An Eames Anthology Charles Eames, Ray Eames, 2015-01-01. An Eames Anthology collects for the first time the writings of American designers Charles (1907-1978) and Ray Eames (1912-1988). Celebrated for their groundbreaking work in graphic design, industrial design, exhibition design, architecture, and film, the Eameses' prolific and influential career changed the way Americans saw and thought about everyday objects. Widely known as professional collaborators, Charles and Ray were also a married couple, and the texts collected here reveal a behind-the-scenes look at the myriad motivations, inspirations, and outcomes of their partnership over fifty years. Previously unpublished materials, such as handwritten notes and correspondence, are featured chronologically alongside articles, exhibition reviews, editorials, conference papers, and magazine covers, as well as sections from oral history. The anthology explores the Eameses' iconic projects, such as Case Study House 9 and the molded plywood chair, as well as their work for major corporations as both designers (Herman Miller) and consultants (IBM, Polaroid). Personal correspondence with luminaries such as Henry Ford, Richard Neutra, and Eero Saarinen, among many others, provides insight into the forces behind the advance of modernity in mid-century America.

A History of Arab Graphic Design Bahia Shehab, Haytham Nawar, 2020-12-15. The first ever book-length history of Arab graphic design. PROSE AWARD WINNER. ART HISTORY CRITICISM. Arab graphic design emerged in the early twentieth century out of a need to influence and give expression to the far-reaching economic, social, and political changes that were taking place in the Arab world at the time. But graphic design as a formally recognized genre of visual art only came into its own in the region in the twenty-first century, and to date there has been no published study on the subject to speak of. *A History of Arab Graphic Design* traces the people and events that were integral to the shaping of a field of graphic design in the Arab world. Examining the work of over eighty key designers from Morocco to Iraq and covering the period from pre-1900 to the end of the twentieth century, Bahia Shehab and Haytham Nawar chart the development of design in the region, beginning with Islamic art and Arabic calligraphy and their impact on Arab visual culture through to the digital revolution and the arrival of the Internet. They look at how cinema, economic prosperity, and political and cultural events gave birth to and shaped the founders of Arab graphic design. Highlighting the work of key designers and stunningly illustrated with over 600 color images,

A History of Arab Graphic Design is an invaluable resource tool for graphic designers one which it is hoped will place Arab visual culture and design on the map of a thriving international design discourse **Opening the Gates** Donald

Reid, 2018-06-12 How the occupation of a watch factory became one of the iconic labor struggles after May 1968 In 1973 faced with massive layoffs workers at the legendary Lip watch firm in Besançon France occupied their factory to demand that no one lose their job They seized watches and watch parts assembled and sold watches and paid their own salaries Their actions recaptured the ideals of May 1968 when 11 million workers had gone on strike to demand greater autonomy and to overturn the status quo Educated by 68 the men and women at the Besançon factory formed committees to control every aspect of what became a national struggle Female employees developed a working class feminism combating workplace sexual harassment and male control of the union The endurance of the Lip movement and its appeal through the 1970s came from its rich democratic participatory culture The factory workers welcomed supporters and engaged with them an expression of solidarity between blue collar and student activists that built on the legacy of 1968 **Opening the Gates The Lip Affair 1968 1981** is the first account of all facets of the experience drawing extensively on unpublished materials to reconstruct the vision and practice of those involved The Lip workers struggle was the last widespread expression in France of the belief that creativity and moral autonomy are the driving force of social transformation It brought about what Sartre called the extension of the field of possibilities not just for workers but for all those who gave the movement support and meaning **Going Real: The Value of Design in the Era of PostCapitalism** Giovanni Innella, Marco Petroni, 2019-10-31

