Affective Decision Making Under Uncertainty Donald J. Brown, 2020-12-18 This book is an exploration of the ubiquity of ambiguity in decision making under uncertainty It presents various essays on behavioral economics and behavioral finance

that draw on the theory of Black Swans Taleb 2010 which argues for a distinction between unprecedented events in our past and unpredictable events in our future The defining property of Black Swan random events is that they are unpredictable i.e. highly unlikely random events In this text Mandelbrot's 1972 operational definition of risky random unpredictable events is extended to Black Swan assets assets for which the cumulative probability distribution or conditional probability distribution of random future asset returns is a power distribution Ambiguous assets are assets for which the uncertainties of future returns are not risks Consequently there are two disjoint classes of Black Swan assets Risky Black Swan assets and Ambiguous Black Swan assets a new class of ambiguous assets with unpredictable random future outcomes The text is divided into two parts the first of which focuses on affective moods introduces affective utility functions and discusses the ambiguity of Black Swans The second part which shifts the spotlight to affective equilibrium in asset markets features chapters on affective portfolio analysis and Walrasian and Gorman Polar Form Equilibrium Inequalities In order to gain the most from the book readers should have completed the standard introductory graduate courses on microeconomics behavioral finance and convex optimization The book is intended for advanced undergraduates graduate students and post docs specializing in economic theory experimental economics finance mathematics computer science or data analysis

Advanced Decision Making John Band, Lesley Partridge, This title looks at decision making from the manager's viewpoint and aims to help you improve your decision making It also recognises that in business today decision making is everyone's responsibility Decision making for staff who are not managers is often through involvement in team decisions and the workbook also explores the benefits and limitations of team decision making

Rethinking Enterprise Risk Management Halis Kırıl, 2024-12-17 This book provides a critical analysis of existing enterprise risk management models and practices and proposes innovative solutions to address the challenges associated with implementing enterprise risk management strategies Enterprise risk management activities are not high on the priority agenda of the senior management in both public and private sectors Conceptual ambiguity and methodological gaps in current standards and frameworks make it difficult to effectively implement enterprise risk management Therefore this book's approach to enterprise risk management aims to eliminate the unit based silo approach of traditional risk management adopting a function based silo approach It focuses on the management of fewer and more significant risks associated with high level objectives rather than all business processes of the organization thus increasing the success of enterprise risk management implementation The book would be a valuable read for business executives internal and external auditors business school students and academics

Neuroeconomics and the Firm Angela A. Stanton, Mellani Day, Isabell M. Welpe, 2010-01-01 Do people with high testosterone levels make decisions the same way as people with lower testosterone Do men change their behavior when a pretty woman enters the office Do women change their behavior when a handsome man enters the office Do men and women affect each other within the firm to the detriment or the benefit of the firm In some ways the questions this edited volume addresses are questions

that we are all familiar with and have asked for many years. It suggests looking for answers in places that that we have never thought of before. Some of the chapters will surprise you with their ingenious simple answers and propositions; some will perhaps make you feel awkward with their straight forward way of presenting what we all suspected but felt uncomfortable to talk about. From the foreword by David B. Audretsch: This volume brings together leading researchers from a variety of fields to investigate the concept of the firm from new perspectives arising from neuroeconomics. The traditional theory of the firm has focused on the strategic, operational and resource management objectives of the firm as an organization. This timely and informative book explores new horizons in the biology of human decision making and behavior, including uncertainty, entrepreneurship and ethics as it affects the functioning of the organization. The fascinating chapters cover a wide range of research fields, drawing on both the conscious and the unconscious mind and how common hormonal cycles in the female and testosterone variations in the male affect each other in the workplace and its affect on the firm as an organization. The topics of entrepreneurship and the recent global financial crisis are discussed from the perspective of hormonal forces and the implications of those forces in the future. It is an enlightening selection of articles that scholars, students, business leaders and managers will find a valuable read. Vernon L. Smith, 2002 Nobel Laureate in Economics. The ideal firm has been studied over several centuries, yet little is known about what makes one successful and another fail. This pioneering book brings together leading researchers investigating the concept of the firm from a neuroscientific perspective. From the viewpoint of economics, the firm's purpose is to maximize shareholders' wealth; resources are commodities, each with its particular supply and demand curve that can be manipulated by the firm to its own benefit. Traditionally, the firm is focused on the strategic, operational and resource management objectives. The editors instead suggest that the objective of the firm is equal to the objectives of its workers. The definition and function of risk in decision making, ethics, trust and the global financial crisis are all discussed. They are analyzed from the perspective of human bio physiology using scanning and hormonal analysis tools with a focus on the implications for the bottom line of the firm. With experimental as well as theoretical and applied contributions, this book will benefit scholars and students of economics, business management, finance, organizational behavior, entrepreneurship, psychology, neuroscience and law. Practitioners of management, entrepreneurship and law firms will also find this book to be a captivating read.

