Risks And Decisions For Conservation And Environmental Management:

Risks and Decisions for Conservation and Environmental Management Mark A. Burgman, 2005 Risks and Decisions for Conservation and Environmental Management Mark Burgman, 2005-04-07 This book outlines how to conduct a complete environmental risk assessment The first part documents the psychology and philosophy of risk perception and assessment introducing a taxonomy of uncertainty and the importance of context It provides a critical examination of the use and abuse of expert judgement and goes on to outline approaches to hazard identification and subjective ranking that account for uncertainty and context The second part of the book describes technical tools that can assist risk assessments to be transparent and internally consistent These include interval arithmetic ecotoxicological methods logic trees and Monte Carlo simulation These methods have an established place in risk assessments in many disciplines and their strengths and weaknesses are explored The last part of the book outlines some new approaches including p bounds and information gap theory and describes how quantitative and subjective assessments can be used to make transparent decisions

Application of Threshold Concepts in Natural Resource Decision Making Glenn R. Guntenspergen, 2014-02-07 Natural resource managers face a complex decision making environment characterized by the potential occurrence of rapid and abrupt ecological change These abrupt changes are poorly accommodated by traditional natural resource planning and decision making processes As recognition of threshold processes has increased contemporary models of ecological systems have been modified to better represent a broader range of ecological system dynamics Key conceptual advances associated with the ideas of non linear responses the existence of multiple ecological stable states and critical thresholds are more likely the rule than the exception in ecological systems Once an ecological threshold is crossed the ecosystem in question is not likely to return to its previous state There are many examples and a general consensus that climatic disruptions will drive now stable systems across ecological thresholds This book provides professional resource managers with a broad general decision framework that illustrates the utility of including ecological threshold concepts in natural resource management It gives an entry into the literature in this rapidly evolving concept with descriptions and discussion of the promising statistical approaches for threshold detection and demonstrations of the utility of the threshold framework via a series of case studies

students and professionals in natural resource management *Structured Decision Making* David R. Smith, 2020-05-12

Provides and analyzes real examples of how structured decision making SDM can help solve complex problems involving natural resources When faced with complicated potentially controversial decisions that affect our environment many resource management agencies have come to realize the value of structured decision making SDM the systematic use of principles and tools of decision analysis Few professionals however have extensive experience implementing SDM Structured Decision Making provides key information to both current adopters of the method and those who are deploying it for the first time by demonstrating the formal use of decision analysis to support difficult real world natural resource management decisions Drawing on case studies from multiple public agencies in the United States Canada Australia and Mauritius the editors present an overview of decision analysis a classification of decision types and a catalog of decision analysis methods Dozens of detailed charts and maps help contextualize the material These case studies examine a rich variety of topics including keeping forest birds free from disease conserving imperiled freshwater mussels managing water for oil sands mining dealing with coastal wetlands in the face of sea level rise designing networks for prairie dependent taxa combatting invasive alpine shrubs managing vernal pool habitats for obligate amphibian species and much more Aimed at decision makers tackling natural resource challenges in government agencies around the world as well as advanced undergraduate and graduate students preparing to work in natural resource management Structured Decision Making shows how SDM can be implemented to achieve optimal outcomes that integrate social values and scientific understanding Contributors Taber D Allison Larissa L Bailey Ellen A Bean Clint W Boal Gregory Breese Stefano Canessa Jean Fitts Cochrane Sarah J Converse Cami S Dixon John G Ewen Christelle Ferri re Jill J Gannon Beth Gardner Adam W Green Justin A Gude Victoria M Hunt Kevin S Kalasz Melinda G Knutson Jim Kraus Graham Long Eric V Lonsdorf James E Lyons Conor P McGowan Sarah E McRae Michael S Mitchell Clinton T Moore Joslin L Moore Steven Morey Dan W Ohlson Charlie Pascoe Andrew Paul Eben H Paxton Lori B Pruitt Michael C Runge Sarah N Sells Terry L Shaffer Stephanie Slade David R Smith Jennifer A Szymanski Terry Walshe Nicolas Zu l **Biodiversity Monitoring in Australia** David Lindenmayer, Philip Gibbons, 2012 Ecological and biodiversity based monitoring has been marked by an appalling lack of effectiveness and lack of success in Australia for more than 40 years despite the billions of dollars that are invested in biodiversity conservation annually What can be done to rectify this situation This book tackles many aspects of the problem of biodiversity monitoring It arose from a major workshop held at The Australian National University in February 2011 attended by leaders in the science policy making and management arenas of biodiversity conservation Chapter contributors examine what has led to successful monitoring the key problems with biodiversity monitoring and practical solutions to those problems By capturing critical insights into successes failures and solutions the authors provide high level guidance for important initiatives such as the National Biodiversity Strategy Ultimately the authors hope to considerably improve the quality and effectiveness of biodiversity monitoring in

