Jensen, 2025-04-15 This updated and expanded book examines the fundamentals of economic growth models as expressed by dynamic systems of nonlinear differential equations With homogeneous dynamic systems as the unifying mathematical framework the time paths and long run stability properties of the solutions to classical neoclassical and modern macroeconomic growth models are analyzed The general structure and solutions of two sector and multi sector growth models are also explored with special attention given to the evolution of output compositions and sectoral factor allocations involved in Walrasian general equilibrium dynamics Ramsey optimal growth saving models with variable intertemporal substitution non homothetic utility are discussed to demonstrate the ability to generate a realistic historically observed evolution of economic per capita growth rates and saving rates The book aims to highlight how basic economic growth models can be extended widely including international trading economies world market prices commodity trade patterns and issues related to globalization migrations and international factor movements It will be relevant to students and researchers interested in economic growth and trade policy

*Equilibrium and Evolution* N. Hart, 2011-12-12 Alfred Marshall has traditionally been listed alongside pioneering neoclassical economists In this volume Neil Hart challenges this view illuminating the ambiguities within Marshall's work and exploring his reconciliation of two modes of thinking equilibrium economics and evolutionary economics

**The Development of Mathematical Economics** Reghinos D. Theocharis, 1993-06-18 This sequel to the author's *Early Development in Mathematical Economics* covers developments in this field after the appearance of Cournot's *Recherches* in 1838 and until the publication of Jevons' *Theory in*

1871 *Classics and Moderns in Economics Volume I* Peter Groenewegen, 2002-09-26 Building on the Groenewegen's respected collection of eighteenth century economics this new book focuses on the nineteenth and early twentieth centuries and includes several essays that have never been previously published **The State of the History of Economics** James P. Henderson, 1997-08-21 This collection explores emerging areas in the history of economics and provides a valuable insight into contemporary research in the field The papers focus on four areas Science and Economics Authors investigate how science is perceived and how its history is related details early history of probability and examine cyberpunk a science fiction genre that draws heavily on modern economic ideas David Ricardo's contribution to international trade theory Texts by David Ricardo are re-examined to provide a framework for a more consistent and coherent interpretation of Ricardo and to demonstrate how history of economic thought approaches can be applied to the treatment of current theory and policy concerns The contributions of individual economists including Joseph A Schumpeter Werner Sombart and John Maynard Keynes and a comparison of Hicks and Lindahl's views on monetary stability Economics and events before Adam Smith An investigation into English policies toward Ireland at the time of Cromwell's occupation is followed by explorations of the ideas of Vincent de Gournay and debates in French economic journals in the period 1750-1770 **The Yale Review** George Park Fisher, George Burton Adams, Henry Walcott Farnam, Arthur Twining Hadley, John Christopher Schwab, William Fremont Blackman, Edward Gaylord Bourne, Irving Fisher, Henry Crosby Emery, Wilbur Lucius Cross, 1898 *Catalogue of Standard and Holiday Books* A.C. McClurg & Co, 1903 *Illustrated Catalogue of Books, Standard and Holiday* McClurg, Firm, Booksellers, Chicago, 1903 [Bibliographie der Staats-und Wirtschaftswissenschaften](#), 1993 **The Theory of Value and Distribution in Economics** Pierangelo Garegnani, Paul Samuelson, 2012-08-21 This new volume explores two alternative economic theories the classical theory and the marginalist or neoclassical theory through a discussion between two eminent economists Pierangelo Garegnani and Paul Samuelson The key themes of the volume are the difference in approaches to the explanation of the distribution of income and relative prices and therefore different approaches to all other economic problems in particular capital accumulation and economic growth The book discusses whether there is a classical approach to the theory of value and distribution at the core of economic theory that is fundamentally different from the later marginalist or neoclassical theory In the volume the late Pierangelo Garegnani argues for the validity of Piero Sraffa's position on this issue whilst the late noble laureate Paul Samuelson vehemently contests it At a time of economic crisis the future of the discipline is far from certain and so it is extremely important to bring these debates back into the light by reproducing them together for the first time A comprehensive introduction by Heinz Kurz sets the debate in this context and provides crucial background to the arguments [History and Economic Life](#) Georg Christ, Philipp R. Rössner, 2020-02-27 History and Economic Life offers students a wide ranging introduction to both quantitative and qualitative approaches to interpreting economic history sources from the Middle Ages to the Twentieth Century Having identified an ever widening

gap between the use of qualitative sources by cultural historians and quantitative sources by economic historians the book aims to bridge the divide by making economic history sources more accessible to students and the wider public and highlighting the need for a complementary rather than exclusive approach Divided into two parts the book begins by equipping students with a toolbox to approach economic history sources considering the range of sources that might be of use and introducing different ways of approaching them The second part consists of case studies that examine how economic historians use such sources helping readers to gain a sense of context and understanding of how these sources can be used The book thereby sheds light on important debates both within and beyond the field and highlights the benefits gained when combining qualitative and quantitative approaches to source analysis Introducing sources often avoided in culturally minded history or statistically minded economic history courses respectively and advocating a combined quantitative and qualitative approach it is an essential resource for students undertaking source analysis within the field

The Principle of Trading Economics Zhenying Wang, 2019-11-23 This book is devoted to establishing a completely new concept within economics referred to as trading economics which is a reconstructed economic system in theory that seeks perfect harmony between micro and macro elements in a structured way hence making the economic theory a rigorous system supported by internal logical continuity Representing a revolution of the existing theoretical framework trading economics has changed the logic of mainstream economics Specifically it deduces the macro whole from the micro individuals and it introduces a systematic and comprehensive analysis approach It stresses that within an interconnected world the interaction between trading agents is the fundamental driving force behind the operation development and evolution of the economic system
