Risk-based Corrective Action and Brownfields Restorations Craig H. Brownfields, Risk-Based Corrective Action, and Local Communities Peter B. Meyer,2011-04 Addresses the problems facing communities that suffer both environ risks from past contamination and depressed economic activity In such settings redevelopment of contaminated sites and the associated economic development may require compromised standards for environmental mitigation But partial cleanups can be shown to face inevitable failure at some future date Thus in such an approach communities face risks that they should be capable of accepting or rejecting The study considers these risks and assesses 4 alternative land use control strategies for assuring community participation in making decisions about both the cleanup process today and the response to risks of failure in the future Illus This is a print on demand report