Australia and to arrest the decline of biodiversity **KEY FEATURES** Engaging style Practical information that is based on very high quality scientific information

Environmental Risk Assessment of Genetically Modified Organisms K.R. Hayes, S. Li, 2007 The decline of many individual and wild fish stocks has commanded an increase in aquaculture production to meet the protein demands of a growing population Alongside selective breeding schemes and expanding facilities transgenic methods have received increasing attention as a potential factor in meeting these demands With a focus on developing countries this third text in the series provides detailed information on environmental biosafety policy and regulation and presents methodologies for assessing ecological risks associated with transgenic fish Publisher website http://www.cabi.org/bk_BookDisplay.asp?PID=2054 viewed 6 December 2007

Environmental Impact Assessment Rachna Bhateria, Mona Sharma, Rimmy Singh, Sumit Kumar, 2024-08-17 This book will cover the basic principles and salient features of EIA The authors attempt to cover the shortcomings observed in EIA reports the manner of conducting EIA for proposed projects and also to facilitate the preparation of good quality EIA reports The book is written in a straightforward format avoiding long descriptive texts to enhance the reader experience Although the focus is on the Indian context the concepts and techniques of EIA described in this book are applicable universally An Environmental Management Plan EMP is also discussed and this is an essential aspect of EIA in countries where priority is on economic development by way of development projects and when the EIA process has inherent weaknesses For the continual improvement of EIA reports EIA consultants maybe assigned the task of implementing and operationalizing the suggested EMP in addition to conducting an EIA study and in preparation of an EIA report The system of peer review of EIA reports is also expected to improve EIA quality Environmental Impact Assessment A Journey to Sustainable Development is an attempt to cover EIA according to new knowledge acquired through research and experiences which will make this tool more versatile and dynamic The authors recognise that since EIA is continuously expanding and developing there will always be potential for improving the scope of this book to make it more useful to the users as per their requirement This book will be of interest to academics EIA professionals and consultants EIA review appraisal authorities and particularly stakeholders in emerging economies where major developmental work is being undertaken and which is expected to continue in decades to come

Australia's Megafires Libby Rumpff, Sarah M. Legge, Stephen van Leeuwen, Brendan A. Wintle, John C.Z. Woinarski, 2023-02-01 The Australian wildfires of 2019 20 Black Summer were devastating and unprecedented These megafires burnt more than 10 million hectares mostly of forests in southern and eastern Australia Many of the fires were uncontrollable These megafires affected many of Australia's most important conservation areas and severely impacted threatened species and ecological communities They were a consequence of climate change and offered a glimpse of how this is likely to continue to affect our future Australia's Megafires includes contributions by more than 200 researchers and managers with direct involvement in the management and conservation of the biodiversity affected by the Black Summer wildfires It provides a comprehensive

review of the impacts of these fires on all components of biodiversity and on Indigenous cultural values These fires also triggered an extraordinary and highly collaborative response by governments NGOs Indigenous groups scientists landholders and others seeking to recover the fire affected species and environments to restore Country This book documents that response It draws lessons that should be heeded to sustain that recovery and to be better prepared for the inevitable future comparable catastrophes Such lessons are of global relevance for wildfires increasingly threaten biodiversity and livelihoods across the globe

Behavioural Responses to a Changing World Bob B. M. Wong, Ulrika Candolin, 2025-04-23 For many animals behavioural adjustments represent the first response to human modified conditions By improving reproduction and survival such adjustments can play the lead in maintaining viable populations in the face of rapid environmental change Behavioural responses however can also be maladaptive and reduce individual fitness particularly if favourable reaction norms have not yet evolved because animals are encountering conditions that they have never experienced before Clearly behaviour matters But how can we capitalise on our understanding of animal behaviour to improve conservation and management outcomes Behavioural Responses to a Changing World Challenges and Applications a companion volume to the first edition published in 2012 examines wildlife behavioural responses to human induced environmental change through a translational lens Despite considerable and growing interest in research on the topic the predictive value and practical application of what has been learned remains underappreciated and underutilized in the context of developing real world solutions To redress this the current book builds upon the foundations of the original volume but with a more applied perspective that focuses on highlighting how different forms of environmental challenges from climate change to urbanisation influence animal behaviour and how we can effectively harness knowledge of animal behaviour to effect practical solutions to predicting and mitigating the weighty impacts of a radically changed and changing world

