Robo Sapiens Japanicus Jennifer Robertson, 2018 Japan is arguably the first postindustrial society to embrace the prospect of human robot coexistence Over the past decade Japanese humanoid robots designed for use in homes hospitals offices and schools have become celebrated in mass and social media throughout the world In *Robo sapiens japanicus* Jennifer Robertson casts a critical eye on press releases and public relations videos that misrepresent robots as being as versatile and agile as their science fiction counterparts An ethnography and sociocultural history of governmental and academic discourse of human robot relations in Japan this book explores how actual robots humanoids androids and animaloids are imagineered in ways that reinforce the conventional sex gender system and political economic status quo In addition Robertson interrogates the notion of human exceptionalism as she considers whether civil rights should be granted to robots Similarly she juxtaposes how robots and robotic exoskeletons reinforce a conception of the normal body with a deconstruction of the much invoked Theory of the Uncanny Valley *Robo sapiens japanicus* Jennifer Robertson, 2017-11-10 Japan is arguably the first postindustrial society to embrace the prospect of human robot coexistence Over the past decade Japanese humanoid robots designed for use in homes hospitals offices and schools have become celebrated in mass and social media throughout the world In *Robo sapiens japanicus* Jennifer Robertson casts a critical eye on press releases and public relations videos that misrepresent robots as being as versatile and agile as their science fiction counterparts An ethnography and sociocultural history of governmental and academic discourse of human robot relations in Japan this book explores how actual robots humanoids androids and animaloids are imagineered in ways that reinforce the conventional sex gender system and political economic status quo In addition Robertson interrogates the notion of human exceptionalism as she considers whether civil rights should be granted to robots Similarly she juxtaposes how robots and robotic exoskeletons reinforce a conception of the normal body with a deconstruction of the much invoked Theory of the Uncanny Valley **Robo sapiens** C. Robert Cargill, 2019-05-13 *Our Molecular Future* Douglas Mulhall, 2010-01-28 This is a vital book for those who care about the environment society and deploying new technology to check the destructive power of humankind Allan Thornton President Environmental Investigation Agency Washington DC and recipient of the Albert Schweitzer Medal This book will shake conventional environmental wisdom to its roots A landmark work that should be read by environmentalists and businesspersons alike Patrick Moore cofounder Greenpeace president Greenspirit In *Our Molecular Future* Mulhall neatly outlines why our increasing ability to manipulate single atoms and molecules is a concern and lays out the opportunities and threats this technology presents And it's surprisingly readable unlike most of the nanobabble in the science journals In the end as Mulhall admits he poses more questions than he answers But that's a good place to start New Scientist I just finished

reading Douglas Mulhall's outstanding new book *Our Molecular Future* and I highly recommend it. Put this one at the top of your list. In an easy to read format with very few forays into geek speak, Mulhall presents his well considered and thoroughly researched theories. Overall an excellent overview for those who wish to understand how disruptive and enabling technologies may save us from ourselves and from mother nature. And along the way you will learn a lot about how nanoscale technologies may enhance our lives, provide abundance for all and greatly raise the standard of living for everyone. Rating five stars out of five. Rocky Rawstern, *Nanotech Now*. What Alvin Toffler's *Future Shock* was to the 20th century, *Our Molecular Future* will be to the 21st century. What will happen to our jobs, health care and investments when the molecular revolution hits? How might artificial intelligence transform our lives? How can molecular technologies help us cope with climate changes, earthquakes and other extreme natural threats? *Our Molecular Future* explores some intriguing possibilities that answer these questions and many others. Douglas Mulhall describes the exponential changes that are about to be wrought by the nanotechnology and robotic revolutions which promise to reduce the scale of computing to the nanometer, a billionth of a meter, while increasing computing power to almost unimaginable levels. The resulting convergence of genetics, robotics and artificial intelligence may give us hitherto undreamed of capacities to transform our environment and ourselves. In the not so distant future, our world may include machines that scour our arteries to prevent heart disease, cars and clothes that change color at our whim, exotic products built in our own desktop factories and enhancements to our personal financial security despite greatly accelerated obsolescence. But while technology is making these fantastic leaps, we may also encounter surprises that throw us into disarray: climate changes, earthquakes or even a seemingly improbable asteroid collision. These extremes are not the nightmare scenarios of sensationalists. Mulhall stresses, nor are many of them human induced. Instead, they may be part of nature's cycle, recurring more often than we've thought possible. The good news is that this convergence of catastrophe and technological transformation may work to our advantage. If we're smart, according to Mulhall, we can use molecular machines to protect ourselves from nature's worst extremes and harness their potential benefits to usher in an economic renaissance. This visionary link between future technology and past disasters is a valuable guide for every one of us who wants to be prepared for the twenty first century. Further Praise for *OUR MOLECULAR FUTURE*: A provocative and profoundly convincing message from the future. Graham Hancock, archaeological journalist and author of *Fingerprints of the Gods*. In a breezy journalistic style, *Our Molecular Future* takes us on a tour through some of the issues that will preoccupy ma

