Ritual Implements Tools And Objects Of Chinese Buddhism:

Ritual Implements, Tools & Objects of Chinese Buddhism Harry Leong, 2001 **The Oxford Handbook of American Buddhism** Ann Gleig, Scott A. Mitchell, 2024 The Oxford Handbook of American Buddhism offers the most comprehensive and up to date scholarship available on Buddhism in America It charts the history and diversity of Buddhist communities including traditions and communities that have been previously neglected and looks at the ways in which Buddhist practices such as mindfulness meditation have been adopted in non Buddhist settings The Impact of Buddhism on Chinese Material Culture John Kieschnick, 2020-06-16 From the first century when Buddhism entered China the foreign religion shaped Chinese philosophy beliefs and ritual At the same time Buddhism had a profound effect on the material world of the Chinese This wide ranging study shows that Buddhism brought with it a vast array of objects big and small relics treasured as parts of the body of the Buddha prayer beads and monastic clothing as well as new ideas about what objects could do and how they should be treated Kieschnick argues that even some everyday objects not ordinarily associated with Buddhism bridges tea and the chair on closer inspection turn out to have been intimately tied to Buddhist ideas and practices Long after Buddhism ceased to be a major force in India it continued to influence the development of material culture in China as it does to the present day At first glance this seems surprising Many Buddhist scriptures and thinkers rejected the material world or even denied its existence with great enthusiasm and sophistication Others however from Buddhist philosophers to ordinary devotees embraced objects as a means of expressing religious sentiments and doctrines What was a sad sign of compromise and decline for some was seen as strength and versatility by others Yielding rich insights through its innovative analysis of particular types of objects this briskly written book is the first to systematically examine the ambivalent relationship in the Chinese context between Buddhism and material culture *The Material Culture of Death in Medieval Japan* Karen Margaret Gerhart, 2009-07-29 This study is the first in the English language to explore the ways medieval Japanese sought to overcome their sense of powerlessness over death By attending to both religious practice and ritual objects used in funerals in the fourteenth and fifteenth centuries it seeks to provide a new understanding of the relationship between the two Karen Gerhart looks at how these special objects and rituals functioned by analyzing case studies culled from written records diaries and illustrated handscrolls and by examining surviving funerary structures and painted and sculpted images The work is divided into two parts beginning with compelling depictions of funerary and memorial rites of several members of the aristocracy and military elite The second part addresses the material culture of death and analyzes objects meant to sequester the dead from the living screens shrouds coffins carriages wooden fences This is followed by an examination of implements banners canopies censers musical instruments offering vessels used in memorial rituals The final chapter discusses the various types of and uses for portraits of the deceased focusing on the manner of their display the patrons who commissioned them and the types of rituals performed in front of them Gerhart delineates the distinction between objects

created for a single funeral and meant for use in close proximity to the body such as coffins and those such as banners intended for use in multiple funerals and other Buddhist services Richly detailed and generously illustrated Gerhart introduces a new perspective on objects typically either overlooked by scholars or valued primarily for their artistic qualities By placing them in the context of ritual visual and material culture she reveals how rituals and ritual objects together helped to comfort the living and improve the deceased's situation in the afterlife as well as to guide and cement societal norms of class and gender Not only does her book make a significant contribution in the impressive amount of new information that it introduces it also makes an important theoretical contribution as well in its interweaving of the interests and approaches of the art historian and the historian of religion By directly engaging and challenging methodologies relevant to ritual studies material culture and art history it changes once and for all our way of thinking about the visual and religious culture of premodern Japan

Buddhism and Iconoclasm in East Asia Fabio Rambelli, Eric Reinders, 2012-11-08 A study of Buddhism and iconoclasm in East Asia as part of a general theory of religious destruction

