Model-Minority Imperialism Victor Bascara, At the beginning of the twentieth century soon after the conclusion of the Spanish American War the United States was an imperialistic nation maintaining often with the assistance of military force a far flung and growing empire After a long period of collective national amnesia regarding American colonialism in the Philippines and elsewhere scholars have resurrected the power of empire as a way of revealing American history and culture Focusing on the terms of Asian American assimilation and the rise of the model minority myth Victor Bascara examines the resurgence of empire as a tool for acknowledging and understanding the legacy of American imperialism Model Minority Imperialism links geopolitical dramas of twentieth century empire building with domestic controversies of U S racial order by examining the cultural politics of Asian Americans as they are revealed in fiction film and theatrical productions Tracing U S economic and political hegemony back to the beginning of the twentieth century through works by Jessica Hagedorn R Zamora Linmark and Sui Sin Far discourses of race economics and empire found in the speeches of William McKinley and William Jennings Bryan as well as L Frank Baum's *The Wonderful Wizard of Oz* and other texts Bascara's innovative readings uncover the repressed story of U S imperialism and unearth the demand that the present empire reckon with its past Bascara deploys the analytical approaches of both postcolonial studies and Asian American studies two fields that developed in parallel but have only begun to converge to reveal how the vocabulary of empire reasserted itself through some of the very people who inspired the U S imperialist mission Victor Bascara is assistant professor of English and Asian American studies at the University of Wisconsin Madison *The Home We Build Together* Jonathan Sacks, 2025-07-03 Rabbi Sacks thesis on the future of British society and the dangers facing liberal democracy With a new foreword by Daniel Finkelstein Arguing that global communications have fragmented national cultures and that multiculturalism intended to reduce social frictions is

today reinforcing them Sacks argues for a new approach to national identity making the case for integrated diversity within a framework of shared political values Britain he argues will have to construct a national narrative as a basis for identity reinvigorate the concept of the common good and identify shared interests among currently conflicting groups It must restore a culture of civility protect neutral spaces from politicization and find ways of moving beyond an adversarial culture in which the loudest voice wins He argues for a responsibility rather than rights based model of citizenship that connects the ideas of giving and belonging Offering a new paradigm to replace previous models of assimilation on the one hand multiculturalism on the other he argues that we should see society as the home we build together bringing the distinctive gifts of different groups to the common good Sacks warns of the hazards free and open societies face in the twenty first century and offers an unusual religious defence of liberal democracy and the nation state

Geography in America at the Dawn of the 21st Century Gary L. Gaile, Cort J. Willmott, 2005. Geography in America at the Dawn of the 21st Century surveys American geographers' current research in their specialty areas and tracks trends and innovations in the many subfields of geography. As such, it is both a state of the discipline assessment and a topical reference. It includes an introduction by the editors and 47 chapters, each on a specific specialty. The authors of each chapter were chosen by their specialty group of the American Association of Geographers (AAG). Based on a process of review and revision, the chapters in this volume have become truly representative of the recent scholarship of American geographers. While it focuses on work since 1990, it additionally includes related prior work and work by non-American geographers. The initial *Geography in America* was published in 1989 and has become a benchmark reference of American geographical research during the 1980s. This latest volume is completely new and features a preface written by the eminent geographer Gilbert White.

The North American Model of Wildlife Conservation Shane P. Mahoney, Valerius Geist, 2019-09-10. The foremost experts on the North American Model of Wildlife Conservation come together to discuss its role in the rescue, recovery, and future of our wildlife resources. At the end of the nineteenth century, North America suffered a catastrophic loss of wildlife driven by unbridled resource extraction, market hunting, and unrelenting subsistence killing. This crisis led powerful political forces in the United States and Canada to collaborate in the hopes of reversing the process, not merely halting the extinctions but returning wildlife to abundance. While there was great understanding of how to manage wildlife in Europe, where wildlife management was an old, mature profession, Continental methods depended on social values often unacceptable to North Americans. Even Canada, a loyal colony of England, abandoned wildlife management as practiced in the mother country and joined forces with like-minded Americans to develop a revolutionary system of wildlife conservation. In time, and surviving the close scrutiny and hard ongoing debate of open democratic societies, this series of conservation practices became known as the North American

Model of Wildlife Conservation In this book editors Shane P Mahoney and Valerius Geist both leading authorities on the North American Model bring together their expert colleagues to provide a comprehensive overview of the origins achievements and shortcomings of this highly successful conservation approach This volume reviews the emergence of conservation in late nineteenth early twentieth century North America provides detailed explorations of the Model s institutions principles laws and policies places the Model within ecological cultural and socioeconomic contexts describes the many economic social and cultural benefits of wildlife restoration and management addresses the Model s challenges and limitations while pointing to emerging opportunities for increasing inclusivity and optimizing implementation Studying the North American experience offers insight into how institutionalizing policies and laws while incentivizing citizen engagement can result in a resilient framework for conservation Written for wildlife professionals researchers and students this book explores the factors that helped fashion an enduring conservation system one that has not only rescued recovered and sustainably utilized wildlife for over a century but that has also advanced a significant economic driver and a greater scientific understanding of wildlife ecology Contributors Leonard A Brennan Rosie Cooney James L Cummins Kathryn Frens Valerius Geist James R Heffelfinger David G Hewitt Paul R Krausman Shane P Mahoney John F Organ James Peek William Porter John Sandlos James A Schaefer

The American Model of State and School Charles L. Glenn, 2012-04-26 State and Schools argues that the American educational model represents a third way of organizing the provision of schooling and that this accounts for some of its strengths as well as some of its weaknesses Charles L Glenn looks closely at the tradition of democratic localism in the management of schooling and the powerful and anti democratic effect of the emerging education profession which has in some respects the characteristics of a religious movement more than of a true profession A sweeping chronological survey State and Schools includes chapters on the colonial background schooling in the New Republic the creation of an education profession and the progressive education movement among others Glenn s primary purpose in this authoritative and thoroughly researched book is to illustrate the deep roots of ways of thinking about schools that have made it difficult for policy makers and the public to do what needs to be done to enable schools to function as they should for our society and for future generations
