Labour's Ballistic Missile Defence Policy 1997-2010 James Simpkin, 2022-12-23 This book uses the strategic relational approach to explain how the Labour governments of Tony Blair and Gordon Brown integrated the United Kingdom into the US ballistic missile defence system in order to maintain national security and to uphold the special relationship while at the same time recognising that voters were in general opposed to missile defence Labour s Ballistic Missile Defence Policy 1997 2010 examines how the Labour administration was tasked with navigating a domestic political environment in which they had to appear tough on defence in general in order to appeal to a broader range of the electorate while recognising that voters were opposed to missile defence in particular This book seeks to answer the question of why the centre left

government of Tony Blair and Gordon Brown elected on a mandate of multi lateralism in international relations and espousing an ethical dimension to foreign policy committed the United Kingdom to US ballistic missile defence an internationally divisive military project associated with the US Republican Party and George W Bush in particular This book is essential for students and researchers interested in British military history international relations strategic studies British politics Labour politics and political theory The Military Effectiveness of Post-Colonial States Pradeep Barua,2013-04-15 Current military historiography has a tendency to portray the military effectiveness of non western post colonial states in broad generalized stereotypes This monograph examines the militaries of Nigeria Argentina Egypt and India in times of crisis to challenge these assumptions The book shows that despite having broad similarities each of these states had unique characteristics that impacted their military effectiveness in different ways These key variables included the military institutions maturity and skill sets the availability and management of human and material resources and the quality of both civil and military leadership *Encyclopaedia of the Modern British Army* Terry Gander,1980 **The Cambridge Economic History of Modern Britain: Volume 2, Growth and Decline, 1870 to the Present** Roderick Floud,Jane Humphries,Paul Johnson,2014-10-09 A new edition of the leading textbook on the economic history of Britain since industrialization Combining the expertise of more than thirty leading historians and economists Volume 2 tracks the development of the British economy from late nineteenth century global dominance to its early twenty first century position as a mid sized player in an integrated European economy Each chapter provides a clear guide to the major controversies in the field and students are shown how to connect historical evidence with economic theory and how to apply quantitative methods The chapters re examine issues of Britain s relative economic growth and decline over the long twentieth century setting the British experience within an international context and benchmark its performance against that of its European and global competitors Suggestions for further reading are also provided in each chapter to help students engage thoroughly with the topics being discussed Military Technologies of the World T.W. Lee,2008-12-30 From the introduction of gunpowder to the reigning era of nuclear weapons military technological advances have been at the forefront of change These changes in weaponry have influenced the outcome of many historical events and the downfall or success of major civilizations All nations have sought to improve military technologies in the hope of gaining the upper hand in conflict The developments in guns cannon technology warships tanks and airborne and space weapons have been crucial in the ever changing face of war While it is inherent in human nature to seek better weapons for survival the use of this weaponry will continue to make an impact on history Through careful examination of the science and engineering of these weapons persons can continue to venture into the field of military weaponry with an outlook towards the future Through the many advancements made in military weaponry our civilization is one that continues to change in the face of war Technological advancements made in this area improve upon current war tactics and often are the basis behind military warfare

Technology has proven to transform history lending itself to be one of the most powerful assets of the human race Breakthroughs in military technology prove to be at the forefront of war and in many cases the result of war is directly connected through these advancements In history major civilizations have seen their rise or downfall through the elevation of weapon technology Lee delves into the engineering and science behind major weapons such as guns cannons fighter and stealth aircrafts various types of missiles attack helicopters aircraft carriers nuclear submarines main battle tanks and future weapons He comprises the knowledge behind the weapons along with an understanding of how the weapons are used and applied to modern warfare By showing how weapons have changed military warfare he explains the human nature to seek better weapons for survival protection and domination of resources [HMS London](#) Iain Ballantyne,2002-06-06 A fascinating and lively account of the lives of British warships named London looking at history from the perspective of the men who were there There is no current warship in the Royal Navy called HMS London but vessels carrying the name have featured in some of the most controversial episodes of British naval history For example the wooden wall battleship HMS London of the late 18th century could be called the ship that lost America while the heavy cruiser of WW2 was command vessel for the escort force that failed to safeguard the controversial convoy PQ17 Examining the stories of HMS Londons all the way from the English Civil War through the Battle of Copenhagen in 1801 where Nelson famously ignored signals to break off the action displayed by HMS London we also learn of the pre dreadnought London s participation in the ill fated Dardanelles campaign of WW1 Among the people Iain Ballantyne interviewed for this book were veterans of the Arctic convoys of WW2 the Yangtse Incident and warriors of the Cold War and 1991 Gulf War It all adds up to a thoroughly researched and exciting narrative of naval history Adding to the authenticity of the tale Iain even sailed to Russia in the last HMS London a Type 22 guided missile frigate in August 1991 During a WW2 convoy re enactment the ship was almost hit by a practice torpedo launched from a Soviet submarine and had to take evasive action [The Encyclopedia of Modern Military Weapons](#) ,1999 **Air University Library Index to Military Periodicals** ,1998 **Professional Journal of the United States Army** ,1997 [Contemporary Military Culture and Strategic Studies](#) Alastair Finlan,2013-09-02 This book explores and compares the contemporary military cultures of the United States and the United Kingdom The last decade has witnessed astonishing global events from 9 11 and military operations in Afghanistan in the same year to the military intervention in Libya in 2011 Western military forces have been involved in all of these campaigns and have been engaged in continuous military operations for over ten years It is therefore now apt to focus a spotlight on the military cultures of these state based armed forces This book examines how contemporary American and British military culture is formed focusing explicitly on the six major military institutions The author dedicates a chapter to each of these institutions with each one sharing a unifying analytical framework These chapters explore the formation and sustenance of US UK military culture under the rubric of common themes that include social origins transformative events leaders approaches to war technology

and contemporary identity To conclude the book considers the impact of the War on Terror on the military cultures of the US and UK as well as likely directions for the future This book will be of much interest to students of military studies strategic studies security studies and comparative politics
