Homesmind Pamela Sargent, 2014-04-01 Anra is a solitary She was born without the power to mindspeak and unlike her fellows she cannot communicate in unspoken thoughts In the past she would have been killed at birth but the arrival of the Wanderer the comet controlled by the cybernetic intelligence known as the Homesmind has changed everything The people of the comet the skydwellers now supply solitaires with implants that allow artificial mindspeaking The solitaires are sequestered in a single village that is willing to care for such children Anra and her new brethren were thought to be the

possible bridge between the people of Earth and the skydwellers but the gap may be too great since the people of Earth consider solitaries an abomination and the skydwellers as soulless. The solitaries are instead outcasts in two worlds part of each but fully accepted in neither. Another comet enters the system refusing to communicate with Homestead and speaking to the people of Earth with the voices of their own dead seducing them into a submission of their individual wills and trying to lure them to oblivion. Anra and her fellow solitaries have the power to resist their call but can they unite in time to save everyone else.

**Cloned Lives** Pamela Sargent, 2014-04-01 This debut sci fi novel by the Nebula and Locus Award winning author of *The Shore of Women* follows five human clones in an unforgiving world. Shock and outrage greet Paul Swenson's announcement of the success of his latest and most controversial scientific endeavor. Having taken advantage of a brief lull in legislative restrictions, the renowned astrophysicist and a team of bioscientists have created five human clones, four males and one female, from Swenson's own genetic material. From the moment Michael, Edward, Albert, James, and Kira Swenson are revealed to the world, they are viewed with hostility and suspicion. Growing up under the heavy yoke of specialness, the five exceptional human experiments have no one but each other to turn to for emotional support. Then tragedy strikes and everything falls apart. Now Kira and her brothers must follow their destinies down separate, divergent paths. Heading out into a world that never welcomed them, each clone is intent on pursuing knowledge, career, family, all the desired elements of a so-called normal life. But they cannot escape their shared past because the true purpose behind Paul Swenson's remarkable achievement remains shrouded in shadow. And his children are prepared to travel to the ends of the Earth and beyond for an answer to the question that has always haunted them: Why were we made?

**Puss in D.C. and Other Stories** Pamela Sargent, 2015-07-10 Pamela Sargent's latest collection assembles 10 of her recent stories, including *Puss in D.C.*, *Strawberry Birdies*, and *A Smaller Government*, showing why she's one of the most popular authors currently writing science fiction today. From the introduction by Eleanor Arnason, Sargent has a quality usually associated with hard SF: a certain kind of intellectual rigor. With her, it carries through all of her work. She thinks things through. Notice when you read this collection how many different kinds of stories are here and notice the range of moods: the stories go from really funny to really dark, with a lot in between. I also want to mention Sargent's persistence. Writing is a hard life. Many good woman writers I admired in the 1970s, 80s, and 90s have vanished. They stopped writing or stopped trying to sell their fiction or changed their names and moved to writing romance, gay romance, generic fantasy, whatever they could sell. In one way or another, they were silenced. Sargent has kept doing thoughtful, serious fiction dealing with the issues that interested her.

**The Cambridge Companion to American Science Fiction** Eric Carl Link, Gerry Canavan, 2015-01-26 This Companion explores the relationship between the ideas and themes of American science fiction and their roots in the American cultural experience.

**Anatomy of Science Fiction** Donald E. Morse, 2009-03-26 This wide ranging collection of essays reopens the connection between science fiction and the increasingly science fictional world Kevin Alexander Boon reminds us of the degree to which the epistemology of science fiction infects modern political discourse K roly Pint r explores the narrative structures of utopian estrangement and Tam s B nyei and Brian Attebery take us deeper into the cultural exchanges between science fiction and the literary and political worlds In the second half Donald Morse Nicholas Ruddick and va Federmayer look at the way in which science fiction has tackled major ethical issues while Amy Novak and K lm n Matolcsy consider memory and evolution as cultural batteries The book ends with important discussions of East German and

Hungarian science fiction by Usch Kiausch and Donald Morse respectively I envisage that the book will find a market both among academics and as a recommended text to undergraduates as it offers interesting essays on important readers The tendency for science fiction to be offered as a literature class to science majors is not usually considered but this book would be particularly appropriate for such a market Dr Farah Mendelsohn Middlesex University Genre Fission Marleen S.
