Necessary Evil David Kinley, 2018-02-01 Finance is the evil we cannot live without It governs almost every aspect of our lives and has the power to liberate as well as enslave With the world s total financial assets valued at a staggering 300 trillion being four times larger than the combined output of all the world s economies there is apparently plenty to go around Yet while proponents of finance driven capitalism point to the trickle down effect as its contribution to wealth redistribution there are still nearly a billion people across the globe existing on less than 2 a day 14 percent of Americans are living below the official poverty line and disparities in wealth equality everywhere have reached unprecedented levels Evidently a trickle is not enough How can this be when so much wealth abounds and when finance is supposedly chastened and reformed after its latest global crisis How especially can it be in an age when human rights are more loudly proclaimed than ever before Can the financial sector be made to shoulder more of the burden of spreading wealth reducing poverty and protecting rights And if so what role can human rights play in making it happen In answering these questions David Kinley draws on a vast array of material from bankers economists lawyers and politicians as well as human rights activists philosophers historians and anthropologists alongside his own experiences working in the field Necessary Evil shows how finance can shed its conceit return to its role as the economy s servant not its master and regain the public trust and credibility it has so spectacularly lost over the past decade all by helping human rights not harming them
