 María Alonso-Zarza, Lawrence H. Tanner, 2006-01-01 This volume presents current understanding of the mechanisms and
 environments of the formation of calcretes and palustrine carbonates Through a series of specific field examples papers in
 this volume illustrate the wide variety of potential applications of these types of deposits The papers presented here cover a
 wide array of ages and environmental settings of calcrete and palustrine deposition and include many interesting
 applications such as the climatic and geomorphic controls on calcrete formation possible modern analogues for palustrine
 carbonates the interplay between palustrine pedogenic and diagenetic processes the utility of radio isotopic methods for
 dating pedogenic carbonates applications to understanding landscape evolution and reconstruction of diagenetic sequences
 The result is a state of the art book on these deposits so common in the geological record and in recent environments
