Whitley, 2001 While there has always been a large public interest in ancient pictures painted or carved on stone the archaeological study of rock art is in its infancy But intensive amounts of research has revolutionized this field in the past decade New methods of dating and analysis help to pinpoint the makers of these beautiful images new interpretive models help us understand this art in relation to culture Identification conservation and management of rock art sites have become major issues in historical preservation worldwide And the number of archaeologically attested sites has mushroomed In this handbook the leading researchers in the rock art area provide cogent state of the art summaries of the technical interpretive and regional advances in rock art research The book offers a comprehensive basic reference of current information on key topics over six continents for archaeologists anthropologists art historians and rock art enthusiasts [Rock Art Research](#), 2006 [Cave](#) Ralph Crane, Lisa Fletcher, 2015-04-15 Shortlisted for the Tratman Award 2015 To enter caves is to venture beyond the realm of the everyday From huge vaulted caverns to impassable water filled passages from the karst topography of Guilin in China to the lava tubes of Hawaii from tiny remote pilgrimage sites to massive tourism enterprises caves are places of mystery Dark spaces that remain largely unexplored caves are astonishing wonders of nature and habitats for exotic flora and fauna This book investigates the natural and cultural history of caves and considers the roles caves have played in the human imagination and experience of the natural world It explores the long history of the human fascination with caves across countries and continents examining their dual role as spaces of both wonder and fear It tells the tales of the adventurers who pioneered the science of caves and those of the explorers and cave divers still searching for new unmapped routes deep into the earth This book explores the lure of the subterranean world by examining caving and cave tourism and by looking to the mythology literature and art of caves This lavishly illustrated book will appeal to general readers and experts alike interested in the ecology and use of caves or the extraordinary artistic responses earth's dark recesses have evoked over the centuries *The Generation of Life* Michael A. Susko, 2020-10-15 This work explores the meaning of imagery found on rocks especially from deep caves of the paleolithic era It approaches the problem of interpretation by focusing on a key concept that art and ritual generate life A novel hypothesis is also offered that creativity emerges from a tension between chaotic elements and more formed shapes Past interpretive frames statistical studies and indigenous parallels are summoned to examine these archetypal expressions We invite you to explore indigenous imagery as an adventure that opens up your own spiritual dimension and earliest roots *Sacred Darkness* Holley Moyes, 2012-09-01 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic

caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In *Sacred Darkness* contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice Covering the ritual use of caves in Europe Asia Australia Africa Mesoamerica and the US Southwest and Eastern woodlands this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices This state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves **Archaeology of Religion** Sharon R.