under rules versus principal based standards white collar crime and group versus individual decision making *The Routines of Decision Making* Tilmann Betsch, Susanne Haberstroh, 2014-04-04 Experience is currently a hot theme in decision making For a long time decision research was almost exclusively focused on new decisions and neglected the importance of experience It took the field until the 1990s for a new direction in research and theorizing to become visible in the literature There are parallel movements happening in sociology political science social psychology and business The purpose of this edited book is to provide a balanced and representative overview of what is currently known about the dynamics of experienced based decision making The chapters are written by renowned experts in the field and provide the latest theoretical developments integrative frameworks and state of the art reviews of research in the laboratory and in the field

Comparative Decision Making Philip H. Crowley, Thomas R. Zentall, 2013-01-30 Decision making cuts across most areas of intellectual enquiry and academic endeavor The classical view of individual human thinkers choosing among options remains important and instructive but the contributors to this volume broaden this perspective to characterize the decision making behavior of groups non human organisms and even non living objects and mathematical constructs A diverse array of methods is brought to bear mathematical computational subjective neurobiological evolutionary and cultural We can often identify best or optimal decisions and decision making processes but observed responses may deviate markedly from these to a large extent because the environment in which decisions must be made is constantly changing Moreover decision making can be highly constrained by institutions natural and social context and capabilities Studies of the mechanisms underlying decisions by humans and other organisms are just beginning to gain traction and shape our thinking Though decision making has fundamental similarities across the diverse array of entities considered to be making them there are large differences of degree if not kind that relate to the question of human uniqueness From this survey of views and approaches we converge on a tentative agenda for accelerating development of a new field that includes advancing the dialog between the sciences and the humanities developing a defensible classification scheme for decision making and decision makers addressing the role of morality and justice and moving advances into applications the rapidly developing field of decision support **Foundations and Applications of Decision Theory** C.A. Hooker, J.J. Leach, E.F. McClennen, 2012-12-06 1 INTRODUCTION In the Spring of 1975 we held an international workshop on the Foundations and Application of Decision Theory at the University of Western Ontario To help structure the workshop into ordered and manageable sessions we distributed the following statement of our goals to all invited participants They in turn responded with useful revisions and suggested their own areas of interest Since this procedure provided the eventual format of the sessions we include it here as the most appropriate introduction to these collected papers resulting from the workshop The reader can readily gauge the approximation to our mutual goals 2 STATEMENT OF OBJECTIVES AND RATIONALE Attached to this statement is a bibliography names of persons cited in the statement and writing in this century will be found referenced in the bibliography certain classics aside 2 1

Preamble We understand in the following the Theory of Decisions in a broader sense than is presently customary construing it to embrace a general theory of deciSion making induding social political and economic theory and applica tions Thus we subsume the Theory of Games under the head of Decision Theory regarding it as a particularly clearly formulated version of part of the general theory of decision making

