Matter And Spirit Their Convergence In Eastern Religion Marx And Teilhard De Chardin:

Matter and Spirit Robert Charles Zaehner, 1963 America's Teilhard Susan Kassman Sack, 2019 *America's Teilhard Christ and Hope* in the 1960s is a study of the reception of Teilhard in the United States during this period and contributes to an awareness of the thought of this important figure and the impact of his work. Additionally, it further develops an understanding of U.S. Catholicism in all its dimensions during these years and provides clues as to how it has unfolded over the past several decades. Susan Sack argues that the manner and intensity of the reception of Teilhard's thought happened as it did at this point in history because of the confluence of the then developing social milieu, the disintegration of the immigrant Catholic subculture, and the opening of the church to the world through Vatican II. Additionally, as these social and historical events unfolded within U.S. culture during these years, the way Teilhard was read and the contributions which his thought provided changed. This book considers his work as a carrier at times for an almost Americanist emphasis upon progress, energy, and hope. In other years, his teleological understanding of the value of suffering moves to center. Additionally, the stories of numerous persons, scientists, theologians, politicians, and scholars who became involved in the American Teilhardian effort are detailed.

Knowledge and the Sacred Seyyed Hossein Nasr, 1989-01-01. Nasr, Islamic studies, George Washington U. In a series of ten lectures, argues that unlike in the West where scientific thought has been secularized, in the East, knowledge and religious experience have remained unified. Drawing from Buddhist, Hindu, Judaic, Christian, and Islamic traditions, he finds in each the idea of perennial wisdom as a philosophical basis for such unity. Paperback edition, 10/95, not seen. Journeys East Harry Oldmeadow, 2004-04-28. This is the first book to treat the impact of religious, philosophical, and psychological traditions of the East on Western intellectuals, artists, travellers, and spiritual seekers in the twentieth century. Addressed to both general readers and scholars of religion, it is especially valuable for its penetrating and inter-religious analysis of two of the most compelling themes now facing the world: the emergence of cross-cultural religious understanding of the natural order and ecological crisis, and the metaphysical basis for both the formal diversity and essential unity of religious traditions of both East and West. The West has long romanticized the mysterious East, but it has also judged its traditions as uncivilized. Our notions about Eastern spirituality have been formed by a succession of travellers, scientists, artists, intellectuals, poets, philosophers, and missionaries, as well as by Eastern travellers who have spent time in the West. This book helps us to recognize the influence of Eastern ideas upon modern Western thought by tracing the history of engagements between East and West up until the present day. It concludes with a section that helps us to perceive the timeless value of the many Eastern contributions to the West's current intellectual and spiritual state.
