Risk Deborah Lupton, 2013-07-04 Risk second edition is a fully revised and expanded update of a highly cited influential and well known book It reviews the three major approaches to risk in social and cultural theory devoting a chapter to each one These approaches were first identified and described by Deborah Lupton in the original edition and have since become widely used

as a categorisation of risk perspectives The first draws upon the work of Mary Douglas to articulate the cultural symbolic perspective on risk The second approach is that of the risk society perspective based on the writings of Ulrich Beck and Anthony Giddens The third approach explored here is that of the governmentality perspective which builds on Michel Foucault's work Other chapters examine in detail the relationship between concepts of risk and concepts of selfhood and the body the notion of Otherness and how this influences the ways in which people respond to and think about risk and the pleasures of voluntary risk taking including discussion of edgework This new edition examines these themes in relation to the newly emerging threats of the twenty first century such as climate change extreme weather events terrorism and global financial crises It will appeal to students and scholars throughout the social sciences and humanities Covid-19 and the Sociology of Risk and Uncertainty Patrick R. Understanding Extreme Sports: A Psychological Perspective

Eric Brymer, Francesco Feletti, Erik Monasterio, Robert D. Schweitzer, 2020-03-30 Extreme sports those activities that lie on the outermost edges of independent adventurous leisure activities where a mismanaged mistake or accident would most likely result in death have developed into a significant worldwide phenomenon Brymer Patterson 2002 and Generation Z turn to extreme sports because they are popular and linked to escapism Giannoulakis Pursglove 2017 Arguably extreme sports now support a multi billion dollar industry and the momentum seems to be intensifying Traditional explanations for why extreme sports have become so popular are varied For some the popularity is explained as the desire to rebel against a society that is becoming too risk averse for others it is about the spectacle and the merchandise that is associated with organised activities and athletes For others it is just that there are a lot of people attracted by risk and danger or just want to show off For others still it is about the desire to belong to sub cultures and the glamour that goes with extreme sports Some seek mastery in their chosen activity and in situations of significant challenges This confusion is unfortunate as despite their popularity there is still a negative perception about extreme sports participation There is a pressing need for clarity The dominant research perspective has focused on positivist theory driven perspectives that attempt to match extreme sports against predetermined characteristics For the most part empirical research has conformed to predetermined societal

perspectives Other ways of knowing might reveal more nuanced perspectives of the human dimension of extreme sport participation This special edition brings together cutting edge research and thought examining psychology and extreme sports with particular attention paid to the examination of motivations for initial participation continued participation effective performance and outcomes from participation References Brymer E Schweitzer R 2017a Phenomenology and the extreme sports experience NY Routledge Brymer E Schweitzer R D 2017b Evoking the Ineffable The phenomenology of extreme sports Psychology of Consciousness Theory Research and Practice 4 1 63 74 Giannoulakis C Pursglove L K 2017 Evolution of the Action Sport Setting In S E Klein Ed Defining Sport Conceptions and Borderlines Lexington Books London 128 146 Patterson I 2002 Baby Boomers and Adventure Tourism The Importance of Marketing the Leisure Experience World Leisure Journal 44 2 4 10 DOI 10 1080 04419057 2002 9674265

throughout the text *A Framework of Intersectional Risk Theory in the Age of Ambivalence* Katarina Giritli Nygren, Anna Olofsson, Susanna Öhman, 2019-12-11 This book brings feminist theories and concepts to the sociology of risk in an attempt to carve out a framework for intersectional risk theories in times of ambivalence The authors purport that risk is pervasive in the Global North and is fast becoming a hegemonic governing principle In order to understand this crucial aspect of society sociological risk theories and risk analysis must go beyond power and social inequalities to incorporate an intersectional risk approach that takes into account gender race and other critical perspectives Their proposed framework will provide the tools to assess how risk is situated in different configurations of power revealing cracks and openings in the weft of power and rethinking risk governance in contemporary society By utilising an intersectional and nuanced analysis the everyday understanding practices and discourses of risk can be explored and better understood This book will be of interest to scholars and students who value the importance of establishing interdisciplinary networks between risk theory sociology politics and more in order to study the contemporary world
