Appropriations,2006 **The Book of Agreement** Stewart Levine,2010-06 Teaches a fundamental life skill crafting mutually satisfying agreements Describes ten essential elements for designing agreements focused on achieving results rather than providing remedies for what might go wrong a more effective alternative to the traditional legal adversarial approach Includes thirty model agreements for business personal and professional uses Crafting agreements with others is a fundamental life skill Unfortunately we were never taught how to do it The agreements most people make are incomplete and ineffective they usually focus on protecting against what might go wrong instead of figuring out how to make things go right The Book of Agreement offers a new approach Stewart Levine demonstrates the superiority of agreements for results versus agreements for protection and outlines ten principles for creating agreements that explicitly articulate desired outcomes and provide a roadmap to achieving them He includes over thirty specific templates that can be used to create this new type of agreement for results in a variety of organizational and personal contexts **Cognitive Approaches to Tense, Aspect, and Epistemic Modality** Adeline Patard, Frank Brisard,2011 This volume addresses problems of semantics regarding the analysis of tense and aspect TA markers in a variety of languages including Arabic Croatian English French German Russian Thai and Turkish Its main interest goes out to epistemic uses of such markers whereby epistemic modality is understood as indicating a degree of compatibility between the modal world and the factual world Declerck All contributions moreover tackle these problems from a more or less cognitive point of view with some of them insisting on the need to provide a unifying explanation for all usage types temporal and non temporal and all of them accepting the premise that the semantics of TA categories essentially refers to subjective rather than objective concerns The volume also represents one of the first attempts to gather accounts of TA marking in various languages that are explicitly set within the framework of Cognitive Grammar Ultimately this volume aims to contribute to establishing an awareness that modal meaning elements are directly relevant to the analysis of the grammar of time **Three Rims and a Hubcap** Gentile,2016-03-29 It is impossible to judge individuals who are not like us because each persons view is different Vantage point is not based on right or wrong but on survival or extensions In this work of fiction the seat of evil shines brightest at night *PeopleSmart* Freda Hansburg,2000 It turns out that when you become savvy about other people or people smart you become smarter about yourself as well That s the hidden practical message in Mel Silberman and Freda Hansburg s intelligent new book They bring their considerable expertise and hands on experience to bear in these lessons on building interpersonal skills Simply laid out yet well written and concise the book walks you through the sets of skills you need to master As you learn to understand and apply them you gradually sense the impact these skills can have on your ability to lead and excel getAbstract recommends this book to those who are interested in improving their people skills and remember you re a people too *PeopleSmart* Mel Silberman,Freda Hansburg,2000-06-12 WE ARE ALL in the people business because we deal with other people all the time But do you sometimes reach out to others only to find your efforts misunderstood or rejected Do you wish your relationships with people
