Henry D. Jr. Schlinger,Alan Poling,2013-11-21 We humans are faced with an interesting problem That which we think we understand the most our own behavior we probably understand the least On the eve of a new millennium the planet is beset by a host of problems that are for the most part caused by human behavior Ironically although it seems that the greatest impact of our behavior is on the planet and its other inhabitants we may actually be threatening our own future the most For example we have caused untold harm to the air we breathe to the water we drink and by extension to much of the food we eat More important perhaps we have created a society in which among other things many people are anxious and depressed

young women starve themselves and alcohol and cigarette use are responsible for hundreds of thousands of cases of illness and death every year And humans still murder one another at an astounding rate while at the same time continuing to affirm the value of human life At a time when it is critical that our children become educated more and more children are not learning the basic skills they will need to think logically so that they can begin to solve the world's problems The question may be not Can the planet survive but rather Can we humans survive and change our own destructive actions Although many scholars philosophers