Decision Making in Behavioral Strategy T. K. Das, 2016-11-01

Behavioral strategy continues to attract increasing research interest within the broader field of strategic management Research in behavioral strategy has clear scope for development in tandem with such traditional streams of strategy research that involve economics markets resources and technology The key roles of psychology organizational behavior and behavioral decision making in the theory and practice of strategy have yet to be comprehensively grasped Given that strategic thinking and strategic decision making are importantly concerned with human cognition human decisions and human behavior it makes eminent sense to bring some balance in the strategy field by complementing the extant emphasis on the objective economics based view with substantive attention to the subjective individual oriented perspective This calls for more focused inquiries into the role and nature of the individual strategy actors and their cognitions and behaviors in the strategy research enterprise For the purposes of this book series behavioral strategy would be broadly construed as covering all aspects of the role of the strategy maker in the entire strategy field The scholarship relating to behavioral strategy is widely believed to be dispersed in diverse literatures These existing contributions that relate to behavioral strategy within the overall field of strategy has been known and perhaps valued by most scholars all along but were not adequately appreciated or brought together as a coherent sub field or as a distinct perspective of strategy This book series on Research in Behavioral Strategy will cover the essential progress made thus far in this admittedly fragmented literature and elaborate upon fruitful streams of scholarship More importantly the book series will focus on providing a robust and comprehensive forum for the growing scholarship in behavioral strategy In particular the volumes in the series will cover new views of interdisciplinary theoretical frameworks and models dealing with all behavioral aspects significant practical problems of strategy formulation implementation and evaluation and emerging areas of inquiry The series will also include comprehensive empirical studies of selected segments of business economic industrial government and non profit activities with potential for wider application of behavioral strategy Through the ongoing release of focused topical titles this book series will seek to disseminate theoretical insights and practical management information that will enable interested professionals to gain a rigorous and comprehensive understanding of the subject of behavioral strategy Decision Making in Behavioral Strategy contains contributions by leading scholars in the field of behavioral strategy research The 10 chapters in this volume cover a number of significant issues relating to the decision making processes practices and perspectives in the field of behavioral strategy covering diverse topics such as failures in acquisitions entrepreneurs under ambiguity metacognition neural correlates of emotion knowledge flows behavioral responses business modeling and alliance capability

The chapters include empirical as well as conceptual treatments of the selected topics and collectively present a wide ranging review of the noteworthy research perspectives on decision making in behavioral strategy **Thinking** David Hardman, Laura Macchi, 2004-01-09 The first international handbook to bring the areas of reasoning judgment and decision making together now in paperback format The book brings three of the important topics of thinking together reasoning judgment and decision making and discusses key issues in each area The studies described range from those that are purely laboratory based to those that involve experts making real world judgments in areas such as medical and legal decision making and political and economic forecasting International collection of original chapters by leading researchers in the field Several chapters contain important new theoretical perspectives Paperback version is more affordable for individual researchers **Measurement, Judgment, and Decision Making** Michael H. Birnbaum, 1997-11-27 Measurement Judgment and Decision Making provides an excellent introduction to measurement which is one of the most basic issues of the science of psychology and the key to science Written by leading researchers the book covers measurement psychophysical scaling multidimensional scaling stimulus categorization and behavioral decision making Each chapter provides a useful handbook summary and unlocks the door for a scholar who desires entry to that field Any psychologist who manipulates an independent variable that affects a psychological construct or who uses a numerical dependent variable to measure a psychological construct will want to study this book Written by leading researchers in fields of measurement psychophysical scaling multidimensional scaling stimulus categorization and behavioral decision making Provides basic definitions and summaries of theories Presents summaries and citations to relevant literature Contains new developments current controversies and open questions Explains relationships among fields and historical links *Medical Decision Making* Stefan Felder, Thomas Mayrhofer, 2022-04-04 This textbook offers a comprehensive analysis of medical decision making under uncertainty by combining test information theory with expected utility theory The authors show how the parameters of Bayes theorem can be combined with a value function of health states in order to arrive at informed test and treatment decisions in the face of diagnostic and therapeutic risks Distinguishing between risk neutral risk averse and prudent decision makers they demonstrate the effects of risk preferences on medical decisions Furthermore they analyze individual and multiple tests as well as diagnostic models in which the decision maker chooses the test outcome The consequences of test and treatment decisions for the patient are encompassed by quality adjusted life years QALYs and the standard economic model which applies the willingness to pay for health approach Lastly non expected utility models of choice under risk and uncertainty are presented Although these models can explain some of the test and treatment decisions observed they are less suitable for normative analyses aimed at providing guidance on medical decision making This third edition provides extensively revised versions of all chapters and reflects recent innovations in medical decision making such as decision curve analysis New chapters focus on the health economics of and revealed preferences in medical decisions The

book is intended for students of health economics and medicine as well as for medical decision makers and physicians dealing with uncertainty in their test and treatment decisions
