Models Of Strategic Choice In Politics:

Models of Strategic Choice in Politics Peter C. Ordeshook, 1989 Discusses the sophisticated application of game theory to the development of contemporary political theory *Strategic Choice Models of Political Change in Latin America* David Collier, Deborah Lee Norden, 1991 Formal Models of Domestic Politics Scott Gehlbach, 2021-09-30 Formal Models of Domestic Politics offers a unified and accessible approach to canonical and important new models of politics Intended for political science and economics students who have already taken a course in game theory this new edition retains the widely appreciated pedagogic approach of the first edition Coverage has been expanded to include a new chapter on nondemocracy new material on valence and issue ownership dynamic veto and legislative bargaining delegation to leaders by imperfectly informed politicians and voter competence and numerous additional exercises Political economists comparativists and Americanists will all find models in the text central to their research interests This leading graduate textbook assumes no mathematical knowledge beyond basic calculus with an emphasis placed on clarity of presentation Political scientists will appreciate the simplification of economic environments to focus on the political logic of models economists will discover many important models published outside of their discipline and both instructors and students will value the classroom tested exercises This is a vital update to a classic text **Game-Theoretic Models of the Political Influence of Interest**

Groups Randolph Sloof, 2013-11-11 In this chapter the topic of this book is introduced Section 1.1 provides a brief and rather general motivation for the scientific project undertaken here Interest groups are a very popular object of scientific inquiry and they received already considerable research attention from scholars in political science as well as from researchers in economics Necessarily then this book adds to a literature which is already quite developed A detailed positioning in this literature of the theoretical material presented in this monograph will be given in Chapter 2 This second chapter will also by means of a review of the empirical literature provide a more general overview of the issues deemed to be important when studying the influence of interest groups on public policy The outline of the entire book is described in greater detail in Section 1.2 As most issues involved are more easily presented in later chapters this introductory chapter is kept brief 1.1 MOTIVATION Substantial political power is often attributed to interest groups Examples abound in both the economics and political science literature as well as in journalistic accounts and popular publications On many occasions the authors express concerns about the negative impact of interest groups on the democratic quality of government The interests of a small group are served at the expense of the interests of the general public the taxpayers is an often heard popular complaint

Empirical Implications of Theoretical Models in Political Science Jim Granato, Melody Lo, M. C. Sunny Wong, 2021-05-13 Provides a framework to demonstrate how to unify formal theoretical and empirical analysis through various interdisciplinary examples **Models of Multiparty Electoral Competition** K. Shepsle, 2012-11-12 Kenneth A Shepsle surveys the formal literature on multiparty electoral competition **Strategic Choice and International**

Relations David A. Lake, Robert Powell, 2020-05-05 The strategic choice approach has a long pedigree in international relations. In an area often rent by competing methodologies, editors David A. Lake and Robert Powell take the best of accepted and contested knowledge among many theories. With the contributors to this volume, they offer a unifying perspective which begins with a simple insight: students of international relations want to explain the choices actors make, whether these actors be states, parties, ethnic groups, companies, leaders, or individuals. This synthesis offers three new benefits: first, the strategic interaction of actors is the unit of analysis rather than particular states or policies; second, these interactions are now usefully organized into analytic schemes on which conceptual experiments may be based; and third, a set of methodological bets is then made about the most productive ways to analyze the interactions. Together, these elements allow the pragmatic application of theories that may apply to a myriad of particular cases, such as individuals protesting environmental degradation, governments seeking to control nuclear weapons, or the United Nations attempting to mobilize member states for international peacekeeping. Besides the editors, the six contributors to this book are all distinguished scholars of international relations: Jeffrey A. Frieden, James D. Morrow, Ronald Rogowski, Peter Gourevitch, Miles Kahler, and Arthur A. Stein. Their work is an invaluable introduction for scholars and students of international relations, economists, and government decision makers.

