Soviet Science on the Edge of Reform Harley D. Balzer,2019-06-04 It is my sincere hope that the reforms currently being introduced in the USSR will render much of this book obsolete Yet even if perestroika brings significant change to the Soviet Union historians will want a record of what existed before After four years it has become apparent that perestroika is a painful long term process In such a large and diverse country even the reforms that are successful cannot take place everywhere at once One major goal in publishing this book is to make data from a major interview project on Soviet science and technology available to a broader audience Despite the changes taking place many of the features illuminated by these unique data persist *Dacha Idylls* Melissa L. Caldwell,2011 Anyone who has spent time in Russia knows the importance of going to the dacha In this ethnography Melissa Caldwell reveals the mystique of rural life by exploring the social nature of gardening and making food and Russian relationships to the land It s truly an innovative study Catherine Wanner author of *Communities of the Converted Ukrainians* and *Global Evangelism* In this engaging ethnography Melissa Caldwell brilliantly demonstrates what is peculiarly Russian about the dacha long an object of literary and nostalgic imagining while simultaneously situating the vacation cottage within larger histories of leisure consumption home and post socialist transition

A must read for scholars of Russia or tourism Pamela Ballinger author of *History in Exile Memory and Identity at the Borders of the Balkans*

Aleksandr Rodchenko Aglaya K. Glebova, 2022-01-01 Through the lens of Aleksandr Rodchenko's photography a new and provocative understanding emerges of the troubled relationship between technology modernism and state power in Stalin's Soviet Union Tracing the shifting meanings of photography in the early Soviet Union Aglaya K Glebova revises the relationship between art and politics during what is usually considered the end of the critical avant garde

Aleksandr Rodchenko 1891-1956 was a highly versatile Russian artist and one of Constructivism's founders His photographic work between 1928 when Stalin rose to power and the late 1930s reveals a wide ranging search for a different pictorial language in the context of the extreme transformations carried out under the Five Year Plans In response to forced modernization Rodchenko's photography during this time questioned his own modernist commitments At the heart of this argument is Rodchenko's infamous 1933 photo essay on the White Sea-Baltic Canal site of one of the first gulags Glebova's careful reading of Rodchenko's oeuvre yields a more diverse practice than has been generally acknowledged and brings to light new aspects of his work in adjacent media including the collaborative design work he undertook with Varvara Stepanova

[The Reenchantment of Nature](#) Alister McGrath, 2002-09-17 In this provocative assessment of the world's current ecological crisis the author of the critically acclaimed *In the Beginning* exposes the false assumptions underlying the conflicts between science and religion and proposes an innovative approach to saving the planet Traditionally science and religion have been thought of as two distinct and irreconcilable ways of looking at the world and scientists have often chastised the world's religions for keeping their eyes on the heavens and paying scant attention to the destruction of Earth's precious resources and its natural wonders In *The Reenchantment of Nature* Alister McGrath who holds doctorates in both molecular biology and divinity challenges this long held and dangerously misguided dichotomy Arguing that Christianity and other great religions have always respected and revered the bounty and beauty of the earth McGrath calls for a radical shift in perspective He shows that by defining the world in the narrowest of scientific terms and viewing it as a collection of atoms and molecules governed by unchanging laws and forces we have lost our ability to appreciate nature's enchantments In order to address the threats to our environment he maintains it is essential to reawaken our sense of awe and look at the world as a glorious creation an irreplaceable gift of God In setting forth a new framework for the debate between science and religion on ecological theory *The Reenchantment of Nature* points the way to integrating two different traditions in a sane and productive effort to rescue the natural world from its present environmental decline

Saving Nature Under Socialism Julia E. Ault, 2021-09-09 When East Germany collapsed in 1989-1990 outside observers were shocked to learn the extent of environmental devastation that existed there *Saving Nature Under Socialism* introduces readers to environmentalism in Cold War East Germany and traces the evolution of environmental policy and protest in East Germany and central Europe from the 1960s
