throughout history *The Biographical Dictionary of Scientists* David Abbott,1984 Discusses the lives work and achievements of the people who have made outstanding contributions to physics Academic Genealogy of Mathematicians Sooyoung Chang,2011 Burn for Burn **History of Mathematics** Craig Smorynski,2007-12-03 1 An Initial Assignment I haven't taught the history of mathematics that often but I do rather like the course The chief drawbacks to teaching it are that i it is a lot more work than teaching a regular mathematics course and ii in American colleges at least the students taking the course are not mathematics majors but education majors and and in the past I had found education majors to be somewhat weak and unmotivated The last time I taught the course however the majority of the students were graduate education students working toward their master's degrees I decided to challenge them right from the start 1 Assignment In An Outline of Set Theory James Henle wrote about mathematics Every now and then it must pause to organize and reflect on what it is and where it comes from This happened in the sixth century B C when Euclid thought he had derived most of the mathematical results known at the time from five postulates Do a little research to find as many errors as possible in the second sentence and write a short essay on them The responses far exceeded my expectations To be sure some of the undergraduates found the assignment unclear I did not say how many errors they were supposed to find But many of the students put their hearts and souls into it 1 My apology to Prof Henle at whose expense I previously had a little fun on this matter I used it again not because of any animosity I hold for him but because I was familiar with it and dealing with Euclid it seemed appropriate for the start of my course **The Biographical Dictionary of Scientists** ,1983 **Guide to Information Sources in Mathematics and Statistics** Martha A. Tucker,Nancy D. Anderson,2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free Biographical dictionary of scientists ,1994 Catalogue of Works on Natural History, Physics, Mathematics, and Other Sciences Bernard Quaritch (Firm),1882 *The Biographical Dictionary of Scientists* David Abbott,1984 Discusses the lives work and achievements of the people who have made outstanding contributions to chemistry The Biographical Dictionary of Women in Science: L-Z Marilyn Bailey Ogilvie,Joy Dorothy Harvey,2000 Volume 2 of 2
