Ethnomathematics Marcia Ascher, 2017-12-01 In this truly one of a kind book Ascher introduces the mathematical ideas of people in traditional or small scale cultures often omitted from discussion of mathematics. Topics such as Numbers Words and Symbols Tracing Graphs in the Sand The Logic of Kin Relations Chance and Strategy in Games and Puzzles and The Organization and Modeling of Space are traced in various cultures including the Inuit Navajo and Iroquois of North America the Inca of South America the Malekula Warlpiri Maori and Caroline Islanders of Oceania and the Tshokwe Bushoong and Kpelle of Africa. As Ascher explores mathematical ideas involving numbers logic spatial configuration and the organization of these into systems and structures readers gain both a broader understanding and an appreciation for the ideas of other peoples.

Last Philosophical Testament Bertrand Russell, Peter Köllner, 1997 Only a handful of papers reprinted in this collection were written after 1959. Russell retired from academic philosophy for the second time after the publication of *My Philosophical Development* devoting his final years to political protest. 1949 and 1950 the years that Russell was appointed to the Order of Merit and awarded the Nobel Prize for Literature fall in the period covered by this volume. The papers include autobiographical and self critical writings as well as papers on non demonstrative inference his contemporaries metaphysics and epistemology ethics and politics John Stuart Mill religion Albert Einstein and ordinary language philosophy. Women in Mathematics Claudia Henrion, 1997-10-22 a wonderful addition to any mathematics teacher's professional bookshelf. The *Mathematics Teacher* The individual biographies themselves make for enthralling often inspiring reading. This volume should be compelling reading for women mathematics students and professionals. A fine addition to the literature on women in science. Highly recommended. Choice it makes an important contribution to scholarship on the interrelations of gender mathematics and culture in the U S in the second half of the twentieth century. Notices of the AMS Who is the audience for this book? Certainly women who are interested in studying mathematics and women already in mathematics who have become discouraged will find much to interest and help them. Faculty who teach such women would put it to good use. But it would be a loss to relegate the book to a shelf for occasional reference to an interested student or beginning mathematician. Everyone in the mathematics community in which each of Henrion's subjects struggled so hard to find a place could benefit by a thoughtful reading.

Society for Industrial and Applied Mathematics SIAM News Mathematics is often described as the purest of the sciences the least tainted by subjective or cultural influences. Theoretically the only requirement for a life of mathematics is mathematical ability. And yet we see very few women mathematicians. Why? Based upon a series of ten intensive interviews with prominent women mathematicians throughout the United States this book investigates the role of gender in the complex relationship between mathematician the mathematical community and mathematics itself.

[Computer Science Reconsidered](#) Karl M. Fant, 2007-06-30 The Invocation Model of Process Expression argues that mathematics does not provide the most appropriate conceptual foundations for computer science but rather that these foundations are a primary source of unnecessary complexity and confusion It supports that there is a more appropriate conceptual model that unifies forms of expression considered quite disparate and simplifies issues considered complex and intractable This book presents that this model of process expression is alternative theory of computer science that is both valid and practical
