*Ship and Boat Models in Ancient Greece* Paul Forsythe Johnston,1981      **Ship and Boat Models in Ancient Greece**  
Paul Forsythe Johnston,1985      **The Gurob Ship-Cart Model and Its Mediterranean Context** Shelley Wachsmann,2013-01-09 When Shelley Wachsmann began his analysis of the small ship model excavated by assistants of famed Egyptologist W M F Petrie in Gurob Egypt in 1920 he expected to produce a brief monograph that would shed light on the model and the ship type that it represented Instead Wachsmann discovered that the model held clues to the identities and cultures of the enigmatic Sea Peoples to the religious practices of ancient Egypt and Greece and to the oared ships used by the Bronze Age Mycenaean Greeks Although found in Egypt the prototype of the Gurob model was clearly an Aegean style galley of a type used by both the Mycenaeans and the Sea Peoples The model is the most detailed representation presently known of this vessel type which played a major role in changing the course of world history Contemporaneous textual evidence for Sherden one of the Sea Peoples settled in the region suggests that the model may be patterned after a galley of that culture Bearing a typical Helladic bird head decoration topping the stempost with holes along the sheer strakes confirming the use of stanchions the model was found with four wheels and other evidence for a wagon like support structure connecting it with European cultic prototypes The online resources that accompany the book illustrate Wachsmann s research and analysis They include 3D interactive models that allow readers to examine the Gurob model on their computers as if held in the hand both in its present state and in two hypothetical reconstructions The online component also contains high resolution color photos of the model maps and satellite photos of the site and other related materials Offering a wide range of insights and evidence for linkages among ancient Mediterranean peoples and traditions The Gurob Ship Cart Model and Its Mediterranean Context presents an invaluable asset for anyone interested in the complexities of cultural change in the eastern Mediterranean at the end of the Bronze Age and the beginning of the Iron Age The Gurob ship cart model is was part of an exhibition entitled Beyond the Nile Egypt and the Classical World at the J Paul Getty Center March 27 September 9 2018 Read about it here <http://blogs.getty.edu/iris/egyptian-ship-model-sheds-light-on-bronze-age-warfare-and-religion/> Digital supplement to the book featuring 3D models <http://www.vizin.org/Gurob/Gurob.html>      *Maritime Traders in the Ancient Greek World* C. M. Reed,2003-12-11 This is the first full work since Hasebroek s *Trade and Politics in the Ancient World* to deal directly with the place of maritime traders in ancient Greece Its main assumption is that traders juridical economic political and unofficial standing can only be viewed correctly through the lens of the polis framework It argues that those engaging in inter regional trade with classical Athens were mainly poor and foreign hence politically inert at Athens Moreover Athens as well as other classical Greek poleis resorted to limited measures well short of war or other modes of economic imperialism to attract them However at least in the minds of individual Athenians considerations of traders indispensability to Athens displaced what otherwise would have been low estimations of their social status      *Ships and*

*Seamanship in the Ancient World* Lionel Casson, 2014-07-14 Written to replace and extend Torr's *Ancient Ships* this generously illustrated underwater Bible traces the art and technology of Mediterranean ships and seamanship from their first crude stages about 3000 B C to the heyday of the Byzantine fleets Originally published in 1971 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

*Seagoing Ships and Seamanship in the Bronze Age Levant* Shelley Wachsmann, 2018-05-04 During the Bronze Age the ancient societies that ringed the Mediterranean once mostly separate and isolate began to reach across the great expanse of sea to conduct trade marking an age of immense cultural growth and technological development These intersocietal lines of communication and paths for commerce relied on rigorous open water travel And as a potential superhighway the Mediterranean demanded much in the way of seafaring knowledge and innovative ship design if it were to be successfully navigated In *Seagoing Ships and Seamanship in the Bronze Age Levant* Shelley Wachsmann presents a one of a kind comprehensive examination of how the early eastern Mediterranean cultures took to the sea and how they evolved as a result The author surveys the blue water ships of the Egyptians Syro Canaanites Cypriots Early Bronze Age Aegeans Minoans Mycenaean and Sea Peoples and discusses known Bronze Age shipwrecks Relying on archaeological ethnological iconographic and textual evidence Wachsmann delivers a fascinating and intricate rendering of virtually every aspect of early sea travel from ship construction and propulsion to war on the open water piracy and laws pertaining to conduct at sea This broad study is further enhanced by contributions from other renowned scholars J Hoftijzer and W H van Soldt offer new and illuminating translations of Ugaritic and Akkadian documents that refer to seafaring J R Lenz delves into the Homeric Greek lexicon to search out possible references to the birdlike shapes that adorned early ships stem and stern F Hocker provides a useful appendix and glossary of nautical terms and George F Bass's foreword frames the study's scholarly significance and discusses its place in the nautical archaeological canon This book brings together for the first time the entire corpus of evidence pertaining to Bronze Age seafaring and will be of special value to archaeologists maritime historians philologists and Bronze Age textual scholars Offering an abundance of line drawings and photographs and written in a style that makes the material easily accessible to the layperson Wachsmann's study is certain to become a standard reference for anyone interested in the dawn of sea travel

