Making Sense of Change Management Esther Cameron, Mike Green, 2004 Written for academics and professionals alike this book is an attempt to make change easier It is aimed at anyone who wants to understand why change happens how it happens and what needs to be done to make change a welcome rather than a dreaded concept Making Sense of Organizational Change Graham P. Abbey, 2010 This thesis aims to analyse organizational change focusing on the meanings attributed by participants in planned and unplanned processes of organizational change in a large UK hospitality company Framed within the narrative meta paradigm this research employs a qualitative interpretive social constructionist

perspective and considers change in organizations as constituted by alterations in people's understandings encoded in narratives and shared in conversations. The thesis draws on prior publications in the fields of narrative and organizational change including the sensemaking power and identity literatures. Data was co-created through sixty-six semi-structured interviews in a single multi-site case study augmented by informal observations and assessment of written materials. The research account tells the stories of organizational change, the responses from members to change and the shifts in power control and autonomy. These narratives of change were prepared through an interpretive analysis of the interview transcripts and the study provides a reflexive commentary on the research through vignettes of the researcher's experience. In the discussion, three readings interpret the case study from a narrative, an organizational change and an autoethnographic perspective. The primary contribution of the thesis is empirical, providing an in-depth case study that describes a complex organizational landscape at two luxury hotels into which a managerial initiative, Shine, was launched and addresses the limited presence of narrative case studies on change. Through the application of existing theory to this empirical resource, the thesis contributes to understandings of sensemaking power and identity during continuous change. The study argues for the significance of reflexivity in storytelling research and the need for practitioners to embrace the socially constructed nature of realities in working with organizational change. More generally, the thesis has demonstrated the value of a storytelling approach to understanding the complexities of organizational change while identifying limitations to plurivocal storytelling as a research method.

Managing and Leading People through Organizational Change Julie Hodges, 2025-08-03. Change in organizations is all about people; it is people who plan, prepare for and implement change and who are affected by it in the daily course of their work. However, there is a tendency to focus on the more technical and quantifiable aspects of implementing organizational change programmes whilst ignoring the complex ways that these will impact individuals. Providing an evidence-based analysis of change in organizations, *Managing and Leading People Through Organizational Change* is written for senior practitioners responsible for change programmes and postgraduate students of organizational change. This updated edition demonstrates the importance of understanding the impact of developing technologies including AI as well as how best to implement sustainability and inclusion in the workplace. With new material on individual wellbeing and the impact of hybrid working, this book sets out frameworks, practical approaches and recommendations for communicating with and leading individuals, teams and organizations through change.
