Messner, 2021 In recent decades there has been a generational shift of the US veterans peace movement from one grounded mostly in the experiences of older white men of the Vietnam War era to one informed by a young diverse cohort of post 9/11 veterans In Unconventional Combat Michael A. Messner traces this transformation through the life history interviews of six veterans of color to show how their experiences of sexual and gender harassment sexual assault racist and homophobic abuse during their military service has shaped their political views and action Drawing upon participant observation with the Veterans For Peace and About Face organizations and interviews with older male veterans as his backdrop Messner shows how veterans' military experiences form their collective situated knowledge of intersecting oppressions This knowledge Messner argues further shapes their intersectional praxis which promises to transform the veterans peace movement and potentially link their anti-militarist work with other movement groups working for change As intersectionality has increasingly become

central to the conversation on social movements Unconventional Combat is not only a story about the US veterans peace movement but it also offers broad relevance to the larger world of social justice activism

*Political Fallout* Toshihiro Higuchi, 2020-05-05 Political Fallout is the story of one of the first human driven truly global environmental crises radioactive fallout from nuclear weapons testing during the Cold War and the international response Beginning in 1945 the United States Britain and the Soviet Union detonated hundreds of nuclear weapons in the atmosphere scattering a massive amount of radioactivity across the globe The scale of contamination was so vast and radioactive decay so slow that the cumulative effect on humans and the environment is still difficult to fully comprehend The international debate over nuclear fallout turned global radioactive contamination into an environmental issue eventually leading the nuclear superpowers to sign the landmark Partial Test Ban Treaty PTBT in 1963 Bringing together environmental history and Cold War history Toshihiro Higuchi argues that the PTBT originally proposed as an arms control measure

transformed into a dual purpose initiative to check the nuclear arms race and radioactive pollution simultaneously Higuchi draws on sources in English Russian and Japanese considering both the epistemic differences that emerged in different scientific communities in the 1950s and the way that public consciousness around the risks of radioactive fallout influenced policy in turn Political Fallout addresses the implications of science and policymaking in the Anthropocene an era in which humans are confronting environmental changes of their own making
