Risky Business Craig E. Richards, Rima Shore, 1996 *The Risky Business of Education Policy* Christopher H.

Tienken, Carol A. Mullen, 2021-09-09 *The Risky Business of Education Policy* focuses commentary and analysis on some of the most pressing policy challenges facing public school educators and those invested in a healthy vibrant public school system. The book shares insights and makes recommendations from leading scholar practitioners namely from educational leadership and science education on ways to ponder navigate and challenge serious policy issues. The chapters present important policy topics and critical analysis of the topics from the authorial perspective of experienced educators leading the preparation of future school leaders and teachers. Through fast paced user friendly chapters contributors grapple with an education reform policy issue of the day reflecting what is contentious territory while wading through it. These educational researchers also make evidence informed practical recommendations for educators and policymakers on how to better approach the policy challenges presented so public education can be improved for all children. Each chapter contains stimulating ideas useful information and practical tips for school practitioners higher education faculty and constituent groups. **Mastering the**

Risky Business of Public-Private Partnerships in Infrastructure Manal Fouad, 2021-05-10 Investment in infrastructure can be a driving force of the economic recovery in the aftermath of the COVID 19 pandemic in the context of shrinking fiscal space. Public private partnerships PPP bring a promise of efficiency when carefully designed and managed to avoid creating unnecessary fiscal risks. But fiscal illusions prevent an understanding the sources of fiscal risks which arise in all infrastructure projects and that in PPPs present specific characteristics that need to be addressed. PPP contracts are also affected by implicit fiscal risks when they are poorly designed particularly when a government signs a PPP contract for a project with no financial sustainability. This paper reviews the advantages and inconveniences of PPPs discusses the fiscal illusions affecting them identifies a diversity of fiscal risks and presents the essentials of PPP fiscal risk management.

Handbook of Research in Education Finance and Policy Helen F. Ladd, Edward B. Fiske, 2012-08-21 Sponsored by the Association for Education Finance and Policy AEFPP this groundbreaking new handbook assembles in one place the existing research based knowledge in education finance and policy thereby helping to define this evolving field of research and practice. It provides a readily available resource for anyone seriously involved in education finance and policy in the United States and around the world. The Handbook traces the evolution of the field from its initial focus on school inputs and the revenue sources used to finance these inputs to a focus on educational outcomes and the larger policies used to achieve them. It shows how the current decision making context in school finance inevitably interacts with those of governance accountability equity privatization and other areas of education policy. Because a full understanding of the important contemporary issues requires input from a variety of perspectives the Handbook draws on contributors from a variety of disciplines. While many of the chapters cover complex state of the art empirical research the authors explain key concepts in

language that non specialists can understand **School Choice Policies and Outcomes** Walter Feinberg, Christopher Lubinski, 2008-10-16 Perhaps no school reform has generated as much interest and controversy in recent years as the proposal to have parents select their children's schools Opponents of school choice fear that rolling back the government's role will lead to profit driven financial scandals sectarianism and increased class and racial isolation School choice advocates believe that state provision oversight and regulation stifle entrepreneurial creativity The contributors to this volume not only provide a clear assessment of the logic and evidence supporting the different sides of the debate but also unmask the assumptions about the relationship between markets government and educational achievement Their message is that neither markets nor government alone will guarantee freedom equality achievement or community If choice is to improve education and advance equality then educational policy cannot be placed on automatic and left to the free market Rather choice policy must be deliberately directed toward meeting these goals and this book shows how that could be accomplished No Child Left Behind and other Federal Programs for Urban School Districts Frank Brown, Richard C. Hunter, 2006-07-04 The No Child Left Behind NCLB Act is designed to close the achievement gap between disadvantaged and disadvantaged children through its Title I program This book explores models to achieve equity in Title I schools and defines what is required of states in Title I schools It examines how each state implements NCLB accountability standards Key Legal Issues for Schools Charles J. Russo, 2013-01-04 School business officials SBOs must in many respects serve as all things to all people in their workplaces Put another way SBOs must be knowledgeable about a wide range of legal issues ranging from contracts to setting policy to state bidding laws let alone constitutional matters involving the rights of students and teachers Aware of the fact that issues involving the law are at the heart of many of a SBO's duties the chapters in this edited book have been written by a diverse array of individuals with experience as educational leaders in schools and or who possess significant expertise in the School Law In light of the need to keep SBOs up to date on many issues in the ever changing world of Education Law this volume is divided into two parts The first section deals with issues that primarily impact on the management of schools while the second deals with the rights of students and teachers More specifically each of the chapters is designed to examine a specific area about which SBOs need information While no single book can ever hope to cover all of the myriad of legal topics that SBOs and other educational leaders must master in their professional lives this book will serve as an up to date and ready source of information to help keep them abreast of the many changes in the ever evolving area of School Law A Free Market Approach to Federal Contracting United States. Congress. Senate. Committee on Governmental Affairs. Subcommittee on Oversight of Government Management, Restructuring, and the District of Columbia, 1998 **The End of Welfare?** Max B. Sawicky, 2016-07-01 Exploring the consequences of federal devolution on state budgets this work deals with three major areas of concern the effect of moving large numbers of welfare recipients into labour markets the planned federal reforms in the health care field and trends in federal aid Black Social Capital Marion Orr, 1999 Deindustrialization