Methods of Environmental Impact Assessment Peter Morris, Riki Therivel, 2009-03-05 Environmental impact assessment EIA is now firmly established as an important and often obligatory part of proposing or launching any development project Delivering a successful EIA needs not only an understanding of the theory but also a detailed knowledge of the methods for carrying out the processes required Peter Morris and Riki Therivel bring together the latest advice on best practice from experienced practitioners to ensure an EIA is carried out correctly This new edition explains how an EIA works and how it should be carried out demonstrates the relationship of the EIA to socio economic environmental and ecological systems includes completely updated legislative and policy contexts has added explanations of shared and integrative methods including a new chapter on EIA and sustainability Invaluable to undergraduate and MSc students of EIA in planning ecology geography and environment courses this third edition of Methods of Environmental Impact Assessment is also of great use to planners EIA practitioners and professionals seeking to update their skills

Adaptive Management of Social-Ecological Systems Craig R. Allen, Ahjond S. Garmestani, 2015-04-25 Adaptive management is an approach to managing social ecological systems that

fosters learning about the systems being managed and remains at the forefront of environmental management nearly 40 years after its original conception Adaptive management persists because it allows action despite uncertainty and uncertainty is reduced when learning occurs during the management process Often termed learning by doing the allure of this management approach has entrenched the concept widely in agency direction and statutory mandates across the globe This exceptional volume is a collection of essays on the past present and future of adaptive management written by prominent authors with long experience in developing implementing and assessing adaptive management Moving forward the book provides policymakers managers and scientists a powerful tool for managing for resilience in the face of uncertainty

Effective Risk Communication Joseph Arvai,Louie Rivers III,2013-10-30 There are two questions often asked of risk communication what has been learned from past work and what is needed to push the field forward Drawing on the experience of leading risk researchers and practitioners Effective Risk Communication focuses on answering these questions The book draws together new examples of research and practice from contexts as diverse as energy generation human health nuclear waste climate change food choice and social media This book treats risk communication as much more than the interchange of risk information between experts and non experts rather it aims to emphasise the diversity in viewpoints and practices In each specially commissioned chapter the authors reflect on the theoretical and applied underpinnings of their best projects and comment on how their approach could be used effectively by others Building upon each other the chapters will provoke new discussion and action around a discipline which many feel is neither meeting important needs in practice nor living up to its potential in research Through a more careful examination of the work already done in risk communication the book will help develop better more reflective practice for the future

Risk analysis in aquaculture Lind, C.E.,Dana, G.V.,Perera, R.P.,Phillips, M.J.,2015-04-07 This publication is based on materials covered and outputs generated during the Workshop on Risk Assessment Methodologies and Tools for Aquaculture in Sub Saharan Africa which was jointly held by WorldFish and FAO in Siavonga Zambia on 28 June 2 July 2010 The workshop was delivered as a training exercise to 17 participants from seven sub Saharan countries and was designed to highlight current methodologies and tools available for environmental risk analysis in aquaculture development A key focus of the workshop was to encourage participants to consider hypothetical but realistic scenarios and to discuss issues relevant to evaluating the environmental risks of a given activity or scenario This publication presents selected scenarios from the workshop and the outcomes of the deliberative process as developed by the participants This publication is factual but not comprehensive therefore any statements or estimations of risk do not represent the actual risks arising from the described scenario It is intended to serve as an easily readable introduction to risk analysis highlighting worked examples that will provide guidance on how a risk analysis may be approached in a similar situation

Indicators and Surrogates of Biodiversity and Environmental Change David Lindenmayer,Philip Barton,Jennifer Pierson,2015-11-02 Ecological indicators and surrogates are used widely by resource

managers to monitor and understand complex biota and ecosystem processes Their potential to guide complex resource management has meant they have been proposed for use in all ecosystems worldwide Despite extensive research into indicators and surrogates there remains much controversy about their use in addition to major issues and knowledge gaps associated with their identification testing and application Indicators and Surrogates of Biodiversity and Environmental Change provides insights into the use of indicators and surrogates in natural resource management and conservation where to use them where not to use them and how to use them Using an ecological approach the chapters explore the development application and efficacy of indicators and surrogates in terrestrial aquatic marine and atmospheric environments The authors identify current gaps in knowledge and articulate the future directions for research needed to close those gaps This book is written by the world s leading thinkers in the area of indicators and surrogates It is the first major synthesis of learnings about indicators and surrogates and will be a critical resource for the vast number of people developing and applying them in ecosystems around the world It will be an essential resource for scientists policy makers and students with interests in surrogates and indicators