In the age of post capitalism what is the value of design Is value defined by economic potential Or is it something far less tangible Now more than ever design has the ability to engage us in economic political and cultural debate to actively resist the monotony of daily life and to counteract the precarious situation on which modern society seems to rest Positioning itself as a lens through which to view the world design allows us and in some cases even forces us to reflect on the many aspects of the societies in which we live Divided into three chapters **GOING REAL** positions itself in relation to the works of Marc Jongen Maurizio Lazzarato Adam Greenfield and Tiziana Terranova among others However unlike the abovementioned authors this book draws on the works of selected designers and artists to reflect on the economic political and cultural aspects of our post capitalist societies Beginning with an in depth case study of Detroit during the downfall of the industrial era this volume moves on to a timely and provocative insight into the human crises surrounding current migration trends with a particular focus on Calais Finally in the third chapter the human body itself is laid bare as the authors analyse how and why the most personal of spaces became not only the ultimate marketplace for businesses but also an object of control for governments **Future Transport in Cities** Brian Richards, 2012-09-10 Cities around the world are being wrecked by the ever increasing burden of traffic A significant part of the problem is the enduring popularity of the private car still an attractive and convenient option to many who turn a blind eye to the environmental and public health impact Public transport

has always seemed to take second place to the car and yet alternative ways of moving around cities are possible Measures to improve public transport as well as initiatives to encourage walking and cycling have been introduced in many large cities to decrease car use or at least persuade people to use their cars in different ways This book explores many of the measures being tried It takes the best examples from around the world and illustrates the work of those architects and urban planners who have produced some of the most significant models of transport architecture and city planning The book examines the ways in which new systems are evolving and how these are being integrated into the urban environment It suggests a future where it could be mandatory to provide systems of horizontal movement within large scale development using the analogy of the lift upon which every high rise building depends In so doing future cities could evolve without dependence on the private car **Official Gazette of the United States Patent and Trademark Office** ,1997 *Analogue* Deyan

Sudjic,2024-03-14 A celebration of all things analogue from reel to reel tape recorders and turntables to typewriters and telephones Paris and the Cliché of History Catherine E. Clark,2018-07-19 This book turns a compelling new lens on thinking about the history of Paris and photography The invention of photography changed how history could be written But the now commonplace assumptions that photographs capture fragments of lost time or present emotional gateways to the past that structure today s understandings did not emerge whole cloth in 1839 Focusing on one of photography s birthplaces Paris and the Cliché of History tells the story of how photographs came to be imagined as documents of the past Author Catherine E Clark analyzes photography s effects on historical interpretation by examining the formation of Paris s first photo archives at the Mus é Carnavalet and the city s municipal library their use in illustrated history books and historical exhibitions and reconstructions such as the 1951 celebration of Paris s 2000th birthday and the public s contribution to the historical record in amateur photo contests Despite the photograph s growing importance in these forums it did not simply replace older forms of illustration visual documentation or written text Photos worked in complex and shifting relation to other types of pictures as photographers popular historians and publishers built on the traditions and iconography of painting and engraving in order to both document the past scientifically and objectively and to reconstruct it romantically In doing so they not only influenced how Parisians thought about the city s past and how they pictured it they also ensured that these images shaped how Parisians lived their own lives especially in deeply charged moments such as the Liberation after World War II This history of picturing Paris does not simply reflect the city s history it is Parisian history Market Mediations B. Heilbrunn,2015-05-11 Market Mediations offers a fresh way to look at consumption practices design and branding issues through analysis based on the French and European intellectual tradition To account for this vast system of objects and brands the book draws on the generative trajectory of meaning stemming from the structural semiotics of Greimas obedience Sifting the Trash Alice Twemlow,2017-05-19 How product design criticism has rescued some products from the trash and consigned others to the landfill Product design criticism operates at the very brink of the landfill site salvaging some

products with praise but consigning others to its depths through condemnation or indifference When a designed product's usefulness is past the public happily discards it to make room for the next new thing Criticism rarely deals with how a product might be used or not used over time it is more likely to play the enabler encouraging our addiction to consumption With *Sifting the Trash* Alice Twemlow offers an especially timely reexamination of the history of product design criticism through the metaphors and actualities of the product as imminent junk and the consumer as junkie Twemlow explores five key moments over the past sixty years of product design criticism From the mid 1950s through the 1960s for example critics including Reyner Banham Deborah Allen and Richard Hamilton wrote about the ways people actually used design and invented a new kind of criticism At the 1970 International Design Conference in Aspen environmental activists protested the design establishment's lack of political engagement In the 1980s left-leaning cultural critics introduced ideology to British design criticism In the 1990s dueling London exhibits offered alternative views of contemporary design And in the early 2000s professional critics were challenged by energetic design bloggers Through the years Twemlow shows critics either sifting the trash and assigning value or attempted to detect diagnose and treat the sickness of a consumer society