white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore's African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social capital both within the African American community black social capital and outside it where social capital crosses racial lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn't necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore's decision to hire a private for profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools *Black Social Capital* offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change *Education Finance in the New Millennium* Stephen Chaikind, William J. Fowler, 2013-09-05 The 2001 Yearbook of the AEFPA reaffirms the connections between the field of education finance and the wider education community Among the topics it examines are curricula reform outcome assessment accountability community control and privatization 2001 [Resources in Education](#), 1998 **The Color of School Reform** Jeffrey R. Henig, Richard C. Hula, Marion Orr, Desiree S. Pedescleaux, 2001-01-22 Why is it so difficult to design and implement fundamental educational reform in large city schools in spite of broad popular support for change How does the politics of race complicate the challenge of building and sustaining coalitions for improving urban schools These questions have provoked a great deal of theorizing but this is the first book to explore the issues on the basis of extensive solid evidence Here a group of political scientists examines education reform in Atlanta Baltimore Detroit and Washington D C where local governmental authority has passed from white to black leaders The authors show that black administrative control of big city school systems has not translated into broad improvements in the quality of public education within black led cities Race can be crucial however in fostering the broad civic involvement perhaps most needed for school reform In each city examined reform efforts often arise but collapse partly because leaders are unable to craft

effective political coalitions that would commit community resources to a concrete policy agenda What undermines the leadership according to the authors is the complex role of race in each city First public authority does not guarantee access to private resources usually still controlled by white economic elites Second local authorities must interact with external actors at the state and national levels who remain predominantly white Finally issues of race divide the African American community itself and often place limits on what leaders can and cannot do Filled with insightful explanations together with recommendations for policy change this book is an important component of the debate now being waged among researchers education activists and the community as a whole

Changing Urban Education Clarence Nathan Stone, 1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation's leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future

Governing by Contract Phillip J. Cooper, Phillip Cooper, 2002-07-01 Is the public getting a good deal when the government contracts out the delivery of goods and services Phillip Cooper attempts to get at the heart of this question by exploring what happens when public sector organizations at the federal state and local levels form working relationships with other agencies communities non profit organizations and private firms through contracts Rather than focus on the ongoing

debate over privatization the book emphasizes the tools managers need to form operate terminate or transform these contracts amidst a complex web of intergovernmental relations Cooper frames the issues of public contract management by showing how managers are caught in between governance by authority and government by contract By looking at cases ranging from the management of Baltimore schools to the contracting of senior citizen programs in Kansas he offers practical information to students and practitioners and a theoretical context for their work At every turn the author avoids bogging readers down in technical jargon Instead the book sheds light on a crucial part of any public manager s job with lively case material and no nonsense guidance for making the most of taxpayer dollars **Educational Leadership** Bruce A.

Jones,2000-05-15 The contributors provided in this book shed light on and initiate debates about important policy issues associated with education reform and improvement The authors do this by linking conceptual frameworks to past research analyzing these challenges and speculating about the contours of future research and school practice Centering on policy research based examinations of the future in public education in the United States this book examines policy issues as they relate to public education governance finance curriculum development and community relations At a conceptual level the volume explores along several dimensions whether or not public education should exist in its current form and what is the connection between future configurations of public education policy development and the global economy *Where Charter School Policy Fails* Amy Stuart Wells,2002 In this provocative volume Amy Stuart Wells and her co authors provide evidence that the laissez faire policies of charter school reform often exacerbate existing inequalities in our schools Providing the most comprehensive critical review of charter schools to date this timely volume is based on the authors in depth study of 10 urban suburban and rural school districts and 17 diverse charter schools in California plus their analysis of other charter school studies from around the country Focusing on two central issues accountability and equity they explore how charter school policies affect the lives of children educators and parents in diverse social economic and political contexts The authors conclude that although the quality and experiences of charter schools is highly varied across different contexts the laws that allow these schools to exist fail to assure meaningful accountability Meanwhile these policies increase inequality and stratification by pushing the educational system toward privatization in terms of finance and admissions while failing to target much needed resources toward low income communities This dynamic book will help educators and policymakers develop a future policy agenda for charter school reform that will be more responsive to the needs of all children The authors for the first time make sense of the diverse and diffuse charter school movement They argue that the lack of support the absence of equity provisions in state laws and the burnout of many charter school personnel have led to the beginning of the end of this yet another school reform This book provides important lessons for all who care about public education Jean Anyon Graduate Center City University of New York *Surmounting All Odds - Vol. 1* Carol Camp Yeakey,Ronald D.
