Matter Of Images:

The Matter of Images Richard Dyer, 2013-04-15 Now published in a revised second edition *The Matter of Images* searches through the resonances of the term representation analysing images in terms of why they matter what they are made of and the material realities they refer to Richard Dyer's analyses consider representations of out groups and traditionally dominant groups alike and encompass the eclectic texts of contemporary culture from queers to straights political correctness representations of Empire and films including *Gilda* *Papillon* and *The Night of the Living Dead* Essays new to the second edition discuss Lillian Gish as the ultimate white movie star the representation of whiteness in the South in *Birth of a Nation* and society's fascination with serial killers *The Matter of Images* is distinctive in its commitment to writing politically about contemporary culture while insisting on the importance of understanding the formal qualities and complexity of the images it investigates

Videophilosophy Maurizio Lazzarato, 2019-02-12 The Italian philosopher Maurizio Lazzarato has earned international acclaim for his analysis of contemporary capitalism in particular his influential concept of immaterial labor and his perceptive writings on debt In *Videophilosophy* he reveals the underpinnings of contemporary subjectivity in the aesthetics and politics of mass media First written in French and published in Italian and later revised but never published in full this book discloses the conceptual groundwork of Lazzarato's thought as a whole for a time when his writings have become increasingly influential Drawing on Bergson Nietzsche Benjamin Deleuze and Guattari and the film theory and practice of Dziga Vertov Lazzarato constructs a new philosophy of media that ties political economy to the politics of aesthetics Through his concept of machines that crystallize time he argues that the proliferation of digital technologies over the past half century marks the transition to a new mode of capitalist production characterized by unprecedented forms of subjection This new era of the commodification of the self Lazzarato declares demands novel types of political action that challenge the commercialization and exploitation of time This crucial text by an essential contemporary thinker offers vital new perspectives on aesthetics politics and media and critical theory

IMAGINARIES ON MATTER: TOOLS, MATERIALS, ORIGINS Thomas Bo Jensen, Carolina Dayer, Jonathan Foote, 2023-11-21 *Imagines on Matter Tools Materials Origins* promotes an innovative architectural research agenda that connects historical cultural written research with digitally led material explorations The common thread is the notion of the material imagination disclosed in the reverie or material daydream which challenges overly pragmatic or unreflective material choices within current architectural practice In bonding our imagination directly with matter while also confronting new technologies this book promotes strategies by which architects and builders future relations with materials can stay rooted within the deeper concerns of cultural meaning *Imagines on Matter* includes interviews with Aulets Arquitectes Alibi Studio Ensamble Studio Geometria Helen Hard Kieran Timberlake Supermanoeuvre and Vandkunsten as well as a postscript by David Leatherbarrow Edited by Thomas Bo Jensen Carolina Dayer Jonathan Foote

Being and Film Christine Reeh-Peters, 2021-03-16 This book develops the so called solaristic ontology of film by building a philosophical system based on an inquiry into the nature of film being and reality This solaristic system appropriates the aesthetic ideas and principles of thought present in the 1972 sci fi movie Solaris by Andrei Tarkovsky This movie is the main center of analysis here since it is highly symptomatic of the medium s philosophical self reflexivity and its intriguing correlation with reality and being The solaristic science is a fictional science introduced in the movie s diegesis and dedicated to the investigation of the planet Solaris an unattainable challenge In this sense the solaristic system closes the film s narrative by telling a philosophical story on the planet Solaris The book thus details a philosophical form of concept art and at the same time builds on previous results of film philosophy as well as the speculative turn in contemporary philosophy

Life Force for Beginners Harry Eilenstein, 2021-05-31 Life force is one of the central concepts in magic but it is usually used only associatively and while filled with many feelings is rarely really defined precisely In this book the life force is examined in detail and described in terms of what it could be and also what it cannot be There are many questions about this subject and trying to answer them leads to much sharper contours of the life force Some of these research questions are Is the life force a force or a substance Where is the life force actually located What is its relationship to consciousness and matter What is its relationship to analogies What do we see in clairvoyance Why is there no independent life force perception something like seeing by the eye hearing by the ear smelling by the nose Why does the life force organize itself in the structure of the chakra system And why is there the same structure in a solar system