Contemporary Women's Post-Apocalyptic Fiction Susan Watkins, 2020-02-29 This book examines how contemporary women novelists have successfully transformed and rewritten the conventions of post apocalyptic fiction. Since the dawn of the new millennium, there has been an outpouring of writing that depicts the end of the world as we know it, and women writers are no exception to this trend. However, the book argues that their fiction is distinctive. Contemporary women's work in this genre avoids conservatism, a nostalgic mourning for the past, and the focus on restoring what has been lost, aspects key

to much male authored apocalyptic fiction Instead contemporary women writers show readers the ways in which patriarchy and neo colonialism are intrinsically implicated in the disasters they envision and offer qualified hope for a new beginning for society culture and literature after an imagined apocalyptic event Exploring science nature and matter the posthuman body the maternal imaginary time narrative and history literature and the word and the post secular the book covers a wide variety of writers and addresses issues of nationality race and ethnicity as well as gender and sexuality Cooler Than Fiction Jill S. Jarrell,Tara C. Cannon,2014-01-10 Designed for public librarians school media specialists teachers and anyone with an interest in supporting teen literacy this book features 133 nonfiction booktalks to use with both voracious and reluctant teen readers These booktalks cover a wide and varied range of nonfiction genres including science nature history biography graphic novels true crime art and much more Each includes a set of discussion questions and sample project ideas which could be easily expanded into a classroom lesson plan or full library program Also included are several guidelines for classroom integration tips for making booktalks more interactive and interesting and selections for further reading *The History of British Women's Writing, 1970-Present* Mary Eagleton,Emma Parker,2016-04-29 This book maps the most active and vibrant period in the history of British women s writing Examining changes and continuities in fiction poetry drama and journalism as well as women s engagement with a range of literary and popular genres the essays in this volume highlight the range and diversity of women s writing since 1970 *Robo Sapiens: Tales of Tomorrow (Omnibus)* Toranosuke Shimada,2021-11-23 In the future robots are more than machines Autonomous cyber persons with A I brains are part of society interacting with humans while developing their own culture In fact they may be surpassing humans as biological homo sapiens have begun to die out and give way to robo sapiens But are humans truly disappearing or are robots the newest form of humanity This millennia spanning speculative science fiction manga of interconnected stories both human and robotic was awarded the Division Grand Prize at the 2020 Japan Media Arts Festival **Ecofeminist Science Fiction** Douglas A. Vakoch,2021-04-29 Ecofeminist Science Fiction International Perspectives on Gender Ecology and Literature provides guidance in navigating some of the most pressing dangers we face today Science fiction helps us face problems that threaten the very existence of humankind by giving us the emotional distance to see our current situation from afar separated in our imaginations through time space or circumstance Extrapolating from contemporary science science fiction allows a critique of modern society imagining more life affirming alternatives In this collection ecocritics from five continents scrutinize science fiction for insights into the fundamental changes we need to make to survive and thrive as a species Contributors examine ecofeminist themes in films such as Avatar Star Wars and The Stepford Wives as well as television series including Doctor Who and Westworld Other scholars explore an internationally diverse group of both canonical and lesser known science fiction writers including Oreet Ashery Iraj Fazel Bakhsheshi Liu Cixin Louise Erdrich Hanns Heinz Ewers Larissa Lai Ursula K Le Guin Chen Qiufan Mary Doria Russell Larissa Sansour Karen Traviss and Jeanette Winterson

Ecofeminist Science Fiction explores the origins of human caused environmental change in the twin oppressions of women and of nature driven by patriarchal power and ideologies Female embodiment is examined through diverse natural and artificial forms and queer ecologies challenge heteronormativity The links between war and environmental destruction are analyzed and the capitalist motivations and means for exploiting nature are critiqued through postcolonial perspectives