Narrativized Strategic Choice John P. DeRosa, 2020-07-23 In February 2019, Donald Trump announced the United States withdrew from the landmark Cold War era Intermediate Range Nuclear Forces Treaty with Russia, sparking worldwide concerns over the specter of a new nuclear arms race. The rational actor and game theoretic models dominating international relations literature failed to predict or explain this strategic choice. Rationalist, normative, and materialist models of strategic choice saturate the study of international relations. Scholars continue to expose the shortfalls in these approaches in explaining or predicting outcomes of strategic interactions. In this timely study, John P. DeRosa advances a new model of strategic choice through a narrative lens. This narrative turn reframes the logic to emphasize the propositions of motives, perceptions, preferences, and the reflexive interaction of strategic choices. Case studies of American and Russian nuclear arms control treaties, from the negotiations of the Intermediate Range Nuclear Forces (INF) Treaty in 1987 to the crisis of the US withdrawal from the INF Treaty in 2019, support building a theory of narrativized strategic choice.

A New Model of Political Reasoning Kanzhen Li, 2021-02-16 Why politics and international relations seem to be driven by power strategies in some conditions but seem to be attached to values/beliefs in other situations? Based on findings in political psychology and international relations, the book builds a new political reasoning model: a two-layered motivation heuristic complex. The model grasps the internal mechanism that drives the co-existent and dynamic relationship between material and ideational considerations in making political choices. Phenomena diverse and evolving across situations and periods. Applied to the case of China and human rights, the model helps understand several questions that attract those who are interested in the topic: e.g., the roots and contents of strategic and conceptual factors that continuously influence China's human rights idea/policies, if

why and how the strategy ideational relationships in such idea policies evolve across periods and the role that China's national security condition and external pressure play during such evolving relationships The Oxford Handbook of American Elections and Political Behavior Jan E. Leighley, 2012-02-16 The Oxford Handbooks of American Politics are the essential guide to the study of American political life in the 21st Century With engaging contributions from the major figures in the field The Oxford Handbook of American Elections and Political Behavior provides the key point of reference for anyone working in American Politics today Political Economy: Institutions, Competition and Representation William A. Local Government and Strategic Choice (Routledge Revivals) John Friend, Neil Jessop, 2013-10-14 First published in 1969 this book is concerned with the processes of policy making in local government The authors address themselves to the basic challenge of planning in a democracy and consider issues such as how those elected to exercise choice on our behalf can preserve and expand their capacity to choose discriminatingly when the sheer complexity of the issues facing them tends all the time to make them increasingly dependent on the skills and judgements of their professional advisers This question is explored in relation to the many different yet interdependent aspects of the planning process which impinge on any local community with particular reference to the planning of housing transport education and shopping of land use and local government finance The book is the outcome of a four year program of research during which a mixed team of operational research and social scientists was given a unique opportunity to observe the ways in which decisions were made and plans

formulated in one particular city Coventry It covers both political and professional aspects of local government in 1960s Great Britain and has had important implications for urban governments throughout the world *Local Government and Strategic Choice* J.K. Friend,W.N. Jessop,2016-08-03 Local Government and Strategic Choice Second Edition is the result of a study of policy formation in the City Council of Coventry during a four year period This edition is a reappraisal of the earlier edition with an emphasis on connective planning Part I describes the planning strategies made in an urban setting This part explains the City and the City Council organization of the local authority decision making mechanisms developmental planning including land use school system planning and cross departmental planning Part II is a study of city planning as a process of strategic choice that has been altered in many different ways depending on the purpose This part also discusses the problems encountered in the planning process such as the existence of organization boundaries in the government sector Part III deals with a fictional case that relates the uncertainties and political realities of decision making in an urban setting The case studies cover land allocation and development tax and traffic issues Part IV discusses organizational challenge and also touches in some way on the future organizational structure of local governments This text then explains the need for connective planning of how individuals build flexible networks among decision making agencies to serve the various interests of both the private and government sectors This book is suitable for sociologists city administrators and officials local government officials heads of government agencies and heads of planning and engineering departments of local government units The Oxford Handbook of Political Science Robert E.
