Matter Of Art Contemporary Architecture In Switzerland:

Architecture Thinking across Boundaries Rajesh Heynickx,Ricardo Costa Agarez,Elke Couchez,2021-01-14 While most studies on the history of architectural theory have been concerned with what has been said and written this book is concerned with how architecture theory has been created and transmitted Architecture Thinking across Boundaries looks at architectural theory through the lens of intellectual history Eleven original essays explore a variety of themes and contexts each examining how architectural knowledge has been transferred across social spatial and disciplinary boundaries whether through the international circulation of ideas transdisciplinary exchanges or transfers from design practice to theory and back again Dissecting the frictions transformations and resistances that mark these journeys the essays in this book reflect upon the myriad routes that architectural knowledge has taken while developing into architectural theory They critically enquire the interstices geographical temporal and epistemological that lie beyond fixed narratives They show how unstable vital and eminently mobile the processes of thinking about architecture have been *The Architects' Journal* ,2002

Architecture Today, 2001 *Rationalist Traces* Andrew Peckham, Torsten Schmiedeknecht, Charles Rattray, 2007-10-22
 Modern European architecture has been characterised by a strong undercurrent of rationalist thought Rationalist Traces aims to examine this legacy by establishing a cross section of contemporary European architecture placed in selected

national contexts by critics including Kos Moravnszky and Josep Maria Montaner. Subsequent interviews discuss the theoretical contributions of Giorgio Grassi and OM Ungers and a survey of Max Dudler and De Architekten Cie's work sets out a consistency at one remove from avant garde spectacle or everyday expediency. In Germany Rationalism offers a considered representation of state institutions while elsewhere outstanding work reveals different approaches to rationality in architecture often recalling canonical Modernism or the Rational Architecture of the later postwar period. Whether evident in patterns of thinking a particular formal repertoire a prevailing consistency or exemplified in individual buildings this relationship informs the mature work of Patrick Berger, Claus en Kaan, Architecten, Carlos Ferrater, Cino Zucchi or Hans Kollhoff. The buildings and projects of a younger generation, Javier Garcá Solera, GWJ Architekten AG, biq, Andrea Bassi or Beniamino Servino, present a Rationalism less conditioned by a concern to promote a unifying aesthetic. While often sharing a deliberate economy of means or a sensual sobriety they present a more oblique or distanced relationship with the defining work of the 20th century.

Blurred Transparencies in Contemporary Glass Architecture Aki Ishida, 2020-04-22

Blurred Transparencies in Contemporary Glass Architecture brings to light complex readings of transparent glass through close observations of six pivotal works of architecture. Written from the perspectives of a practitioner, the six essays challenge assumptions about fragility and visual transparency of glass. A material imbued with idealism and utopic vision, glass has captured architects' imagination and glass's fragility and difficulties in thermal control continue to present technical challenges. In recent decades, architecture has witnessed an emergence of technological advancements in chemical coating, structural engineering and fabrication methods that resulted in new kinds of glass transparencies. Buildings examined in the book include a sanatorium with expansive windows delivering light and air to recovering tuberculosis patients, a pavilion with a crystal clear glass plenum circulating air for heating and cooling, a glass monument symbolizing the screen of personal devices that shortened the distance between machines and humans, and a glass building symbolizing the social and material intertwining in the glass ceiling metaphor. Connecting material glass to broader cultural and social contexts, *Blurred Transparencies in Contemporary Glass Architecture* enlightens students and practitioners of architecture as well as the general public with interest in design. The author demonstrates how glass is rarely crystal clear but is blurred both materially and metaphysically, revealing complex readings of ideas for which glass continues to stand.

Ai Weiwei: Spatial Matters Ai Weiwei, 2014-04-04

A richly illustrated exploration of Ai Weiwei's installation and architecture projects focusing on the artist's use of space. Outspoken, provocative and prolific, the artist Ai Weiwei is an international phenomenon. In recent years he has produced an astonishingly varied body of work while continuing his role as activist, provocateur and conscience of a nation. Ai Weiwei is under city arrest in Beijing after an 81-day imprisonment; he is accused of tax evasion but many suspect he is being punished for his political activism, including his exposure of shoddy school building practices that led to the deaths of thousands of children in the 2008 Sichuan earthquake. In 2009 he was badly beaten by the police during his earthquake

investigations Ai Weiwei's work reflects his multiple artistic identities as conceptual artist architect filmmaker designer curator writer and publisher This monumental volume developed in association with the artist draws on the full breadth of Ai Weiwei's architectural installation and activist work with a focus on his use of space It documents a huge range of international projects with drawings plans and photographs of finished work It also includes excerpts from Ai Weiwei's famous blog shut down by Chinese authorities in 2009 in which he offers pithy and scathing commentary on the world around him Essays by leading critics and art historians and interviews with the artist drawing out his central concerns accompany the 450 beautifully reproduced color illustrations of his work **RIBA Journal**, 2001-07 **Contemporary Swiss**
