Rock Engravings Of Southern Africa:

The Rock Art of Southern Africa J. David Lewis-Williams, 1983-11-03 **The Meaning of South African Rock Paintings** Lenka Tucek, 2007-09-26 Seminar paper from the year 2001 in the subject Art Painting grade 1 A Nelson Mandela Metropolitan University Faculty of Arts course Course South African Archaeology and Ethno history SA 301 9 entries in the bibliography language English abstract One aspect of the wealth of material evidence left behind by the early people are the pictures in south african rock art They occur in paintings and engravings In 1996 the total number of sites in South Africa was estimated to be a little over 10 000 but the actual number of sites is significantly undercounted It is still not known exactly when the artists started to make rock art although new techniques of radiocarbon dating using very small samples of paint open the possibility of an absolute chronology The oldest example of rock art in Africa was found in 1969 by Eric Wendt in the southern region of Namibia at a site called Apollo 11 After various datings mainly with the radiocarbon method archaeologists concluded that the rock art tradition in southern africa is at least 27 500 years old In South Africa the oldest dated rock art is an engraving in the Northern Cape which was found on a small slab of dolomite at the Wonderwerk Cave south of Kuruman It has a radiocarbon date of c 10 200 BP Rock paintings are found in the mountainous parts of the subcontinent in abundant rock shelters and shallow overhangs while engravings were generally made on the interior plateau of South Africa There are about 1600 paintings in South Africa In this assignment I will focus on the meaning of rock paintings on the specific symbols and their importance for the early people In Chapter Two I provide a short introduction about the artists and their methods Then I will explain the three important approaches to reveal the meaning of rock art described by Lewis Williams and give some examples of misinterpretations of rock paintings Chapter Three deals with the spiritual world and shamanism in the society **Contested Images** Thomas A. Dowson, J. David Lewis-Williams, 1994 This volume brings together the work of a number of scholars in the field of rock art studies who engage the so called trance hypothesis in terms of their own empirical data and theoretical interests **The Rock Art of Africa** A.R. Willcox, 2018-01-29 It has long been known that all forms of art rock paintings carvings and scribings and also portable sculpture are present at various locations throughout Africa This book was the first inclusive survey and brings together in one volume accounts of African rock art which were previously scattered in scholarly monographs journals and travellers tales The range of the coverage is geophysically comprehensive from the Atlas Mountains to the Cape of Good Hope The art styles are set into a firm chronological framework and are displayed against a background of human physical and cultural evolution Considerable discussion is also devoted to the varied purposes which the paintings and carvings served in the communities which produced them looking at the differing interpretations fully and fairly A fascinating collection of illustrations some in colour truly reflects the variety of forms in which African rock art is manifested Originally published 1984 **Visionary Animal** Renaud Ego, 2019-01-01 An illustrated collection that takes stock of current knowledge and

proposes a new way of reading indigenous art For thousands of years nomadic hunter gatherers assigned a fundamental role to the visualization of the animals who shared their lives Some such as the Cape eland the largest of antelopes were the object of a fascinated gaze as though the graceful markings and shapes of their bodies were the key to secret knowledge safeguarded by the animals unsettling silence Renaud Ego posits that the artists sought to steal the animals secret through an act of rendering visible a vitality that remained hidden beneath appearances In this process the San themselves became the visionary animal who possessing the gift of making pictures would acquire far seeing powers Thanks to the singular effectiveness of their visual art they could make intellectual contact with the world in order better to think and ultimately to act They gained access to the full dimension of their human condition through painting scenes that functioned like visual contracts with spiritual and ancestral powers Their art is an act that seeks to preserve the wholeness of existence through a respect for the relationships linking all beings both real and imaginary who partake of it The fundamentally ecological dimension of this message confers on San art its universality and contemporary relevance Visionary Animal is a translation of L Animal voyant published in France in 2015 This rich collection of essays is beautifully illustrated with the author s photographs of rock art from across southern Africa

The Hunter and His Art Jalmar Rudner,Ione Rudner,1970 This book has been written in part for the layman and in part for the serious student of rock art The main archaeological discussion is in chapter four for those who are interested while the history of the study of rock art is in chapter six The pictures have been described and discussed as one would do when confronting them on the rocks The rock shelters and the landscape around them have been described as well in order to give the reader some idea of the setting of the art The shelter where the picture was originally traced was the home or sanctuary of the painter and his people and the valley or the mountain where the shelter was found was his living and hunting ground and perhaps a refuge where he could live in relative safety from enemies
