

A person wearing a red jacket and dark pants is captured mid-jump, falling over the edge of a cliff. Their legs are spread wide in a V-shape, and their arms are outstretched. The background is a vast, hazy landscape with mountains and a body of water under a sky filled with soft, white clouds. The overall tone is adventurous and daring.

Risk Taking and Decision Making, 1998-02 Risks are an integral part of complex high stakes decisions and decisionmakers are faced with the unavoidable tasks of assessing risks and forming risk preferences This is true for all decision domains including financial environmental and foreign policy domains among others How well decisionmakers deal with risk affects to a considerable extent the quality of their decisions This book provides the most comprehensive analysis available of the elements that influence risk judgments and preferences The book has two dimensions theoretical and comparative historical The study of risk taking behavior has been dominated by the rational choice approach Instead the author adopts a socio cognitive approach involving a multivariate theory integrating contextual cognitive motivational and personality factors that affect an individual decisionmaker s judgment and preferences the social interaction and structural effects of the decisionmaking group and its organizational setting and the role of cultural societal values and norms that sanction or discourage risk taking behavior The book s theoretical approach is applied and tested in five historical case studies of foreign military interventions The richly detailed empirical data on the case studies make them metaphorically speaking an ideal laboratory for applying a process tracing approach in studying judgment and decision processes at varying risk levels The case studies analyzed are U S interventions in Grenada in 1983 and Panama in 1989 both low risk Soviet intervention in Czechoslovakia in 1968 moderate risk U S intervention in Vietnam in 1964-68 high risk and Israel s intervention in Lebanon in 1982-83 high risk

in their own situations As Shapira notes risk taking propensities vary among managers and the need to maintain control and avoid particularly dangerous results exercises a powerful influence Shapira also examines the impact of organizational structure long term management objectives and incentives on decision making With perceptive observations of the cognitive emotional and organizational dimensions of corporate decision making Risk Taking propels the study of managerial risk behavior into new directions This volume signals the way toward improving managerial decision making by revealing the need for more inclusive choice models that augment classical theory with vital behavioral observations Human Safety and Risk Management A. **Gender and Risk-Taking** Julie A. Nelson, 2017-07-14 The belief that men and women have fundamentally distinct natures resulting in divergent preferences and behaviours is widespread Recently economists have also engaged in the search for gender differences with a number claiming to find fundamental gender differences regarding risk taking altruism and competition In particular the idea that women are more risk averse than men has become accepted as a truism But is it true And what are its causes and consequences Gender and Risk Taking makes three contributions First it asks whether the belief that men and women have distinct risk preferences is backed up by high quality empirical evidence The answer turns out to be no This leads to a second question Why then does so much of the literature claim to find evidence of difference This it will be shown can be attributed to biases arising from too easy categorical thinking widespread stereotyping and a tendency to prefer results that are publishable and that fit one's prior beliefs Third the book explores the economic implications of the conventional association of risk taking with masculinity and risk aversion with femininity Not only fairness in employment but also the health of the financial sector and national responses to climate change this book argues are being compromised This volume will be eye opening for anyone interested in gender decision making cognition and or risk especially in areas relating to employment finance management or public policy

*Risk-Taking in Higher Education* Ryan Kelty, Bridget A. Bunten, 2017-03-08 Risk taking is foundational to the structure and goals of higher education Encouraging students to consider new diverse even uncomfortable ideas is needed to develop a critically informed view of the world and establish one's own values and beliefs Yet students and parents are increasingly averse to risk taking in higher education a shift evidenced by calls for colleges and universities to provide an education that shelters students from diverse and potentially controversial ideas and topics This tension over the necessary role of risk taking in higher education represents a critical moment for American education This volume includes authors from numerous academic disciplines to emphasize both the importance of risk taking across higher education and to highlight the varied approaches to incorporate risk taking into classroom practices The authors collective works in this volume reaffirm the critical need to reject intellectual coddling and commodification in the college classroom and to promote intellectual risk taking as an essential aspect of higher education Sustained systematic emphasis on risk taking in higher education is key to promoting innovation critical thinking life long learning and moral ethical development
