionary of Museology reflects the diversity of cultural and disciplinary approaches to theory and practice in the museum field today The museum world is changing rapidly and the characteristics and social roles of the world's approximately 100 000 existing museums are constantly evolving In addition to their traditional functions of preservation research and communication museums are increasingly addressing issues related to

social inclusion human rights sustainable development and finances all of which are explored in this dictionary Drawing on the support of an international editorial committee including influential figures from the US Canada Brazil Japan Spain Germany France and the UK this collaborative work produced by over 100 researchers from around the world provides an overview of this unique field by defining over 1 000 terms relating to museology The Dictionary of Museology is intended for a broad spectrum of museum professionals academics researchers and students The book will be especially useful to those working with international partners since a common lexicon that conveys the complex reality of current social and cultural values is particularly vital for those working across borders

Disaster Management for Libraries and Archives John Feather, 2017-03-02 Disaster planning might not seem a pressing concern until disaster strikes Recent events have reminded us that any collection or service may be at risk and libraries and archives must have prevention and recovery measures in place Written by academics and practitioners drawing on firsthand experience and research worldwide including Australia Scandinavia and the USA Disaster Management for Libraries and Archives reviews and explains the importance and scope of disaster management planning and what can be done before during and after incidents The book begins by explaining how to develop a disaster control plan outlining the different phases from prevention to recovery and goes on to provide guidance on risk assessment and management methods which should underpin disaster planning Individual chapters then focus on fire and flooding bringing together lessons learned from recent disasters in the UK with case study material including information on prevention systems and reaction and recovery measures A chapter on cooperative projects in the USA follows providing examples of how collaborative partnerships and networks can be organized so that help expertise and resources can be shared to facilitate management of disasters The effect on people both employees and users must never be overlooked this is the emphasis of the second half of the book Research on the impact of a major library fire in Sweden forms the basis of the next chapter which explains how the psychological impact of disasters on both staff and the local community can be managed The following chapter describes the devastating effects on cultural institutions and their staff of war in Croatia in the early 1990s and extraordinary achievements against the odds Ways of maintaining immediate temporary service continuity along with planning for long term restoration of services are exemplified by a case study of the fire at the Central Library of Norwich Disaster Management for Libraries and Archives offers advice and insight for managers beginning to work on or reviewing disaster management within their organizations The accounts of actual events highlight the real life challenges faced and the effectiveness of appropriate solutions while the guide to information sources at the end of the book signposts readers to a wealth of other useful material

Constructing Professional Discourse Concepción Orna-Montesinos, 2012-01-17 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific

communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discursive and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced *The Power of Touch* Elizabeth Pye, 2016-09-16 Despite the fact that we have a range of senses with which to perceive the world around us museums and other cultural institutions have traditionally used sight as the main way to convey information In everyday life though we use touch constantly in conjunction with sight Why then does it play so small a role in the study and enjoyment of museum objects Contributors to this volume explore how the sense of touch can be utilized in cultural institutions to facilitate understanding and learning Museum Basics Timothy Ambrose, Crispin Paine, 2018-03-14 This fourth edition of Museum Basics has been produced for use in the many museums worldwide that operate with few professional staff and limited resources The fourth edition has been fully updated to reflect the many changes that have taken place in museums around the world over the last six years Drawing from a wide range of practical experience the authors provide a basic guide to all aspects of museum work from audience development and learning through collections management and conservation to museum management and forward planning Museum Basics is organised on a modular basis with over 100 units in eight sections It can be used both as a reference work to assist day to day museum management and as the key textbook for pre service and in service museum training programmes where it can be supplemented by case studies project work and group discussion This edition includes over 100 diagrams to support the text as well as a glossary sources of information and support and a select bibliography Museum Basics is also supported by its own companion website which provides a wide range of additional resources for readers Museum Basics aims to help the museum practitioner keep up to date with new thinking about the function of museums and their relationships with the communities they serve The training materials provided within the book are also suitable for pre service and in service students who wish to gain a full understanding of work in a museum **Handbook of Material Culture** Christopher Y. Tilley, 2006-01-26 Provides a critical survey of the theories concepts intellectual debates

substantive domains and traditions of study characterizing the analysis of things This handbook charts an interdisciplinary field of studies that makes a fundamental contribution to an understanding of what it means to be human *Museums and Archaeology* Robin Skeates, 2022-06-19 *Museums and Archaeology* brings together a wide but carefully chosen selection of literature from around the world that connects museums and archaeology Part of the successful Leicester Readers in Museum Studies series it provides a combination of issue and practice based perspectives As such it is a volume not only for students and researchers from a range of disciplines interested in museum gallery and heritage studies including public archaeology and cultural resource management CRM but also the wide range of professionals and volunteers in the museum and heritage sector who work with archaeological collections The volume s balance of theory and practice and its thematic and geographical breadth is explored and explained in an extended introduction which situates the readings in the context of the extensive literature on museum archaeology highlighting the many tensions that exist between idealistic principles and real life practice and the debates that surround these In addition to this section introductions and the seminal pieces themselves provide a comprehensive and contextualised resource on the interplay of museums and archaeology

Collection Care/Sammlungspflege Gabriela Krist, 2015-05-21 Prevention is an attempt to look into the future and have a positive influence on it therefore it is one of the most important aspects in the area of collection care the central current field of applied research in conservation and restoration With sustainability damage and loss are avoided dangers averted and research conducted Collection care is only successful if the theory is appropriately implemented in museum practice
