*Hume Precursor of Modern Empiricism* Farhang Zabeeh,2012-12-06 David Hume is the most influential precursor of modern empiricism By modern empiricism I intend a belief that all cognitive conflicts can be resolved in principle by either appeal to matters of fact via scientific procedure or by appeal to some sets of natural or conventional standards whether linguistic mathematical aesthetic or political This belief itself is a consequent of an old apprehension that all synthetic knowledge is based on experience and that the rest can be reduced to a set of self evident truths In this broad sense Modern Empiricism encompasses classes such as Logical Empiricism Logical Atomism and Philosophical Analysis and unique individuals such as Russell and Moore It excludes thereby the present day continental philosophies such as Thomism Existentialism and Dialectical Materialism Modern empiricists to be sure are influenced by many other philosophers Locke

Berkeley and Mill among the classical empiricists and Leibniz and Kant among the rationalists the former especially on the logico mathematical side in one way or other are responsible for the appearance of empiricism in its new form But none of them were as influential as Hume This by itself is not news Weinberg in his well known book An Examination of Logical Positivism observes that Many if not all of the principal doctrines of contemporary positivism derive from Hume