**War and Violence in Ancient Greece** Hans van Wees, 2009-12-31 The study of Greek warfare should involve much more than reconstructing the experience of combat or revisiting the great wars of the classical period Here a distinguished cast of international scholars explores beyond the usual thematic and chronological boundaries Ranging from the heroes of

Homer to the kings and cities of the hellenistic age the contributors set war in the context of other forms of Greek violence private and public At every turn they challenge received ideas about the causes and conduct of war its development and its place in Greek society and culture , **The Athlit Ram** Elisha Linder,1991 Full description of a unique find the bronze ram of a 5th century BC Greek warship off the Israeli coast This beautiful publication examines the ram from metallurgical and stylistic perspectives and then proceeds to a discussion of the changing role of the ram in ancient naval battles and the type of ship that would have carried it **Mediterranean Urbanization 800-600 BC** Robin Osborne,Barry Cunliffe,British Academy,2005-10-27 Urban life as we know it in the Mediterranean began in the early Iron Age settlements of great size and internal diversity appear in the archaeological record This collection of essays offers for the first time a systematic discussion of the beginnings of urbanization across the Mediterranean from Cyprus through Greece and Italy to France and Spain Leading scholars in the field look critically at what is meant by urbanization and analyse the social processes that lead to the development of social complexity and the growth of towns The introduction to the volume focuses on the history of the archaeology of urbanization and argues that proper understanding of the phenomenon demands loose and flexible criteria for what is termed a town The following eight chapters examine the development of individual settlements and patterns of urban settlement in Cyprus Greece Etruria Latium southern Italy Sardinia southern France and Spain These chapters not only provide a general review of current knowledge of urban settlements of this period but also raise significant issues of urbanization and the economy urbanization and political organization and of the degree of regionalism and diversity to be found within individual towns The three analytical chapters which conclude this collection look more broadly at the town as a cultural phenomenon that has to be related to wider cultural trends as an economic phenomenon that has to be related to changes in the Mediterranean economy and as a dynamic phenomenon not merely a point on the map Wide ranging in its geographical coverage this volume will be essential reading for scholars and students of archaeology settlement studies the archaic period and geographers interested in the history of urban forms *"Each Man Cried Out to His God"* Aaron J. Griffiths,2020-02-20 Astyanax is thrown from the walls of Troy Medea kills her children as an act of vengeance against her husband Aias reflects with sorrow on his son s inheritance yet kills himself and leaves Eurysakes vulnerable to his enemies The pathos created by threats to children is a notable feature of Greek tragedy but does not in itself explain the broad range of situations in which the ancient playwrights chose to employ

such threats Rather than casting children in tragedy as simple figures of pathos this volume proposes a new paradigm to understand their roles emphasizing their dangerous potential as the future adults of myth Although they are largely silent passive figures on stage children exert a dramatic force that transcends their limited physical presence and are in fact theatrically complex creations who pose a danger to the major characters Their multiple projected lives create dramatic palimpsests which are paradoxically more significant than their immediate emotional effects children are never killed because of their immediate weakness but because of their potential strength This re evaluation of the significance of child characters in Greek tragedy draws on a fresh examination of the evidence for child actors in fifth century Athens which concludes that the physical presence of children was a significant factor in their presentation However child roles can only be fully appreciated as theatrical phenomena utilizing the inherent ambiguities of drama as such case studies of particular plays and playwrights are underpinned by detailed analysis of staging considerations opening up new avenues for interpretation and challenging traditional models of children in tragedy
