Role Of Community Colleges In Teacher Education:

Community Colleges and Teacher Preparation Tricia Coulter, Bruce Vandal, 2007 The role of community colleges in preparing the next generation of teachers in U S classrooms continues to evolve In many states community colleges are no longer playing an informal or tangential role in teacher preparation and instead are becoming critical leaders in efforts to develop a pool of highly effective teachers for states and regions that have demand which far exceeds supply In August of 2006 the Education Commission of the States and the National Center for Teacher Transformation convened representatives from a variety of national organizations representing state higher education executive officers community colleges teacher preparation programs teacher accreditation and K 12 education to discuss the role of community colleges in teacher education The meeting focused on how community colleges can meet the needs of an increasingly diverse teaching industry and catalyze reform in teacher education This paper describes a variety of forces in education policy and reform that are providing an important context to the role of community colleges in teacher education In addition the paper articulates how community colleges can capitalize on their unique attributes as responsive institutions that serve a diverse population of students and industry needs to meet critical workforce demand in local and regional communities and positively impact the field of teacher education The following are appended 1 Participants in Community Colleges and Teacher Preparation Roles Issues and Opportunities Meeting August 8 9 2006 Washington DC 2 Featured Community College Teacher Preparation Programs and 3 Resources on Community Colleges and Teacher Preparation Contains 37 endnotes This paper was a joint project of Education Commission of the States ECS and the National Center for Teacher Transformation [The Role of the Community College in Teacher Education](#) Barbara K. Townsend, Jan Marie Ignash, Jan M. Ignash, 2003-04-22 A community college role in teacher education is not new But there is a new or more accurately renewed interest in this role A national conversation about how community colleges can help us alleviate the teacher shortage has truly begun with many believe that an expanded community college role is critical to meet the nation s need for well prepared teachers This volume illustrates the extent to which community colleges have become major players in teacher education not only in the traditional way of providing the first two years of an undergraduate degree in teacher education but in such more controversial ways as offering associate and baccalaureate degrees in teacher education and providing alternative certification programs This is the 121st issue of the Jossey Bass higher education series New Directions for Community Colleges **A Florida Community College Teacher Education Review**, 1985 [Community College Teacher Preparation for Diverse Geographies](#) Mark M. D'Amico, Chance W. Lewis, 2019-07-01 Community colleges serve as the open door to higher education for marginalized place bound and or financially challenged students and communities One of the key ways marginalization occurs in diverse geographies is through access limitations access to affordable postsecondary education access to curricula that lead to viable professions access to diverse educational role models and access to employment opportunities that can

sustain communities This underscores the importance of understanding place when addressing access and equity in higher education and the role of community colleges The discussion of access and equity through the community college has implications for teacher education Considering the documented importance of having a diverse teacher workforce in K 12 schools and the current mismatch between the diversity of students and the teachers in their schools community colleges have a significant role to play This book explores many topics related to the community college role in K 12 teacher education including the community college mission the policy landscape partnerships the transfer function the community college baccalaureate and others Throughout the volume the authors explore implications of access equity and geography and conclude with recommendations to guide future research and practice

The Cultural Context of Teacher Education

Partnerships and the Role of Community Colleges Margaret W. Turner, 2004 The purpose of this study was to examine the cultural context of teacher education partnerships and the role of community colleges in these partnerships Two research questions guided the investigation 1 What is the cultural context of teacher education partnerships between two and four year institutions and 2 What is the role of community colleges engaged in these partnerships The research design was qualitative Semi structured interviews were conducted to collect data from twenty faculty respondents across two community colleges and two four year institutions engaged in teacher education partnerships Results of the study indicate that the cultural context of the teacher education partnerships in this study consist of shared goals and vision the opportunity to share knowledge and resources A lack of mutual trust and respect for community college faculty and curriculum offerings among four year faculty surfaced as a barrier to the teacher education partnership Findings also indicate that the role of the community college was to develop strategies to reduce attrition provide proper advising and ensure that all faculty and staff were involved in the partnership activities In addition the findings from this study suggest three major practical implications First the establishment of measurable goals will allow the institutions to evaluate the progress of the partnership Second it is important that top level executives at the institutions support the partnerships and that the goals and objectives of the initiatives are included in the institutions strategic plans Lastly by sharing information and resources members of the partnership may be able to enhance faculty development and help the partners to provide experiences that help prepare students for transfer into the four year teacher education programs Policies should be implemented to provide funding to the community colleges to hire additional faculty for teacher education courses Another implication of the study is the need for further research on teacher education partnerships New studies may need to focus on the perceptions of professionals from other segments of higher education and PK 12 institutions involved in addressing the preparation of quality teachers Finally the findings from the study may be useful to policymakers and educators in all segments of education Abstract