Countless Sands Jeffrey Moser, Jason Protass, 2024-12-31 Countless Sands presents engaging analyses of the diverse relationships between Buddhism and the environment that existed in medieval Asia Recent years have witnessed a surge in publications across the humanities that advance powerful ethical and political arguments to account for the human failure to respond effectively to global climate change While the contributors to this volume are attuned to this challenge rather than present explicit political arguments they pursue a subtler effort to historicize the environment as a site and subject of Buddhist practice while providing research grounded in rigorous analysis of complex and fragmentary sources The volume thereby mitigates against the Orientalist East West binaries that have long informed the invocation of Buddhism in Euro American environmental discourses As the chapters collectively demonstrate there was no singular consistently Buddhist understanding of the natural world but innumerable varied engagements preserved in discrete texts images and artifacts Through specific case studies the authors consider such questions as How did premodern Buddhists understand what we today call the environment How did they think about their earth How when and where did the various processes of the earth actually impinge on the practices of historical Buddhists What kinds of environmental imaginations informed specific Buddhist practices In so doing the authors explore the connections between the ways in which historical Buddhist communities interacted with their environments and how they understood those environments In the broader field of Buddhist studies Countless Sands contributes to ongoing efforts to expand the locus of inquiry from textually based investigations of Buddhist doctrine to a broader examination of the complex and varied place of Buddhism in the lives of historical communities The book furthers this broader process by casting it in environmental terms and will engage readers looking for models of thought provoking historical analysis on environmental themes

Culture and Ideology at an Invented Place Zhang Pinggong, 2009-03-26 Being a special kind of landscape the theme park has become one of major subjects in interdisciplinary studies and received increasing scholarly

attention in the past few decades Perspectives have varied from American approaches which treat the theme park as the production base of the American Dream to various interpretation of the tourist space in semiotic structural and post modernistic approaches Other studies of the theme park have been conducted in a practical way with a focus in economic development and urban designing for the local and peripheral surroundings The body of research is enormous and has proved to be very beneficial in understanding the theme park as a multiple space in the ever changing context Overseas Chinese Town theme park OCT is one of the most popular tourist sights in China a cultural space which epitomizes the country s cultural business and Shenzhen Special Economic Zone an emerging metropolis As the ultimate icon of Chinese and global cultural representation the theme park has attracted visitors the world over This book presents for the first time an analysis of narratives which surround the park The research of OCT is to shed a cultural political and ideological light on the modern pleasure space constructed and consumed in contemporary China In view of the overwhelming quantity of theme park study in the USA and Europe a shift of orientation in the study of theme parks in China becomes significant as the emerging theme parks in the country are described as springing up like bamboo shoots after a rain As an important study of an important contemporary phenomenon it illustrates in considerable detail the distinctive nature of Chinese theme park development and will be of interest to a range of readers in fields such as cultural studies tourism sociology and human geography Non Western theme parks have attracted very little attention from social scientists even though they can be considered important sites for the examination of the influence and limits of globalization With this important study of the OCT theme park Zhang provides us with a detailed examination of the extent to which the Western model of the theme park is replicated in the Chinese context In this way he provides crucial insights that will be of great interest to students of globalization Professor Alan Bryman University of Leicester The work provides a very readable critical review of the recent development of theme parks in China in particular the Overseas Chinese Town Theme Park at Shenzhen The work is well grounded in a critical understanding of the role of theme parks as cultural texts As an important study of an important contemporary phenomenon it illustrates in considerable detail the distinctive nature of OCT park and will be of interest to a range of readers in fields such as cultural studies tourism sociology and human geography Professor Stephen Williams Staffordshire University

What's the Use of Art? Jan Mrazek, Morgan Pitelka, 2007-12-03 Post Enlightenment notions of culture which have been naturalized in the West for centuries require that art be autonomously beautiful universal and devoid of any practical purpose The authors of this multidisciplinary volume seek to complicate this understanding of art by examining art objects from across Asia with attention to their functional ritual and everyday contexts From tea bowls used in the Japanese tea ceremony to television broadcasts of Javanese puppet theater from Indian wedding chamber paintings to art looted by the British army from the Chinese emperor s palace from the adventures of a Balinese magical dagger to the political functions of classical Khmer images the authors challenge prevailing notions of artistic value by introducing new ways of thinking about culture The chapters consider art objects as they are involved in the world how they operate and are experienced in specific sites collections rituals performances political and religious events and imagination and in individual peoples lives how they move from one context to another and change meaning and value in the process for example when they are collected traded and looted or when their images appear in art history textbooks how their memories and pasts are or are not part of their meaning and experience Rather than lead to a single universalizing definition of art the essays offer multiple divergent and case specific answers to the question What is the use of art and argue for the need to study art as it is used and experienced Contributors Cynthia J Bogel Louise Cort Richard H Davis Robert DeCaroli James L Hevia Janet Hoskins Kaja McGowan Jan Mr zek Lene Pedersen Morgan Pitelka Ashley Thompson
